## WHITE RIVER HIGH- WAY COMPLETED

The new grades across White river are about completed, except for some widening to allow for passes. The approach from this side leads north from the I. N. Crabtree place three quarters of a mile to the bluff. That from the Wamic side takes the down hill course one half mile east of Four Corners and south to Rock creek canyon. The fences enclosing the roads are not yet completed, so there are still a few gates to open and close.

The grades are laid out so gradual that you would hardly notice the descent or climb in passing over them. The County Court made a tour of inspection last week and expressed themselves as well pleased with the new highway.

The names of those contributing to the undertaking will appear later.

A farmer of Moro, in company with a party of young men, was here Friday going on to Badger creek for a fishing expedition.

The receipt herewith given was sent from the office of Lou S. Smith, assistant agriculturalist of the O. W. R. & N. Co., and has been put to the test and proven to be destruction to the grasshopper.

Poison Bran Mash: Coarse bran 20 pounds, Paris green 1 pound, lemons chopped fine two or three pounds, molasses or cheap syrup one quart, warm water three gallons.

Mix the bran and Paris green dry in a wash tub. Squeeze the juice of lemons into the water and run fruit through meat chopper. Stir all together thoroughly and wet enough to make a dry mash that will crumble from the hand. Sow broadcast ahead of the hoppers, preferably early in the morning and repeat in two days.

Ten pounds is plenty for an acre. Sown thinly, livestock or even poultry will not get enough to harm them.
