SENT IN BY OUR CORRESPONDENTS

Tygh Valley I

Are you all coming to the picnic Friday? You shall have a good time with plenty of entertainment; there will be the program basket dinner, ball game, enough to fill the day time at the fair grounds; then there will be a play at the I. O. O. F. hall and a dance in the Hi Jinks hall at night.

A gentle little snow storm visited us Tuesday morning; in the hills it lay on the ground a while, but melted as fast as it fell in the valley.

The new road has been opened up on Tygh grade.

Miss Pearl Stillwell was home visiting her parents Sunday, her sister, Miss Bertha, taking her back to Kingsley, Monday.

Mit Morris and wife and Wm McAtee motored to The Dalles Monday.

J. T. Harper, G. R. Burtner and R. Weisback returned Monday from a tour of Harney county. They started to J. T.'s ranch but he took a sick spell and they returned before reaching the ranch, all highly pleased with their trip.

C. S. and R. W. McCorkle and families were calling on Wm. McCorkles Tuesday.

Geo. Foster is moving on the Kellogg place.

Base Ball Notes

Last Sunday Maupin defeated Wamic on the Maupin diamond by a score of 10 to 1. Owing to the cold, disagreeable weather as well as other ill features of the game, it was not as interesting to the spectators as it should have been. However, with some adjustment in the Maupin Club, next Sunday's game at Maupin with Moro, who have some of the best players in Sherman county, promises to be a closely contested one from start to finish.

Schedule for future games are as follows:

May 14 Maupin vs. Moro at Maupin.

May 21 Maupin vs. Gateway at Gateway.

A second base ball team for Maupin has been organized as follows: Ora Buzan, p; Walter Scott, c; Clyde Williams, 1b; John Mead, 2b; Louis Emmons, 3b; Andrew Cunningham, ss; Ray Smith, rf; Dave Rothwell, cf; George Cunningham, lf. A game with the Tygh team was played at that place Sunday, which is said to be one of the best of the season, the ninth inning closing with a tie 3 to 3, raising to 4 to 5 in favor of Tygh in the tenth. The local 2nds will play the Pick-ups at Wapinitia next Sunday and the following Sunday a return game with Tygh at this place.

Philip McCorkle has been hauling lumber to the fair grounds this week.

Inland Empire Farmers Vote Bulk System in Handling Crop

Ambition is to Make New Plan Operative This Year by Discarding Sacks

Spokane, Wn., May 7, 1916—About 300 farmers of the Inland Empire assembled in the Spokane Chamber of Commerce Assembly rooms yesterday, and with only five opposing votes decided to handle their grain in bulk instead of sacks.

Committee Recommendations on Wheat Handling

We believe that a successful system of handling grain in bulk, depends upon the farmer providing his own storage on the farm, either by bins, granaries, or farm elevators, where grain may be held until sold.

It has been fully demonstrated that the present flat warehouse can be successfully adapted, at comparatively small expense, to handling grain bulk.

Full assurance has been given by the railway officials and terminal warehouses that they will meet farmers and interior warehouse men in arranging for the full handling of grain in bulk.

In answer to the argument that grain must be sacked for exportation to the Pacific coast, authentic reports show that less than 25 per cent of the grain from the Northwest is exported annually, and the Panama canal has removed the necessity of sacking the greater part of the small per centage of the crop that is exported.

The grain prices in the world's market are quoted on a bulk basis, therefore there will be no difference in the price of bulk grain or sacked grain when the bulk system prevails throughout this territory.

Since it is practically the unanimous opinion of the 300 grain growers at this convention that a change be made in the Inland Empire from sacked grain to bulk grain, we therefore urge the necessity of immediate action by the individual farmer and the interior warehouse companies to provide the necessary equipment

for handling the 1916 crop in bulk. United action on the part of the farmers is essential to the success of bulk handling of grain.

Dr. Hatfield arrived in Maupin Wednesday evening, having made the trip from Seattle to The Dalles Tuesday. Mrs. Hatfield will come in a few weeks after a visit with relatives in Idaho.

HEAVIEST KNOWN IN THIS SECTION

Damage on Fruit

Wednesday night Maupin and Tygh Valley vicinities suffered the worst damage from frost ever known in this section at this time of year. Bonney, McAtee, Morgensen and others of Tygh report their fruits and some vegetables almost completely killed. G. W. Vanderpool's beautiful fruit and garden outlay has met the same fate, while the orchards of R. Johnson on the bench north of Maupin, are not noticeably injured, although potatoes were touched to some extent.

Contract Awarded

The local Tum-A-Lum people have been awarded the contract for the construction of a wood crib grain elevator capacity of 100,000 bushels for the Hunts Ferry Warehouse company, to be completed by the first of August. They have been awarded contracts for several other like elevators in different sections.

Third Room for High

The third room of the local school building will be finished up this summer and furnished for a high school department of the Maupin school this coming year. Mrs. Wallace Kellogg will have charge of the high school work, which will be represented by a goodly number of young people who have completed the grammar grade work. September 4 is the date set for opening the schools here this fall.

J. H. Chastain and wife drove in last Friday in their handsome new Ford just purchased of E. J. Sears, Roebuck & Co., who are having much opposition by local merchants.

Have you ever lost a crop of hay through rusting—or your barn and hay through spontaneous combustion?

There is one sure way to prevent this—

USE SALT when you stack your hay IT PAYS

The Salt more than pays for itself in the weight of the hay. There is a further gain in weight through moisture held—and the stock will eat up salted hay clean where unsalted hay will be mused over and wasted.

20 pounds of salt should be used to each ton of hay. Stack three feet of hay, sprinkle the salt over this by hand. Then another layer of hay, more salt, and so on.

Experiments carried out at the Wisconsin experiment station indicate that salt should be supplied to dairy cows unless the ration furnishes a sufficiency thereof. It is calculated that the minimum quantity in the food to keep a cow of 1000 lb. live weight in flourishing health is that which is equivalent to 3-4 oz. salt per day, and that a cow in milk needs as much more as will restore the proportion removed in the milk, namely, a little over 1-2 oz. of salt for every 20 lb. of milk.
