Industrial Era For Us.

Fifteen million men in the field will use apparel about three times as fast as when peace prevails. The equip-ment of 1,000,000 horses is no small item and means steady equipment of supplies and food for this vast army. Europe can not fight and meet these requirements simultaneously. The more one of our industries is taxed the greater the activity which

will be reflected upon others. It is the history of war that the first shock produced duliness, but upon recovery industry boomed and prices soared. There is reason to believe that history will repeat itself and as the waste and demolition exceed any previous dem-onstration the sources of supply must be looked to to meet the inevitable demand.

We are at peace, the greatest indus trial nation; we have the mills, the farms, in short, the equipment wanted.

The Mosquito Habit. eep slapp

Ince Gunners Get the Range Every thing Which the Projectiles Strike is Destroyed, While the Splinters Work Great Havoc.

At the battle of Tsushima, when the Japanese destroyed the Russian fleet, Captain Semenoff was on the flagship Suvoroff. He had no definite post, and took notes until the sinking of the vessel. Extracts from his story are as follows:

"The first shells flew over us. At this range some of the long ones turned a complete somersault, and could be clearly seen with the naked eye curving like so many sticks thrown in the air. They flew over us, making a sort of wall, different to the ordinary roar.

"After them came others short of us -nearer and nearer. Splinters whistled through the air, jingled against the side and superstructure. Tobacco Habit Cured against the side and superstructure. Then, quite close and abreast the foremost funnel, rose a gigantic pillar of smoke, water and flame, I saw stretchers being carried along the forebridge.

"Shells seemed to be pouring upon us incessantly, one after another. It seemed as if these were mines, not shells, which were striking the ship's side and falling on the deck. They burst as soon as they touched anything-the moment they encountered the least impediment in their flight. Handralls, funnel-guys, topping lifts clent to cause a thoroughly efficient burst.

"The steel plates and superstructures on the upper deck were torn to pieces, and the splinters caused many casualties, Iron ladders were crumpled up into rings, and guns were literally hurled from their mountings.

liquid flame of the explosion, which seemed to spread over everything. I actually watched a steel plate catch fire from a burst. Of course, the steel did not burn, but the paint on it did. In spite of fear we must be busy for ourselves and for others. Some im-portant materials we may lack, but we will be ingenious enough to evolve to see anything with glasses, owing to everything being so distorted with the

quivering, heated air. "A man reported that the after-tur-

ret had been blown up, and almost simultaneously there resounded above A Plea of Guilty. "What!" exclaimed the teacher, "does no one know? What animal has bristly hair, is dirty all the time and loves getting into the mud?" A small boy raised a timid hand. "Well, Allan," said the teacher, "tell us what it is." Crash; the ship's boats on the spar-deck were smashed to bits; burning debris fell all round us, and we were enveloped in an impenetrable smoke. crash; the ship's boats on the sparenveloped in an impenetrable smoke "The fore-bridge was struck by

numerous projectiles. Splinters of shells, which penetrated in large quantitles under the mushroom-shaped roof of the conning-tower, had destroyed all the instruments in it, and had broken the compass, but luckily the telegraph to one engine and the voicetube to the other were still working."

Barbed Wire in Warfare

Nervousness May Affect Different Pet ple in Different Ways, But It is Nover a Welcome Visitor.

The mental state of a person suf fering from "nerves" is very much like that of a man who is wanted by

There is nothing about this in the books. There the symptoms are described as "loss of interest," "inability tacking force. to concentrate," "extreme depression," The use of wire entanglements is to concentrate," "extreme depression,' feeling of numbress in the extremities," etc. In a way this is true; just as it would be true of the men referred to above. The man wanted by the po of the boats' derricks, were quite suffi- lice would take little interest in the shop windows, and the man who thinks the ship has sunk would not get very far with a letter arranging the details of a business reorganization; and as for the man thrown out of the theater, he would probably admit, if brought to it, that he was profoundly depressed.

None of these individuals would feel "In addition to this, there was that the books quite did justice to the unusual high temperature and their feelings. And it goes without saying that none of them would respond with enthusiasm if a brisk person came along and said: "What you need is to get your mind off yourself," or, "What you need is plenty of fresh air and exercise."

The main thing is that the nervous victim is suffering severe mental disadequate substitutes .- Fiber and Fab- moment. At times it was impossible tress. He is not simply "out of sorts. -Medical Record.

Heard General Sherman Say It. Recently someone who seemed to know issued a denial of the prevalent impression that Gen. W. T. Sherman said "war is hell." J. P. Francis of Nickerson declares he heard General Sherman say it. He writes: "I never understood that General Sherman used the term 'war is hell' in any of his orders or official correspondence, but did use the term in a public address at a soldiers' reunion at Columbus, O., in 1880. The writer was seated near the speaker's stand and recollects the oc casion which called the famous expression from the general. General Sherman, in his address, referred to a particular military feat which called (on part of the troops selected to perform the task assigned them) What impression is this terrific war producing upon the child's mind? What do the boys and girls think of the confagration that is raging and of the battles that are waging? Performs the company the confagration that is reging? The battles that are waging? heroic courage to accomplish the task

Driest Spots in America.

According to the weather bureau

Russia is in the market to purchase from us 5000 tons of barbed wire to be used in military operations. The

effectiveness of barbed wire entanglements as defense measures has been fering from "nerves" is very much like that of a man who is wanted by the police, or who has just heard a rumor that the ship on which his wife and children have salled has been sunk in a collision, or who has cried "fire" in a theater and been thrown out, and knows his name has been obtained by the reporters. Very often it is a combination of all three, with perbably have in mind their experience in the far east and are hoping to make equally good use of the wire they would purchase in this country. The Russian entanglements before haps the added sensation of a man in doubt if he closed the safe before leaving the office.
Perhaps some sufferers will disagree with this and say it is not like that at all, but rather like having fallen into a dry well, from which you can hear the volces of people passing near by, but are unable to make yourself heard, or like having accidentally shot your neighbor's only child while cleaning a revolver.
The point is that it is distinctly unpleasant.
Any bad quarter of an hour that you may have experienced of uneasines anxiety, guilt, remorse or mortification will give you a very fair idea of the entanglement of loose wires on the ground. The entanglement of loose wires on the ground. The combination was almost anxiety, guilt, remorse or mortification will give you a very fair idea of the entanglement of loose wires on the ground. The entanglements finally were disposed of by pulling up the posts and dragging the fences analy under cover of darkness, but it was a long and costly task for the attribute for the streament of loose wires on the ground. The entanglements finally were disposed of by pulling up the posts and dragging the fences analy under cover of darkness, but it was a long and costly task for the attribute for the streament of loose wires on the ground. The entanglements finally were disposed of by pulling up the posts and dragging the fences and wine the funces for the streament of loose wires on the ground. The entanglements final demonstrated repeatedly since out war with Spain. They were brought

away under cover of darkness, but it was a long and costly task for the at-

valuable as a defense measure and even then has its limitations. An entanglement which would keep an army of Germans from reaching the Rus-sians also would prevent the Russians from getting at the Germans. It is effective in delaying and hampering the progress of an enemy and it also protects him against pursuit and as-sault in case the fortune of battle is against him.—Indianapolis 3tar.
