Sixty horsepower. Cost \$2800. Will sell for \$2350. Will give terms. Royce Bros., 220 1/2 10th Street, Portland, Oregon.

**Brief Decisions.**

The man who is in love with himself never has enough love to go around.

Sudden wealth never yet made a man any less a fool than he was before he got it.

A man will never find his right place in life if he thinks somebody else is in it.

The man who is always so sure that he knows a good thing when he sees it is often taken for one himself.

No man ever gets to be so rich that he thinks he would be happier if he didn't have so much money.

The man who can not handle today is no match for tomorrow.—Judge.

**Anything Possible These Days.**

"Impossible!"  
"But I saw it."  
"Impossible—ridiculous!"  
"I tell you it did."  
"And I say it didn't—because it couldn't."  
"I was there and witnessed it."  
"Do you mean to tell me that he was killed by a bolt from a clear sky? Do you expect me to believe such a yarn?" he shouted.

"That's just what I am telling you. A workman on a 20-story building dropped the bolt."—Kansas City Journal.

**Snootal.**

"What is Dubkins, anyhow, pro-ally or pro-German?" asked Hickenlooper.

"Oh, Dubkins is a snootal," said Bilkins.

"Snootal? You mean neutral, don't you?"

"No," said Bilkins. "I mean snootal. Dubkins spends his time turning up his nose at both sides."—New York Times.

**System Wrong.**

Waverley—Chinese brides never see their husbands until the day of the wedding.

Marcella—it is vastly different in this country.

"Yes, indeed."

"In this country the girls see too much of the men before marriage and too little of them afterward."

**Monamobile Oils and Greases**

# Where it is Always Spring

WITHIN two days' journey of Philadelphia lies one of the most remarkable lands in the world. Imagine a land of the simple life, that persists in maintaining its cheerfulness, beauty and youth, and refuses to grow up; a place where it always is spring; where the motor car and the trolley are never seen; but where exists the most delightful kind of civilization, the civilization that makes its way without noise, or haste, a very comfortable sort, in fact, and that is the Bermudas, says the Philadelphia Public Ledger.

When one steps from the steamship at the wharf at Hamilton, one seems to have at the same moment moved into yesterday, and the change is not so violent as one might believe. Nevertheless, it is a change. The absence of tall buildings, the prevalence of white ones, almost all of them of stone, indicates that one has left home behind. It is impossible to find something compatible with the new vision, for there is no place like it in the world.

There is a suggestion of the tropics, but the temperature is most temperate. The winds are of the kind usually referred to as balmy, and to know just what that word means one has to go to these little islands southeast of the Gulf stream.

**Hundred Fair-Sized Islands.**  
It is incorrect to allude to the land as Bermuda, for there is a small archipelago, and collectively the islands are known as the Bermudas. But Americans probably always will refer to it as Bermuda.

The Bermudas consist of about one hundred fair-sized islands, but if one counts all the islets that are visible when the tide is at ebb then, as some industrious geodetic surveyor has left it of record, there are 365. The total land area of the islands is 19 1/2 square miles.

In a general way the main islands are arranged in the form of a fishhook, and the distance from one end to the other is about twenty-five

interest. Bicycles are also used, for the roads are built of the same white coral stone that serves for the buildings, and this makes most admirable roadways. Unfortunately, the roads, as a general rule, are only 20 feet wide, and that was regarded as too narrow to permit automobiles to be used, so there is no use trying to take a motor car to Bermuda, for the machine will not be permitted to be landed.

**Simple, Pleasant Life.**

While there is nothing without interest on the islands to the visitor, it still is the land of the simple life; and not so very simple, either, when one considers that there are two places where one may see moving pictures. There is something progressive about that, but it must be remembered that the total resident population of the islands, and that includes the two towns, although Hamilton, the capital, is called a city, is only about 21,000 persons. The remainder of the population is floating, being augmented upon the arrival of each steamship and likewise being diminished by the departure of every ocean-going vessel.

There are plenty of amusements for the visitor, but they are naturally almost all of them of the outdoor variety. The climate and the general character of the weather rather suggests this kind to the visitor, for while there is no lack of rain in this little land, the porous character of the white coralline roadways absorbs the water as soon as it falls. Just imagine a land where there is no mud to be found on the roads, even after a heavy rain. But this is a fact about the Bermudas. Frost is unknown there.

**Plenty to See and Do.**  
There are bathing, sailing, fishing; the most beautiful lagoons and lakes in the world; rocky coasts, sandy beaches, islands that invite one to visit them; caves, an aquarium, sea gardens, long roads, bordering the sea or lakes; hills rising about two hundred and fifty feet from the sea, cov-

ered with cedars and shrubs; acres of Easter lilies under cultivation, and plantations where the delicious Bermuda onions and potatoes are raised. A long causeway connects the two largest islands, and nearly every variety of beautiful landscape is close at hand.

For so small a place as these islands there is an extraordinary amount of natural wonders. There is a weird old cave whose roof has tumbled in at one time or another, and into which the water of the ocean pours in at low tide, moaning in a most fascinating manner. They call this well, which has been stocked with fish native to these waters, Devil's Hole, on account of the noise the water makes when it enters. It is a natural aquarium, and the fish in it have been looked at by visitors for so long a time that they rather like the experience, and even answer to a call for dinner.

Then, just a few miles outside, specially fitted boats, which have glass windows in their bottoms, take wonder-struck tourists to a fine stretch, where the water is perfectly clear, and the passengers are shown the beautiful coral on this sea floor, like a marine garden of great beauty.

**Houses All of White Rock.**

One of the first things that strikes a visitor from the United States when he catches his first glimpse of the hills of the Bermudas is the spots of white which powder them. As the steamship approaches it is discovered that these almost sparkling white dots are roofs of the houses. To a people accustomed to tin roofs painted red, or to slag house coverings, it requires some time to become reconciled to the sight of white-roofed buildings.

The houses are all, that is all that are found in the two towns—Hamilton, the capital, and St. George, the old capital—constructed of a white coralline stone that is found on the islands. The roofs are whitewashed, with the design, principally, of keeping the drinking water pure.

Transportation in and about the islands is of two kinds, by one-horse victorias and by steam ferries and steamboats, to the various places of

interest. Bicycles are also used, for the roads are built of the same white coral stone that serves for the buildings, and this makes most admirable roadways. Unfortunately, the roads, as a general rule, are only 20 feet wide, and that was regarded as too narrow to permit automobiles to be used, so there is no use trying to take a motor car to Bermuda, for the machine will not be permitted to be landed.

**Cat Saved Soldier's Life.**  
A singular story of an English officer having his life saved by a cat is told by Sir M. Lloyd of Newport, Pembrook, England, the father of the officer in question. Lieutenant Lloyd became detached from his regiment near the French frontier. He found refuge in an outhouse, where he remained in an exhausted condition for three days. When he was found a cat was discovered curled around his neck, and it was the conviction of his rescuers that but for this cat Lieutenant Lloyd would have perished from the cold.

RUBBER TREE IN BERMUUDA

**TAKE PLACE OF MEAT**

PREPARATIONS OF VERMICELLI AND SPAGHETTI.

Housewife Will Find That Both the Family and Visitors Will Appreciate These Dainty and Also Economical Dishes.

**Spaghetti au Gratin.**—Break one-half package of spaghetti into short pieces and cook in two quarts of boiling water for ten or twelve minutes. Drain and blanch in cold water. Melt two tablespoonfuls butter, add the spaghetti, one teaspoonful salt, a little paprika, one cupful of milk and three-fourths cupful grated cheese. Mix and place in baking dish, cover with grated cheese and bake in hot oven half an hour or longer, if wished quite brown.

**Fried Spaghetti.**—Take one-fourth of a pound of spaghetti, throw into salted boiling water and boil ten or twelve minutes; make a stiff batter by adding to the spaghetti one teaspoonful of tomato sauce, a grated onion, salt and pepper to taste, one egg well beaten, flour enough to make into little cakes, and fry on a greased griddle.

**Indian Vermicelli.**—Boil half a pound of vermicelli in a pint of milk until tender; add sugar to taste and a tablespoonful of prepared coconut. When the vermicelli is done and slightly cool pour into a glass dish and garnish with pistachio nuts, blanched and fried, and sultana raisins, seeded. Over the top sprinkle a few pistachio nuts chopped fine.

**Vermicelli Patties.**—Break vermicelli in very small pieces, cook until tender in salted water. Make a cream dressing of two tablespoonfuls of butter, one of flour, and one cup of cream. Cook butter and flour together; when smooth add cream and salt to taste. Put in little patty pans a layer of vermicelli, alternating with the cream. On each layer grate a goodly quantity of cheese. Bake a nice brown.

**Spaghetti With Shredded Codfish.**—Break one-fourth pound spaghetti into boiling water, boil ten or twelve minutes, drain and blanch. Put it into pudding dish, dusting a third of a box of shredded codfish through it; beat two eggs very light, add a cupful of milk, pour this over spaghetti and bake half an hour.

**Tomatoes Stuffed With Spaghetti.**—Break half package of spaghetti into boiling water, boil ten or twelve minutes, drain and blanch in cold water. Select large, firm tomatoes; cut off the tops and scoop out the seeds. Do not peel. After sprinkling the inside of the tomato shells with a very little salt, fill with cold spaghetti chopped, mixing cheese with the spaghetti. Arrange the tomatoes in a pudding dish, replace the tops after strewing cheese on the spaghetti filling; cover and bake one-half hour.

**Nutritious Luncheon.**

Days at home when pressed for time, it is difficult to find something quick and easy for luncheon all too often. Cheese preparations are fine for such occasions and are satisfying. Stale bread, buttered a little and then covered with grated cheese and baked makes an appetizing dish. The cheese-covered bread should be piled up in layers in a baking pan and milk enough to moisten the bread poured into the pan, then the mixture should be placed in a moderate oven to bake.

A plain lettuce salad with a French dressing is a pleasant addition, or a sliced tomato, green peppers or onions may be made into a salad and eaten with the baked dish. Freshly prepared tea and good bread and butter is all else required.

**Pound Cake.**

Cream a half cupful of butter, add one and a half cupfuls of pastry flour once sifted. Beat the yolks of five eggs until thick, add one and a half cupfuls of powdered sugar, gradually, beating constantly. Combine the mixtures and add the whites of five eggs beaten stiff, and one teaspoonful of vanilla. Sift over one teaspoonful of baking powder and beat thoroughly. Turn into a buttered, floured pan, and bake in a moderate oven. Remove from the pan, and cut in fancy shapes. Cover with boiled frosting, garnish with shredded coconut, fruit or rose leaves.

**Nice Sugar Cookies.**

Cream one-half cupful of lard, one-half cupful of butter, one cupful of granulated sugar. Add one cupful of rich sour cream, two unbeaten eggs, four cupfuls of flour mixed and sifted with one teaspoonful of soda and one-half teaspoonful of baking powder. Stir just enough to make a stiff dough; toss on to a lightly floured molding board and knead another cupful of flour into it. Flavor with a little nutmeg, roll out and cut into cookies and bake.

**Keep Teapot Dry.**

When putting away a teapot which will not be used for some time wash and dry it as thoroughly as possible, and then drop into it a lump of sugar. This will absorb any dampness that may be left and so prevent the musty taste which is often noticed in tea made in a pot which has been left unused for some time.

**Laying a Fire.**

In laying a coal fire, place a few large cinders in a grate before laying the paper and wood. This prevents the paper from clogging the bars and insures a current of air through the grate.

**OYSTER SHELLS**

"The Best on the Market."  
Not The Cheap Kind.

**Felt Reasonably Safe.**

A young man dropped into a state of coma and it was several days before he fully recovered. Later he spoke of his experience with a party of his friends.

"Oh, yes," the young man said, in response to a question, "I knew all the time what was going on, and I also knew that I wasn't dead, because my feet were cold and I was hungry."  
"I see," thoughtfully said one of his friends, "but how did that make you think you were still alive?"  
"Well," answered the young man, "I knew that if I were in heaven I wouldn't be hungry, and that if I were anywhere else my feet wouldn't be cold."—Philadelphia Telegraph.

**Appreciating a Philosopher.**

Thackeray's discomforts during his stay in the United States, on which he dwells in his letters to Mrs. Brookfield, was alleviated by some amusing incidents.

After his return he told Carlyle that on one of his journeys the train stopped at Concord. "Then," said Thackeray, "one of the two silent Yankees opposite me said, 'Mr. Emerson I hear, lives in this town.'"  
"Ya-as," was the drawling rejoinder, "and I understand that, in spite of his queer notions, he is a man of considerable property."—London Chronicle.

**Have Healthy, Strong, Beautiful Eyes**  
Oculists and Physicians used Murine Eye Remedy many years before it was offered as a Domestic Eye Medicine. Murine is Still Computed by Our Physicians and guaranteed by them as a Reliable Relief for Eyes that Need Care. Try it in your Eyes and in Baby's Eyes—No Smarting—Just Eye Comfort. Buy Murine of your Druggist—accept no Substitutes, and if interested write for Book of the Eye-Free. **MURINE EYE REMEDY CO., CHICAGO**

**When the Worm Turned.**

"Your Honor," declared Officer McPherson, "I heard an awful yellin' back in the wagon yard, and when I got there this man was beating his wife."

Judge Broyles turned sharply on the prisoner, a tall, gaunt farmer, with clay-colored complexion.

"Is this true? Were you beating your wife, sir?" demanded the judge.

"Yes, yer honor."

"How did you come to do it?"

"Lord knows, judge. For 20 years she allus was th' one what did the beatin', but I jes' happened to catch her when she wasn't feelin' right."—Case and Comment.

**His Recipes.**

"I see," said Bilkins, "that a French scientist has discovered a method for staving off old age."

"Well, what of it?" demanded Wilkins. "There's nothing new in that. A man can stave off old age by jumping off the Eiffel tower, or dropping a lighted match in a powder barrel while sitting on it, or by rocking the boat when he's out on the water, or by riding over Niagara falls sitting astride of a log. Those French scientists make me tired with their hula-baloos over nothing."—Harper's Weekly.

**NEW MODERN DANCING.**

E. Fletcher Hallamore, the leading Dancing Expert and Instructor in New York City, writes: "I have used ALLEN'S FOOT-EASE, the antiseptic powder to be shaken into the shoes, for ten years, and recommend it to all my pupils." It cures and prevents sore feet. Sold by all Drug and Department Stores. Sample FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

**Cause and Effect.**

"Poor Tompkins never gets any credit for what he does."  
"That's the fate of some men."  
"His secretary gets the credit for all the speeches he makes, his wife gets the credit for his manners, and his daughters get the credit for his ability to dance the maxixe."—Baltimore Sun.

**Hereditary Pants.**

An anecdote of a little boy watching a flock of sheep on the screen is told.

"Aunt Mollie, what's those things?"  
"Sheep," his aunt replied. "Sheep's wool is what your pants are made of."  
"Huh! No they're not," Willie snorted. "Mamma made my pants out of Charlie's old ones."

**Comparative Profits.**

First Coal Dealer—How much profit are you making on a ton now?  
Second Coal Dealer—Twenty-five per cent.  
"Why, that's a good deal more than I am making."  
"But you sell to the rich in large lots. I sell to the poor in pailfuls."—Life.

**SPHON'S KIDNEY TEMPER COMPOUND**

SHIPPING FEVER

Influenza, Pink Eye, Epistaxis, Diarrhea and all nose and throat diseases cured, and all others, no matter how "exposed," kept from having any of these diseases with SPHON'S LIQUID DISTEMPER CURE.
