## Bulletin No. 1

# A Mistake in the Policy of the Bethlehem Steel Company

To the People:

The Senate of the United States has passed a bill to spend \$11,000,000 of the People's money to build a government armor plant. The measure is now before the House of Representatives.

It is said that manufacturers of armor have "gouged" the country in the past, and that a government plant is necessary to secure armor more cheaply.

The mistake of the Bethlehem Steel Company has been that it has kept quiet.

We have allowed irresponsible assertions to be made for so long without denial, that many people now believe them to be proven facts.

We shall make the mistake of silence no longer.

Henceforth we shall pursue a policy of publicity. Misinformation will not be permitted to go uncorrected.

It is and has been the policy of our Company to deal with the American Government fairly and squarely.

We shall henceforth place the details of our relations with the Government before the American People.

The United States has for twenty years obtained the highest grade of armor and has paid a lower price for it than has any other great naval power.

Figures officially compiled for the Senate Committee on Naval Affairs from the Naval Year-Book show that under conditions prevailing just before the European war, the chief naval powers of the world were paying these prices for armor:

England, \$503 per ton; France, \$460; Germany, \$490; Japan, \$490; UNITED STATES, \$425.

A government plant cannot make armor any cheaper than we can do it; and—

We are prepared to manufacture armor at any price which the Government itself shall name as fair. THAT BEING SO, SHOULD \$11,000,000 OF THE PEOPLE'S MONEY BE WASTED TO BUILD A GOVERNMENT PLANT?

CHAS. M. SCHWAB, Chairman  
EUGENE G. GRACE, President

Bethlehem Steel Company

Have you ever lost a crop of hay through rusting—or your barn and hay through spontaneous combustion? There is one sure way to prevent this—

**USE SALT**  
When you stack your hay IT PAYS

The salt more than pays for itself in the weight of the hay. There is a further gain in weight through moisture held—and the stock will eat up salted hay clean where unsalted hay will be trampled over and wasted.

20 pounds of salt should be used to each ton of hay. Stack three feet of hay, sprinkle the salt over this by hand. Then another layer of hay, more salt, and so on.

Experiments carried out at the Wisconsin experiment station indicate that salt should be supplied to dairy cows unless the ration furnishes a sufficient quantity thereof. It is calculated that the minimum quantity in the food to keep a cow of 1000 lb. live weight in flourishing health is that which is equivalent to 2.4 oz. salt per day, and that a cow in milk needs as much more as will restore the proportion removed in the milk, namely, a little over 1.2 oz. of salt for every 20 lb. of milk.

**Cement Work Started**

Actual construction on the warehouse elevator has commenced. Tuesday three men with teams and slips were working as harmoniously as clock work on the excavations, and were making quite a showing. A car of lumber has been unloaded and the preparations for the concrete foundation forms are being made by trenches two feet wide and four feet apart laid with 1 foot of cement on which the forms will be built and the cement walls filled in them. The foundation will be of ample proportions to stand the immense weight of grain which will be put on it.

**Base Ball Notes**

The game between the Maupin baseball boys and the Dufur team Sunday, was exceptionally good, the final score being 4 to 6 in favor of the visitors, who played a clean game winning on the merits of their playing.

The locals will play a return game at Dufur Sunday.

The Babes played at Tygh last Sunday losing the game 8 to 0, but in comparing the score card later it recorded 9 tallies for each team.

They will play at Wapinitia next Sunday.

Mr. and Mrs. W. T. Vanderpool returned to their home in Dufur Tuesday.

Wed Smith returned to his home in Dufur Tuesday.

**Criterion**

B. D. Appling is suffering an attack of bilious fever.

T. O. Miller has returned to his homestead near Shaniko.

We can't understand why the people of Maupin and points north will continue to travel 75 miles to get to Gateway when they could reach it by a 32 mile trip. All that is needed is some pressure brought to bear on the good roads across Criterion and the county court to have a direct road opened between Maupin and Gateway, at about one-half the distance now traveled.

The weather continues rather cold for garden truck but the grain and grass are looking fine.

Quite a number from here attended court last week.

We might write down the name of each man in the community, but all the news item we could put after it would be 'busy working.' Now that wouldn't make very interesting reading for the average person, but it looks good to the merchant or banker for they know that the man who is at work generally has some money to spend.

**Wamic News**

Drummers visited this place Tuesday.

Willis, Vard and Vernie Noval went to the Deschutes river Thursday to fish for salmon trout, but were unsuccessful.

Belvis Patison went to Sherar Friday.

Cleve Fowler returned a week ago Saturday from Vancouver, B. C. where he was called by the death of his brother Stephen.

Harvey Dyer, J. E. Woodcock and M. Peterson, with a car loaned by Dyer, left for Astoria Tuesday.
