Facts

- FACT 1. WESTERN STATES LIFE gained more assets
- FACT 2. wrote more new business (first premiums paid in cash)
- FACT 3. gained more insurance in force

during 1921 than any of the other twenty-three life insurance companies domiciled West of the Rocky Mountains, with the single exception of one of these companies over forty years older than Western States Life.

These facts are disclosed by figures which have just been published from the sworn statements of the companies to the various State Insurance Departments.

FURTHERMORE, sworn statements of all the two hundred sixty-two life insurance companies in the United States show that

- FACT 4. WESTERN STATES LIFE gained more insurance in force

during 1921 than any one of two hundred nineteen of these companies. The forty-two companies ahead of us averaged forty-five years of age. Western States Life, not yet twelve years old, outdistanced eighty per cent of all the companies in the business on 1921 gain of insurance in force.

Why?

A WESTERN COMPANY — linked with the steady progress of the West, investing the savings of its policyholders in the development of Western enterprise. ABSOLUTE SECURITY TO POLICYHOLDERS — cash capital exceeded by only seven life insurance companies in the United States; the full reserve on every policy deposited with the State of California. POLICIES WITHOUT A SUPERIOR — great as was our 1921 record, summarized above, our new business for 1922 is running thirty-four per cent ahead of last year. No better evidence could be offered that Western men and women appreciate the complete protection our policies afford for FAMILY, BUSINESS and OLD AGE.
