If you are a lady or a gentleman that fact will rise to the surface regardless of conditions or training, but many times, training and education only make larger the smallness of your mind.

To judge a person properly you should use your own initiative. Don't form your opinion by what the ever ready gossip mongers pour into your, sometimes, eager ear. Seek the interior qualities by your own original methods. By such means you will oftentimes find true friends that greatly need your friendship.

Why the price of bread has reached such proportions we can not understand, when a bushel of wheat will make fourty-four pounds of flour and one loaf of bread will weigh about three quarters of a pound. If you sell bread at 10 cents a loaf you are making about \$3.40 on a sack of flour or about 150 per cent. This is a fairly good margin isn't it? At least it shows that the middle man is not getting it all.
