KIWANIS SPEAKER NAMED

Dr. Peter C. Crockett to Discuss His Law

Question to Be Asked Before Congress on Interstate Commerce Will Be Taken Up

Who should regulate interstate transportation by motor bus and truck, and whether or not the government of the United States, through an act of congress, should have the right to regulate interstate transportation, will be the subject of discussion by Dr. Peter C. Crockett, of the University of Oregon department of economics, at the Monday afternoon meeting of the Kiwanis club.

Dr. Crockett said last night that his topic was pertinent just now because of the fact that congress would shortly be asked to make a decision on the subject.

The federal government is the only agency through which regulation can be made now, and this has been decided by the United States supreme court on a number of recent cases the university professor said.

Announcement that Dr. Crockett would speak at the Kiwanis meeting was made yesterday by J. K. Pratt, chairman of the entertainment committee. Club singing and special music will form the entertainment.

The professor's talk will be taken from an article written by him, and which will be published in "Better Business," a national motor transportation trade journal published in Pittsburgh. The article will appear next month, and is the second in the same publication by Dr. Crockett.

MAN FIGHTS OFFICERS

Prisoner Resists City Police and Deputy Sheriffs; Faces Liquor Charge Today

Bill Steadman, one of those "big men" that sometimes go off on a tangent caused considerable worry to four officers of the law last night when they attempted to arrest him for alleged drunkenness.

Steadman was arrested, and locked up in the county jail, but not until Leo Scott, James M. Mait, Julian Strait and Van Swarvad tackled him and half led, half dragged the man to the lock-up.

The prisoner was first approached at the intersection of Seventh avenue and Willamette street by Leo Scott, night patrolman. The officer placed Steadman under arrest but the latter decided he wouldn't go to jail and gave resistance. It was said. The other officers arrived on the scene in time to see the city policeman holding Steadman at bay.

From Seventh avenue and Willamette street to the county jail the prisoner fought to free himself, but without success.
