BOND ISSUE DISCUSSED

SCHOOL BUILDING TALKED BY BOARD MEMBERS

Proposition to Call Election Held Up Until New Regime Takes Office Next Week

Discussion of the advisability of calling for an election on a school bond issue of between \$100,000 to \$150,000 for the construction of a new junior high school was held last evening at the last session of the old board. No definite action was taken and the matter was passed on to the new regime. Work that has been started at the Eugene high school preliminary to the extension of the gymnasium and the addition of other improvements was ordered held up until estimates could be obtained on the cost of the work. The work has been done by high school students under the direction of Fred Chess but a board ruling requires that all projects that cost over \$500 are required to be submitted for bids.

The proposition to retain Mrs. O. C. Hamlin as principal of the Lincoln school next year and two other teachers of the staff was indefinitely postponed by the tabling of a resolution to rescind the former action of the board which did not recommend the three teachers for re-election. The vote on tabling of the resolution stood: Libby, Ford and Loomis, affirmative; Bartie and Keeney, negative. Representatives of the Parent-Teacher association of the Lincoln school were present to protest against the dismissal of the three instructors. A resolution recently passed by the Lincoln P.-T. A. asking that the board re-elect the teachers was again brought out but without avail—the decision of the board concerning the teachers was unchanged.

The board voted to abide by the desires of the Hendricks heirs and change the name of the Hendricks high school to the former name Eugene high school. The books of the board will also be audited up to June 18, the end of the fiscal year, according to the action of the action of the board. Reports on the finances of the schools were presented by G. H. Jones, clerk of the board. The reports on June 9, showed a total on hand of \$2301.28 with outstanding warrants of \$53,349.11. The total tax levy for 1922 is \$12,727.34 and of this amount \$60,876.45 has been turned over to the board. Contracts for the painting of the playsheds at the Condon and Patterson schools were also let. The board authorized the building of 24 tables for the high school library at an estimated cost of \$20 each. The work is to be done by Fred Chess and the manual training students of the Eugene high school.

RADIO COURSE OFFERED

UNIVERSITY TO TRAIN RESEARCH SPECIALISTS

Local Institution One of Few in Country Offering This Type of Instruction

A course in radio-physics, designed to train students for positions following graduation, as radio physicists, research specialists and executives in the radio field, will be offered in the University of Oregon beginning next fall. The University of Oregon is one of the few institutions in the country offering this type of training.

A student may take either a four-year or five-year course in radio-physics. The course leads to the bachelor of arts or bachelor of science and master of science degrees. It is identical for the first three years with the electrical option in pre-engineering, and conforms to the requirements for major students in physics. In the senior year the work in physics is directed toward work in radio. Courses in business management, finance and law are taken also. A qualified student entering the radio field will find opportunities for executive work with radio companies and corporations.

The five-year course offers more technical instruction than the four-year course. The fifth-year curriculum consists of thermodynamics, advanced electrical theory and thesis, higher mathematics, kinematics, strength of materials and advanced chemistry. Because it was difficult to obtain men with training in the special field of radio-physics, radio corporations in the past have recruited their staffs with electrical engineers. These engineers, however, have been trained in power rather than communication engineering, according to Dr. A. E. Caswell. The type of training particularly needed is men, by executives and research men in radio fields is in radio-physics.

LODGE GIVES TO HOME

DEGREE OF HONOR CONTRIBUTES TO FUNDS

To assist the financing of the children's farm home at Corvallis that is being promoted by the W. C. T. U., the Eugene chapter of the Degree of Honor has voted to contribute \$25 toward the funds that are now being collected in Lane county. The election of the Chief of Honor of the local chapter, which was scheduled for a meeting last night, has been postponed to the meeting of Wednesday.

STATE OIL LAWS CITED

LEGISLATORS SAY MEASURES PROTECT PUBLIC

Solons Point Out That County Court Has Power to Appoint Inspector Here

That the last legislature was far-sighted and made ample provision to care for the interests of the public in the event of an active oil boom in Oregon is the opinion of local members of the state body who in answer to inquiries from local people interested in the oil situation point to a measure that became law February 23, this year, when it was signed by Governor Pierce.

The bill provides for the county court to appoint an inspector of oil properties and to keep a record of all derricks and other data that may be required to control and safeguard the public interests. A tax of one-half cent per barrel for all oil marketed is provided in the law. This tax will be placed in a county fund and will be used to pay the salary and expenses of the oil inspector and will also be used for the construction of market roads in the road district where the taxable oil is produced. This is to be known as "the oil and gas fund."

That the legislators were also rather skeptical concerning the future of oil properties in the state is indicated by the minute provisions that are provided for the plugging of "dry" and "abandoned wells." The plugging of these false hopes is to be under the direction of the gas and oil inspector appointed by the county court. The measure provides also for the safeguarding of property adjacent to land where drilling operations are in progress. Leakage of pipe lines and damage that may be caused from this source is also taken care of in the state law and this may hold much of interest for property owners south of the city who may envision the time when a huge tangle of pipe lines will decorate the hills in that district.

Local holders of small plots who may have seriously considered the possibility of erecting back yard rigs will undoubtedly be disappointed when they learn that an oil well is required to be at least 200 feet from any adjacent property line. No move has yet been made by the Lane county court to name a gas and oil inspector for this district. Further development of the local field will be necessary before the court takes over the job of regulating the industry, is the report.

'EUGENIAN' COMMENDED

DECLARED THIRD BEST HIGH SCHOOL ANNUAL

Contest Conducted by Oregon Agricultural College Beaver at Corvallis

"The Eugenian," high school annual edited by Lee Rapp and managed by Beiden Babb, was given third honorable mention in a contest conducted by the Oregon Agricultural College Beaver annual to pick the best high school annual published in Oregon. Much interest was shown in the contest. 28 annuals having been entered in competition.

"The Clarion," the Salem high school annual, won first prize, a silver loving cup, which will become the permanent property of the school winning it these times. This production was characterized by excellence of content, art work and systematic arrangement of material, according to the judges. The editor was Hem L. Sun, a Chinese boy.

Other honorable mentions were given the Franklin high school "Post," the Oregon City "Hesperian," the Corvallis "Chimintian," and the Roseburg "Impulse." The Dallas "Spectator" was commended by the judges for the admirable printing done by the students in the school shop and for general attractiveness of appearance. The Mills City high school, with its student body of only 27, got out an annual that compared favorably with publications in schools with several times the attendance.

The Eugene high school book impressed the judges because of its unusualness in the case of its section, the systematic method of handling regroped pictures, the quality of the literary material, and the art work, especially the section headings and insert pages by Lester Swagart.

FOREIGN CREWS TO SHUN PORTS OF U. S.

(Continued from page one)

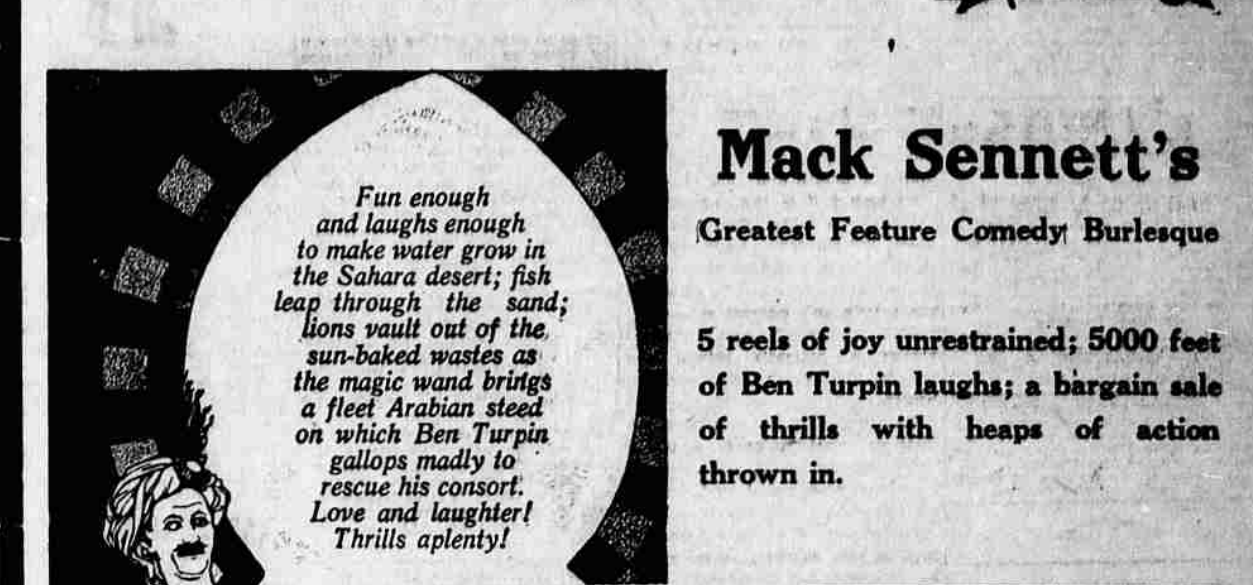

no method of overcoming the obstacles of international commerce imposed by the treasury regulations for several months at least as the American senate will not convene before December unless called in special session. Conversations with the foreign diplomats, it is understood, although in progress in one form or another for some time, have not reached the point which would justify any definite plans. The question of ratification by the senate will not come up until there is at least some assurance of acceptance of the proposal by some of the powers involved. It is recalled, however, that in the exchange of notes with Great Britain relative to the previous proposal for extension of the right of search as a means to check rum smuggling, that the British reply, although unfavorable to the project, admitted that there existed an "abuse" of the British flag in the protection it accorded to the hovering smugglers' craft off the Atlantic coast.

LOSS OF TRADE IS RESULT

Hoover Says Seaport Business Suffers Under Rum

WASHINGTON, June 13.—Part of the "price we must pay for prohibition" is a loss of considerable seaport business, Secretary Hoover remarked today in discussing the

MORE PUPILS ARE NAMED

SUCCESSFUL IN GEOGRAPHY AND PHYSIOLOGY EXAMS

E. J. Moore, County School Superintendent, Announces List of Those Who Pass

The list of pupils in the county who passed the recent examinations in geography and physiology was announced by E. J. Moore, county school superintendent, yesterday. The successful pupils are:

District No. 1—Belle Viola Olson.
District No. 2—Arlie Ferguson, Kenneth Danstrom, Erma Pearl James, Ila Hardin, Francis Parks, Rollin Fishwood.

District No. 4—Marvin Wetz, Marion Wetz.
District No. 10—Alice H. Wood.
District No. 12—Erma Viles, Beatrice Edmundson, Mary Tucker.

District No. 13—Louis James, Donald W. Clark.
District No. 25—Verlon Powell.
District No. 26—Gladys Kirkendall, Nellie M. Fogle.

District No. 40—John Pryer, Daniel R. Tucker.
District No. 43—Wanda Roach.
District No. 45—Delbert K. Brown, Maurice D. Cochran, Ernest Durrell Handy, Reuben Johnson, Albert Lee, Myrtle Snauer.

District No. 55—Jana E. Taylor.
District No. 57—Dorothy M. Schwing.
District No. 65—William Allen Morris, Lois Ione Severns.

District No. 66—Clair Stephens.
District No. 67—Claire Coltrane, Dorothy L. Gibson, Ray Randall.
District No. 72—John Elmer Smith.

District No. 75—Ada E. Gilham.
District No. 76—Mildred W. Flock.
District No. 79—Ira Weight, Glenn E. Spicer.

District No. 82—Ansel Ernest Hyland.
District No. 86—Harlin A. Jones, Katie Lebedoff, Roberta Waddell, Jack Delmonte.

District No. 90—Florence Louise Curnow.
District No. 108—Virginia Christina Hansen.
District No. 108—Anna Gertrude Johnson.

District No. 111—Fred W. Morse.
District No. 115—Anna Roening, Mabel Hendrickson.
District No. 118—Elizabeth A. Parker, Luella Parker, Ruby Stinson.

DISTRICT NO. 162—SYBIL WILCOX

District No. 174—Edith Marcin Moore.

District No. 178—Bertha E. Butler.

District No. 185—Mary Chapman, Floyd Amos Baker.
District No. 186—Ralph Mansfield.

Rain Beats Caterpillars
CORVALLIS, Ore., June 13.—The Yaquina train arrived on time today for the first time since the caterpillars took possession of the rails near summit. Only one engine was necessary to bring the train up the grade as the rain has left the caterpillars in a demoralized state. This, together with the oil treatment they received yesterday is thought to have solved the difficulty, for the time being, at least.

What Do I Want In My Bank?

MODERN METHODS

In my bank I want to find modern methods—the rapid, accurate present-day methods. Not that it makes any difference in my interest rate, but I like to know that my bank is aggressive and up-to-date.

Where I bank, at the First National, they are aggressive and up-to-date. They are modern in every respect.
