# MILITIA CALLED OUT TO QUELL 5000 IN ANTI-CATHOLIC RIOT

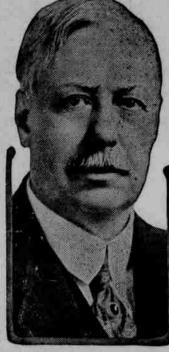

Haverhill, Mass.-The local company of state militia was called upon by Mayor Albert L. Bartlett Tuesday night to assist the police in controlling a crowd of 5000 persons concerned in a riotous demonstration in the vicinity of the city hall. Many windows were

broken by missiles.

The crowd assembled as the result of an attempt to hold the meeting in the city hall for discussion of state aid for sectarian schools. The meeting was regarded as anti-Catholic. Thom. as E. Leyden, of Somerville, who was announced as a former Roman Catholic priest, had been advertised as the speaker. When the hour for the meet- Pershing Now Thought Deceived As ing arrived the crowd in front of the hall was so dense that the police decid-ed that the meeting could not be held and the doors were closed.

For several hours the crowd, increased in size by curious citizens, marched up and down the street shout-

Mixture of Grains Adds Variety to Ration-Give Some Rye in Connection With Corn.

Rye as a feed for hogs ranks slightly below corn. The difference is so small, however, that for all practical FEED FOR GROWING ANIMALS purposes a bushel of rye may be considered as equal to a bushel of corn for fattening hogs.

Since a mixture of grains adds variety to the ration, it is often desirable to feed some rye in connection with corn. It should be ground or if this is not feasible it should be soaked.

Poultry Pointers. Cotton-seed meal mixed with wheat bran and cornmeal in the proper pro- Arenewich, who was held in \$500 ball portions and fed to the flock makes

## Baby Monoplane.

What is undoubtedly the smallest successful monoplane in the world has recently been constructed by a Californian. In addition to this distinction the machine is almost as unusual in design as it is in size, for it is driven tail first by an ordinary seven horsepower, twin-cylinder motorcycle engine. It weighs, complete with its gasoline tank filled, only 238 pounds, has a wing spread of 18 feet, an overall length of 16 feet, and a supporting FEED FOR FATTENING SWINE area of about 90 square feet. motor drives a 41/4-feet propeller at about 1,400 revolutions a minute, giving the craft a speed of nearly miles an hour. The power plant is placed at the extreme rear of the machine, so that its weight is balanced by that of the pilot who rides several feet ahead of it. The machine has been driven a number of times, and during these flights has remained in the air from 15 minutes to half an hour.-Popular Mechanics Magazine.

> Wrong Stocking Stolen. On one of the coldest nights this winter Mrs. Annie Dietz of 115 Mechanics street prudently wore woolen sleeping hose when she went to bed. Testifying in court against Michael

on the charge of burglary and attempted theft from person, Mrs. Dietz said: "As I was placing a roll of \$400 in my stocking I heard a slight noise, and looking out thought I saw this man stepping back from my bedroom win-The next I knew I was awaka comfortable house in which to work ened by feeling one of my stockings being pulled off. Before I could turn on a light the intruder jumped through the window and disappeared with my

left stocking." The chief reason why Arenewich was charged merely with attempted theft was that Mrs. Dietz put the money in her right stocking.—Hartford (Conn.) Dispatch to New York World.

### May Be Valuable Find.

Workmen digging in the bay of Guanabara, at Rio de Janeiro, recently brought up a quantity of pure phosrhorus. Acting on the belief that a deposit of value had been tapped, the government was advised of the discovery and it has ordered an investigation to determine the probable size and value of the body of mineral
