## Play Was Fine

The play given in Shattuck's opera house Saturday evening was the largest attended event of the season. The Hand of the Law is a larger play than is usually put on by amateurs, but was very capably presented, each one handling their parts so well that personal characteristics were covered by the actor's part in the play. The orchestra and the girls' Glee Club added very pleasing features.

Mabel and Willie Aldridge returned home from Portland Monday.

## Let These Washington and Oregon Battleships Protect Your Prosperity

How will you handle your grain this year? Bulk Grain is here! Southern Idaho built approximately 50 elevators, Eastern Washington and Oregon about 50 last year; it is authoritatively stated that 150 elevators will be built in the Columbia river basin this year.

We are now planning and building elevators in Eastern Washington and Oregon. Portland plant new million bushel elevator!

Astoria will double capacity of elevator. Seattle recently completed million bushel elevators at docks. Spokane farmers' meeting of last year almost unanimously voted for bulk grain. Oregon Agricultural College meeting endorses bulk grain system. Every Saturday brings the word of some farmers meeting to adopt bulk grain handling. At Pendleton meeting, N. B. Atkinson of Wasco County, Ore., told of farmers building elevators and paying for them with sack money the first year.

**BULK GRAIN IS HERE—MAKE MONEY IN 1917!**

Sacks are out of date. Handling in bulk saves 2c to 3c per bushel. And this saving is made above the cost of installing granaries (as shown above) Bulk handling insures getting all the profit, and reduces the labor very materially.

Act now—Come in today—Look over our many designs—Ask how you can equip your farm for handling bulk grain—By using the money you would pay for sacks for one year—After that you save money every year.

## Tong-Lok Grain Bin

1500 bu. \$140 2000 bu. \$165

Most practical bin on the market, made of yard seasoned wood—all cut to exact sizes grooved and tongued—easy to erect, no "expert" help required—put up in less than a day. Perfect storage under all conditions. Better than metal and far lower in cost. Metal bins sweat and rot contents. They warp and bulge and are easily damaged, and terribly expensive.
