WHEM FOR MAKING MONEY

ing Bacheller, Head of Newspaper syndicate, Would Buy Up All Great Auk Eggs in Existence.

When Irving Bacheller was running newspaper syndicate and publishing juvenile magazine in New York he says sat in a large porch rocking in before a fat desk so heaped with papers that every few minutes a little stately avalanche would shoot in from it to the floor. One day on Lowell, the artist, who was a ner in the magazine, found him in more than usually meditating mood, said to him.

What's the matter, Irving; got an "e-s," answered Bacheller, very "ly," a big one. One that will be us all rich. You know the great is extinct, and that there are only of its eggs in existence. They worth thousands of dollars apiece, a great auk itself would be price. My notion is to get these eggs hatch "em."

But how will you hatch them?" d Lowell.

"I haven't given that point thought yet. But it's a mere de-a mere detail. The plan is to succeed. And it will make all rich."—Woman's Home Com.

The Practice.

I have no sympathy with these incipitated women who want to t the word "obey" from the marriage service, and put themselves on equality with men.

Fen, I believe with you, Mrs. Snap, c a man should be the master in own house. By the way, my husband was disappointed that yours did join his poker club. Why didn't Oh, he wanted to badly, but I didn't let him."

Poor Listener.

What was the lecturer's subject?" From the Cradle to the Grave." zered Mr. Dubwaite, who escorted Dubwaite to the hall under comon."

"Was the address worth hearing?" "I can't say. I fell asleep during the "cradle" part, and when I woke up the lecturer had just spoken the final words in the cemetery."

Woman's Way.

"I must say it's hard to give you up," said the disappointed suitor. "Well, if it will make the parting any easier for you, I'll introduce you to a friend of mine who will help you to forget me."

"You are very kind."

"But, on second thought, I won't. If the did that I would never forgive her."

KEEPING HIS WORD.

"I was rather surprised when the doctor told me not to give baby any blue milk."

Not Baby's Color.

"Why?" "Of course, baby is a brunette, and blue is not her color. But I didn't suppose that musty old doctors know about such things."—Louisville Courier-Journal.

Then the Fight Started.

"I don't see why you are so down on Jones."

Or Buy Swordfish.

"Hemlock is a pacifist, isn't he?" "Hemlock? Why, he wouldn't let his wife have cartridge paper on their dining room wall."—Boston Transcript.

Its Status.

"Did Bibbs give his wife her new car voluntarily?" "I rather think it was a case of auto suggestion."—Baltimore American.

CAP and BELLS

Huge Sums Spent for Chewing Gum.

Washington, D. C.—The chewing-gum habit has cost the American people for chicle alone nearly \$35,000,000 in the last ten years, or almost five times as much as we paid Russia for Alaska, according to figures furnished by the Bureau of Foreign and Domestic Commerce, of the Department of Commerce. Normally our annual imports of chicle amount to 7,000,000 pounds, for which we pay about \$2,500,000 in the countries of origin, and to which must be added customs duties in our own ports of about \$750,000. Imports of chicle gum during the fiscal year 1915 were as follows: From Mexico, 2,197,000 pounds; from Canada, 2,181,000 pounds; from British Honduras, 1,139,000 pounds; from Venezuela, 952,000 pounds; from the Central American republics, 26,000 pounds; from all other countries, 5,000 pounds. Chicle is not produced in Canada, but large quantities from other British possessions are handled through the Dominion. In 1913 the total imports of the gum amounted to 12,753,000 pounds, and that is the record importation for any one year. In 1915 the total was 6,500,000 pounds. Chicle is the dried milky juice of the sapodilla tree, which is one of a large family of tropical trees known as bully-trees. Some of the gum is used as a substitute for gutta serena, but the bulk of it is used in the manufacture of chewing gum.

Easy.

"I suppose you'll soon be planting your vegetable garden."

How to stop dandruff and loss of hair with Resinol

Here is a simple, inexpensive treatment that will generally stop dandruff and scalp itching, and keep the hair thick, live and lustrous:

At night, spread the hair apart and rub a little Resinol Ointment into the scalp gently, with the tip of the finger. Repeat this until the whole scalp has been treated. Next morning, shampoo thoroughly with Resinol Soap and hot water. Then the creamy Resinol lather will into the scalp. Rinse with gradually cooler water, the last water being cold. All druggists sell Resinol Soap and Ointment.

START FIRE WHILE IN BED

With This Electrical Contrivance You Do Not Have to Get Up on a Cold Morning.

The electric fire starter illustrated here makes it unnecessary to get up on a cold morning to light the grate. All that is required is a spark coil of any size, enough batteries to operate the coil, an alarm clock, a battery switch, a box eight by three inches, a tin pan, two cork stoppers and two needles. The stoppers are fastened to the bottom of the pan and the needles stuck through the corks, making a

spark gap. The gap is connected to the coil and set under the grate. Some rags are bundled up tight and soaked in gasoline or turpentine and put just under the gap. Over the rags are placed some splinters, and then wood and coal.

The alarm clock is wound and set and a loop put in a string over the alarm thumbscrew on the back of the clock. The other end is attached to a small switch coming from the batteries. The other wire from the batteries goes to the spark coil, and the opposite end of the switch connects to the coil. When the clock goes off the thumbscrew will revolve, close the switch and start the coil. The spark will light the rags under the grate and start the fire.—Electrical Experiment.

"Facilis Decensus Avernii."

It would be easier to teach a dog to bark Esperanto than to stop folks from dancing. Nevertheless, why must they dance to music which many persons believe was written for lottier purposes?

Ladies who were at ten in one of our fashionable hotels the other afternoon tell me they were somewhat shocked to see a roomful of people frothing to the strains of "My Country, 'Tis of Thee."

"I am not a crank," says one of the fair objectors, "only patriotic." Who knows? Perhaps the day is near when we may put religious as well as patriotic sentiment in camp, while we serenely two-step out of church to the strains of a lofty recession.—From Girard's "Topics of the Town" in the Philadelphia Public Ledger.

New Form of Tetanus.

A latent form of tetanus, hitherto practically unknown, was recently described to the Academy of Sciences, Paris, according to observations made by Doctor Bazy, who has been studying it.

It appears from thirty to fifty days after the patient has been wounded, irrespective of the fact whether a precautionary injection of serum has been given or not and without apparent cause, although it is more frequent after an operation or a fresh outbreak of inflammation in the wound.

The mortality is unusually high, averaging from one-third to a half of the cases observed. Doctor Bazy concludes that the first injection when the wound has been dressed is insufficient and that the injections should be repeated every week.

The Man With No Initials.

Playgoers everywhere will regret to hear that that fine actor, Mr. Charles Hawtry, has had heavy financial losses owing to the war.

Mr. Hawtry can be as humorous off the stage as he is on it. On one occasion he was talking to a friend about peculiar names and initials.

"By the way," he said, "I have a friend who is in a most unfortunate position. He actually has no initials."

"No initials?" exclaimed his friend in amazement. "Why, how can that be? Hasn't he got any name?"

"Oh, yes," answered Mr. Hawtry, with a twinkle in his eye. "But you see, each of his names begins with an aspirate and, being cockney, he always drops his h's."—Redman's.

Wood Pigeons a Nuisance.

Wood pigeons have recently caused a great deal of damage to crops in Wiltshire, England, and the stewartary and farmers have organized a campaign against them. So large has been the increase of these birds that the depreations on the crops has become serious. It has been arranged by the stewartary committee on food production to observe five Saturdays as pigeon-shooting days. The arrangements are in the hands of parish committees and to all proprietors of the county, the request is made to instruct their game keepers to co-operate with the parish committee, and to allow their woods and lands to be entered, so that the best positions for shooting may be occupied.—London Mail.

Salts Birds' Tails; Killed.

A four-year-old boy, Bernard Weinert, was killed in his childish effort to prove the truth of the old adage that one can easily capture birds by putting salt on their tails.

The boy and his mother stood on the curb at American and Poplar streets waiting for some vehicles to pass.

Save Money on Your Stump Blasting—

The explosives that get stumps out cleanest and cheapest are those that have a heaving and lifting effect, shattering the stumps just enough to break them up. Then you can handle them easily.

"The farmer," says an Experiment Station, "should use an explosive that stands all ordinary shocks of handling and does not easily freeze. He does not need the expensive nitro-glycerine explosives." Thousands use

GIANT FARM POWDERS

STUMPING—AGRICULTURAL

and save money because they go further than others. They are made especially to suit Western farm conditions.

Giant Farm Powders—the product of the oldest manufacturer of high explosives in the United States—are the only genuine "giant powders" for agricultural use. They are made in two brands—Giant Stumping Powder, ideal for blasting in wet ground; and Eureka Stumping Powder, the money-saving, low-freezing explosive for blasting stumps in dry soil.

Ask your dealer for Giant Powders and blasting supplies. If he does not have them we shall see that you are supplied.
