Beyond the Rim of the Horizon— a Host of Workers Serve You

WORKING under the flags of many nations, they gather the materials for a hundred or more products which are brought together under one emblem—the Certain-teed Label.
In India they have prepared the jute, in Portugal they have stripped the cork bark, in Argentina they have grown the flax for the linseed oil in Certain-teed linoleum. For mellow-toned Certain-teed shingles and roofing, rags have been sorted all over Europe and the Near East—rugged Vermonters have crushed the slate and Mexican peons have worked to produce the asphalt. From every point of the compass ships of commerce are bringing oils and gums, destined to become Certain-teed paint and varnish of enduring quality.
From our Southland comes the cotton for Certain-teed oil-cloth, and from many Certain-teed mines, the gypsum for plaster and light, fireproof walls.
The great Certain-teed plants, located at points where manufacture is most economical, convert these materials into more than a hundred useful articles. These go into every corner of the globe to meet the need for Certain-teed products.
Many products, one overhead, one management, one sales force and an organization of skilled workers enable Certain-teed to produce "enduring quality at low cost." These five words express the benefits that may be yours if you insist on the Certain-teed Label when buying.
