

RENAISSANCE IS SUBJECT

HISTORIAN DISCUSSES REVIVAL OF LEARNING

First of series of lectures in Presented by Dr. Harding of Summer School Faculty of University

Dr. Samuel B. Harding, professor of history in the University of Minnesota, discussed the origin of the Renaissance yesterday at Gold Hall, on the campus, in the first of a series of five lectures on that transition period in the world of thought.

Dr. Harding, citing the period from 1221, the date of the death of Dante, to 1521, when Pope Leo X died, as the usual accepted duration of the Renaissance, pointed out that this historical period, like all others, could not be marked by exact dates. A considerable bit of individualistic thinking and writing in the new spirit had been going on even before 1221, the speaker pointed out, and the period could only be marked out roughly.

Whether the new spirit pervading men's minds gave rise to the revival of learning, or whether the revival of learning stimulated the new spirit, Dr. Harding asserted, giving it as his opinion that there was considerable interaction of both these factors. The Italian poet, Petrarch, contemporary of Dante, was cited as having done more than any

other man to promote the Renaissance and to typify its spirit—the spirit of curiosity, frowned upon in the preceding ages of asceticism and of submission to authority, the spirit which has made possible all the achievements of the modern world.

Dr. Harding's lecture this morning in Gold Hall at 11 will be on the subject, "Dante, Petrarch, and Boccaccio." The series will run through and including Tuesday of next week, and townspeople as well as summer session students and faculty are invited to any and all the series.

Father of Three Kings
Charles Bonaparte, father of the great emperor Napoleon, was a humble lawyer, with no very extensive practice, in the sleepy little town of Ajaccio, in the isle of Corsica. He seems to have been a most affectionate and exemplary parent, and as king (Joseph, king of Naples and Spain; Louis, king of Holland; and Jerome, king of Westphalia), and a fourth who became the greatest military commander, monarch and king-maker of modern times, he holds a unique place in history.

There were thirteen children in the family. Bonaparte, the second, Charles Bonaparte, although hardly well-to-do, strove to give his sons the best possible education, and had he not decided to send Napoleon (then aged ten) to the military school at Brienne, the whole course of the world's history might have been changed.

FIRE THREATENS PLANT

BLAZE IN TIMBER NEAR STEVENS-HARRIS MILL

Another One on Hills Creek Fight to Fall Creek—Men Are Fighting Both

A forest fire is spreading in an old burn on Laho creek, west of Eugene. It has crossed the ridge over to the Bladway side and is threatening timber and logging camps of the Stevens-Harris company, operating at Walton, according to H. S. Shewley, supervisor of the Bladway national forest.

The big fire of 1916 killed a great deal of good timber in that area and the present fire is burning among these snags and in the dry underbrush.

George J. Stevens, member of the Stevens-Harris company, who was in the city yesterday, said that ten men were sent out from the company's crew Monday to fight the fire and they succeeded in checking it.

Another fire has been burning on Hills creek, a tributary to Fall creek, in section 15, township 18, south of range west, for a number of days, and Ed Schultz, fire warden in that district, left yesterday with 12 men to fight it. The fire is burning in the edge of green timber, but for the most part it is an old burn and little damage has yet been done.

FRUIT PICKERS LACKING

OPERATIONS AT EUGENE CANNERY ARE HINDERED

Cherries and Berries May Get Too Ripe to Handle for Lack of People to Gather Them

Lack of cherry and berry pickers is hindering operations at the cannery of the Eugene Fruit Growers' association and may cause a loss of a great deal of fruit on account of allowing it to become too ripe, said J. G. Holt, manager of the association.

The hot weather is ripening the cherries and loganberries very rapidly and the growers are unable to pick them fast enough with the small crews on hand. Twice as many pickers as are at present employed could be used, said Mr. Holt.

The manager says that anyone who wants to work in the cherry orchards or berry fields may apply to the grower, at the cannery or at the employment office.

The cannery was in operation all day July 4 and turned out 1200 cases of canned goods which is a good record for any day, said Mr. Holt. Yesterday the crew quit early because of lack of fruit to work on.

MRS. ANDREW FISH DEAD

FORMER EUGENE RESIDENT PASSES AT WORCESTER

Mrs. Andrew Fish, wife of the former pastor of the First Unitarian church of this city, died at Worcester, Mass., June 28, according to word received here yesterday.

Mrs. Fish lived here with her husband for five years. Mr. Fish after leaving the pastorate of the church here, was professor of literature at the University of Oregon. He was taking a year's leave of absence for study at Clark university and was expected to return here in the fall.

WOODHOUSE IS FINED \$75

ACCUSED BY POLICE OF RECKLESS DRIVING OF CAR

S. D. Woodhouse, dancing master of this city, was fined \$75 in police court yesterday and his driver's license was revoked for six months because of reckless driving on the streets.

A Salem man whose name was not taken, paid a fine of \$2 for turning his car around on a street between intersections and D. B. Crosby paid a fine of \$5 for cutting a corner with his car at Sixth avenue west and Olive street.

GUARDSMEN WILL COMPETE

FOUR MEN WILL ENTER NATIONAL TARGET MATCHES

Four members of the national guard companies of this city will at-

tend the annual national target shoot this year, according to Major W. G. White, who has received word that no decision has yet been reached by the army officials as to whether the competition will be held at Camp Perry, Ohio, this year or at Jacksonville, Florida. Last year two members of the local guard, Captain Lawrence Jensen and Lieutenant Victor Stratton, represented the Eugene units at the national meeting.

The men of the headquarters company, who attended the Camp Lewis course, will be paid their state service pay at the meeting of the organization next Friday. Each enlisted man will receive \$7.50. The men have already received the regular army pay while at Camp Lewis.

MILLER TO MAKE DEMAND ON CHEMICAL FOUNDATION

MUST RETURN PATENTS AT REQUEST OF HARDING

Government Takes Steps to Defend Suits Brought Against It to Recover Royalties

WASHINGTON, July 5.—The move of the administration to recover from the Chemical Foundation, incorporated, all alien enemy patents purchased by that organization in 1919 from the then alien property custodian, Francis P. Garvan, was declared in official circles today to be a logical step on the part of the government to defend suits brought against it to recover royalties collected from the licensing of those patents.

It was said there are more than 60 suits pending against the foundation, the treasurer of the United States to recover royalties which have accrued as a result of licenses issued by the federal trade commission under authority of the trading with the enemy act. Alien Property Custodian Thomas W. Miller, announced today he would make formal demand this week on the Chemical Foundation for the return of the patents in conformity with President Harding's instructions. In the event of a refusal, Mr. Miller said a suit in equity immediately would be filed in the supreme court of the District of Columbia. He declined to disclose the basis of such a suit, or to discuss the cases which would be brought at this time to recover the patents. He denied emphatically, however, that politics was involved. Department of justice officials also declined to disclose what had been developed by the investigation referred to by Attorney General Daugherty in a statement issued Saturday coincident with the president's letter to Custodian Miller. Mr. Daugherty said records of the department of justice show the president had sufficient reasons for his instructions to recover the patents.

Fraud Is Not Alleged

In official sources outside the department of justice, and the alien property custodian's office, however, it was said that while the government was not prepared to characterize the sale of the enemy patents to the foundation "as clean as a hound's tooth," neither was it prepared to say that there was fraud or anything criminal involved. Up to the present, it was said, there has been no suggestion of fraud in the transaction by which Mr. Garvan as alien property custodian sold the patents for \$250,000 to the organization of which he is now president.

Administration lawyers are said to question the right of the Wilson administration, as a matter of law, to sell the patents even for the purpose of making them available to American industry on non-monopolistic terms, and to develop an industry which up to that time had been controlled by Germany.

HOPE HELD OUT FOR SHOP THIEF TO END

(Continued from Page One)

striking mechanics returning again to their jobs, in order not to forfeit pension, passes and seniority privileges.

Gordon Denies Statement

Gordon denied that many of the men who had walked out were returning. "We have checked up on reports that men were going back and find that, for the most part they are untrue," he asserted. "There was a statement that the men were back at work at Tucson. This is not so, they are still out 100 per cent. At Lordsburg, New Mexico, where it was said the men were back we found that the only persons at work were the foreman, his daughter and a Chinaman."

While the railroad asserted that all of their passenger and freight business was being handled as usual, Gordon maintained that the situation could not last long, as his reports disclosed that on the San Joaquin division at Bakersfield, and at Dunsmuir, California, and other points on the Portland division, the sidings were clogged with freight cars needing attention.

Firemen and Oilers Go Out

CHAPPEE, Mo., July 5.—Twenty-five stationary firemen and oilers, members of the railroad maintenance of ways union, went on strike at the St. Louis-San Francisco railway shop here today. The men acted under orders of the local union chairman, despite the fact that the national maintenance of ways union has postponed a walkout pending negotiations with the United States railroad labor board.

Road Sets Time Limit

DES MOINES, Iowa, July 5.—The Chicago, Burlington and Quincy railroad today posted notices at its shops here stating that striking shop men who returned to work after July 10, will be treated as if their services had been continuous. If they do not return by July 10, the company states, they will lose all seniority rights.

Negroes Register for Work

PARKERSBURG, W. Va., July 5.—About fifty negroes have arrived here from Eastern and Southern points and will be employed as car cleaners in the Baltimore and Ohio railroad shops, it was announced last night. The negroes are located at the High yard shops, their camp being surrounded by guards.

Leaders of the shop men's union here said they knew the men had been brought in, but declined to comment regarding their importation.

Shop Men Replaced at Toledo
TOLEDO, Ohio, July 5.—Rapid strides in replacing railroad shop men who went out on strike last Saturday was reported in several of Toledo's most important railroad shops today.

The largest proportional replacement was claimed by the same Michigan Central shops where it was claimed by officials that fully 50 per cent of the vacancies caused by the strike had been filled.

Many applications have been received by the Pennsylvania company's employment office, and indications are that the strikers' jobs will be filled in a short time. It was stated at the office of the company.

Shop Men Return at Sacramento
SACRAMENTO, Cal., July 5.—Twelve hundred and thirty-nine shop

workers employed by the Southern Pacific railroad in Sacramento returned to work today after the Fourth of July holiday, it was announced by Division Superintendent Thomas Ahern. There are slightly more than 2500 on the rolls, it was stated.

At the Western Pacific's local shops only eight men returned out of approximately 200 last employed. It was announced by A. H. Powell, shop superintendent.

WALSH MATED TO HEIRESS

FOUNDER OF "HOBBO COLLEGE" BECOMES BENEDICT

CHICAGO, July 5.—Michael C. Walsh, founder of the "Hobbo College," was married last night to Mrs. Martha Levy, of Knoxville, Tenn., whose fortune is reported to be \$100,000. They plan to open an educational and recreation center for the unemployed on West Madison street next November. In this venture they will be assisted

by Mary Gordon and J. Ogden Armour. Mr. Walsh said.

Mr. and Mrs. Walsh met several years ago while he was on a chautauqua circuit, declaiming on the sorry plight of "down and outers."

The Trial of a Lawyer
A successful Chautauqua lecturer, a prominent attorney in his own city, who will now entertain us with his celebrated lecture, "The Trial of Jesus from a Lawyer's Standpoint." Recently he listened to the following diverting introduction from the lips of a platform manager:

"I am very glad to introduce to you, ladies and gentlemen, Mr. B., who will now entertain us with his celebrated lecture, 'The Trial of Jesus from a Lawyer's Standpoint.' I can only imagine one lecture which might prove more interesting to this audience than the one announced. That would be 'The Trial of a Lawyer from Jesus' Standpoint.' — Everybody's Magazine.

A Young Knight
Little Walter, 6 years old, took the church collection very seriously. As the usher approached the boy noticed that a guest in the family pew was not duly prepared. Sliding along the seat, he whispered, "Where's your nickel?"

"I didn't bring one," replied the woman.

Time was short and the matter was urgent, but Walter came to the decision with great promptitude. Thrusting his nickel into the woman's hand, he whispered:

"Here, take mine. I'll pay for you, and I'll get under the seat." — Boston Transcript.

Lovely Healthy Skin Kept So By Cuticura

Daily use of the Soap keeps the skin fresh and clear, while touches of the Ointment now and then prevent little skin troubles becoming serious. Do not fail to include the exquisitely scented Cuticura Talcum in your toilet preparations.

Sample Book Free by Mail. Address: "Cuticura Laboratories, Dept. Reg. Mailed at Mass." Sold everywhere. Beware of cheap imitations. Cuticura Soap shaves without lather.

You may increase your engine power 20%

Too heavy an oil, or one lacking in certain qualities, may reduce the power delivered to the wheels of the automobile as much as 20%.

The ideal oil is the thinnest oil which will keep the bearing surfaces of the mechanism separated.

Providing this oil has "oiliness," stability and purity, it will give perfect lubrication, and permit the development of the maximum power, speed and gasoline mileage of the car.

"Oiliness" — Stability — Purity

Zerolene meets the conditions perfectly. It has great "oiliness," due to the crudes from which it is made, and our own patented process of high vacuum distillation.

It has great stability, as a result of which it resists engine heat and forms only a minimum of carbon of a soft, flaky nature which blows out with the exhaust.

And it is pure. This company has always considered the removal of all detrimental properties and compounds as essential in making Zerolene.

Zerolene of the correct grade gives perfect lubrication and permits the development of the maximum power, speed and gasoline mileage of the car.

HERE is a fabric tire in a class by itself. Literally it has no real competitor. It is a super fabric tire built for long, hard service on small cars. Regardless of road conditions or of any ordinary overload, on an established average it outwears from two to three tires of other makes.

This tire is made with an extra layer of fabric and a heavy, special tough red tread which is responsible for its extraordinary service and for its fame.

You cannot find a user who "knocks" the Fisk Red Top—you can find thousands to praise it beyond all other tires.

There's a Fisk Tire of extra value in every size, for car, truck or speed wagon.
