## Local Items

Little Estel Stovall had a serious fall a week ago while swinging between two counters in the drug store. His hold loosened, letting him skid his nose on the floor till the skin was removed. His father immediately treated the wound and the little fellow looks little the worse for the experience.

A party from Portland driving with poor lights Saturday night met a team about five miles this side of Shaniko, and in passing them went over the edge of an embankment, the car turning turtle, pinning the two men underneath. The parties with the team raised the car and released the victims who were unhurt except for a few scratches. The car was not materially injured except for top and windshield which did not add to its appearance on arrival here a little later.

The Maupin Times is taking over the equipment of the Lyle Washingtonian, an almost new printing plant valued at \$1000. When this is installed the Times will be the best equipped printing establishment between The Dalles and Bend. This will enable us to get out a better newspaper and make it possible to produce a superior class of printing than we have yet produced in Maupin.

A. R. Chase and Mr. Marice who are working in the interest of the boys' and girls' industrial club work gave a stereopticon lecture in the school house Wednesday night which was well worth the time spent.

J. W. Derthick has taken a homestead near Criterion.

## How to Get the Most Barn Value for Your Money

Yes, our business is selling lumber BUT—satisfaction to the buyer must go with every bill we sell or WE are not satisfied.

We know that if you are building a barn and you want and expect that barn to be the best in every respect that the money you put into it can produce.

And we make it our business to see that every barn bill we sell shall be satisfactory in every detail so far as material, cost and quality are concerned, and we sometimes go a long ways to make good on that policy.

It will be well worth your while to bring us your bill, or come to us when you first decide to build—we will help you from start to finish.

We have planned many barns this fall for our customers—small shed roof barns, one story dairy barns—circle roof barns with special Tum-A-Lum construction—large gambrel roof barns—and can show you plans, pictures and costs of various types.

No obligation—we'll be glad to do it.

"See Peter Kilburg about it!"
