

"How can you accomplish so much at one sitting, Doctor?"

"I was in the chair only a short time, and yet you have removed the decay and have that front tooth prepared for the inlay. Can the work be properly done in so short a time, doctor?"

"Yes. You see, I deadened the nerve of that sensitive tooth temporarily so that I could work fast and accurately. Being thoroughly familiar with the anatomy of the tooth, I knew just how far to go so as not to touch the nerve canal. Here, look at this diagram:

"(A) represents decay which had to be removed. That space will be filled by the inlay.

"(B) is the pulp canal containing the nerve. Fortunately decay had not reached the nerve, so your tooth is still 'live'—the best condition for any tooth. Return in about an hour and we'll set your inlay. It takes just a few minutes."

It was along political lines showing how the choices were made through political parties but after the choice the person chosen was the servant of all the people. Mrs. Gertrude Howe read a little article on the value of little things. A pair of shoes on a voter in the Hoosier state determined the admission of the state of Texas into the union for the state of Texas came into the union by one vote. The senator who voted for its admission from the Hoosier state was elected by one vote and the fellow that voted for the senator would not have voted but for the shoes that were loaned him. Mrs. Clara Parsons read a pleasing clipping on the social center of the community.
