How is Your Vision?

Have you difficulty in seeing things plainly at a distance? Do objects close up or far away ever blur to you? Do your eyes water easily? Do you have eyestrain or headaches? Ever get dizzy? If so, you need glasses. You may never have noticed these things. Nature has not yet warned you. Why wait until your case becomes aggravated? Let your eyes be sure, thereby avoiding chronic conditions. We'll test your eyes free of charge and tell you frankly and honestly whether you need glasses or not. If you do, we'll prescribe for you intelligently, fit you comfortably and reasonably with eyeglasses, spectacles, bifocals, lognetts or reading lenses. And your school children! Be sure their eyes are correct. Defective eyes are easily corrected in the child, but if left to develop may mean serious handicap after life. Many a child's backwardness in school is due to defective vision and nothing else.
