HARRISBURG, Ore., Aug. 11.—(Special to the Register)—In respect to the memory of President Harding all business activities were still Friday during the hours from 11:30 to 2:30. For the first time on any extraordinary occasion every business house was closed, the confectoneries usually remaining open. The local newspaper also ceased business for the three-hour period. The two banks and the postoffice were closed all day. On all flag poles the flag was at half mast, and in various places mourning was displayed.

HARRISBURG NEWS NOTES
HARRISBURG, Ore., Aug. 11.—(Special to the Register)—The

paving of the Pacific highway to the city limits will be completed the first of the week, it is announced. This will complete the paving of the highway between Halsey and here which was begun last summer, and within a short time the trip can be made between the two towns all the way on pavement. It is estimated that it will take nearly two months after the paving is completed for the truck haulers under supervision of Andy Hillstrom, to fill off the shoulders along the pavement sides and make a macadam fill from the city limits to Third street, a distance of about a third of a mile.

Monday evening is the time for the big meeting of the lately revived Harrisburg chamber of commerce. It will be the occasion of the big business to be furnished by the Lloyd Shisler, side in the recently conducted membership campaign, this side being the one losing. Though this side is a little late in making preparations for the festive occasion, a sumptuous feed is promised, and it is expected that the program will also be rendered.

The city councilmen have just drawn up a new and most stringent traffic ordinance, it having been drawn up and approved at the regular monthly meeting Monday evening. It has already been published but it will also be printed in pamphlet form for distribution among local auto drivers.

Traffic ordinances have been published before by the city fathers, but it seems that no offense was given to now an ordinance is brought forth which it will behoove all auto drivers to observe.

The Linn county court has furnished and brought to this city a couple of most effective signs, one to the guidance of tourists, a feature of the signs being to call attention of the tourist to the fact that the ferry here is operated without toll. The signs will be put up on the business streets at the most advantageous points.

The closing of the Upper Willamette baseball league for this year has left the local team badly behind in expenses and it is expected that several ball games by home talent will be staged soon to settle up the accounts with the local outfit of the defunct league.

The Closed Car You Buy Now You'll Use Next Winter

Any owner who has felt winter's winds whistling through the ill-fitting doors and flimsy panels of a makeshift closed car knows there is no substitute for quality.

The 1924 Model Studebaker Light-Six Sedan you buy now will not only serve you admirably this summer and next winter, but will endure for years.

It is sturdily built for long, hard service, to ride comfortably, to look well and to operate at a moderate expense.

And when you are ready to trade it in on a new car the depreciation will be reasonable. Studebaker used car values are high because of Studebaker's inherent merit. And there is always a market for used Studebakers.

The substantial hard wood and steel body with its broad windows and four wide doors, its rich mohair velvet plush upholstery, and many refinements, is a model of Studebaker craftsmanship.

Construction of the chassis is an achievement in the use of precision methods in large scale manufacture. Proof of this lies in the machining of all surfaces of the crankshaft and connecting rods, to which is largely due its virtual freedom from vibration. This is an exclusive Studebaker practice on cars at this price.

The smooth-running Light-Six motor has made friends everywhere for its durability, power and flexibility just as it has for its economy and reliability.

The Light-Six Sedan is low priced because it is built complete by Studebaker in large volume, but there isn't a cheap thing about it. It is above par in every particular.

Studebaker's reputation for producing high class transportation for 21 years is worth considering when you buy a car.
