The following are some of the epigrammatic statements made by Henry Ford, on the treatment of Labor, before the Federal Industrial Commission in New York in January:

My motto is and always will be to aid men to help themselves. Justice, not charity, is what the worker desires.

We cannot expect a man to give up his best efforts when he is in debt and has not enough to keep his family on.

No working man can bring up a family and hope to own a home on the ordinary rate of wages.

The sooner men can be taught that labor is just as much of an asset, and more so, than buildings, the sooner will labor be properly handled.

If the employers of labor have a genuine interest in the improvement of the condition of labor, no conditions that are irksome or distasteful will be placed upon the men.

Our first purpose was substan-

tial justice to our co-workers, without whom we could have accomplished nothing. We had had great success, and in fact we desired no greater success from a mere financial point of view. We did not regard our plan as in any sense a gift or charity, but only the due reward for service.

We never discharge a man from the service of the company until he has been proven utterly unfit from every standpoint. If he fails to make good in one department, the foreman of that department sends him to the "clearing house" and he is given repeated trials in every department until he makes good or it is proven that he does not want to succeed.

We believe it is better, wiser, and more just to make many men comfortable than to make a few very rich.—Ford Times.

### TEST TYPE.

Effects of cheap printing exercises to the use of spectacles are poorly understood and are in fact, in the majority of cases, entirely unknown. It does not pay to buy cheap spectacles. They cause the eyes to grow weak, and cause pain and discomfort and reduce the strength. When it is necessary to hold work or reading matter before the eyes, the eyes are in order to see distinctly it is a sure sign of failing vision, and much improvement and pain will be prevented by getting a pair of glasses made.
