Behnke-Walker Business College, Portland, Ore., largest in Northwest, trains you in all business courses. Enroll any time. Free Catalog.

A FIGHT FOR LIFE

It has been fight or die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's called "An-u-ric." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as Bright's disease, diabetes or stone in the bladder.

To overcome these distressing conditions take plenty of exercise in the open air, eat heavy meat diet, drink plenty of water and at each meal take Dr. Pierce's Anuric Tablets (double strength). You will, in a short time, find that you are one of the first sufferers of Anuric, and the friends of nervousness.

Step into the drug store and ask for Anuric, or send Dr. V. M. Pierce, Buffalo, N. Y., 10c for trial pkg. Anuric, many times more potent than lithia, eliminates uric acid as hot water melts sugar.—Adv.

Mostly Talk.

"Getting up betimes and enjoying the early morning is delightful these days."

"Yes; I often talk about doing it."

So the Nurse Was Fired.

Her husband had just come home and had his first meeting with the new nurse who was remarkably pretty.

"She is sensible and scientific, too," urged the fond mother, "and says she will allow no one to kiss baby while she is near."

"No one will want to," replied the husband, "while she is near."—Exchange.

Then and Now.

"Does your grocer attempt to explain high prices?"

"He did at first. Now he merely shudders as he accepts the money, and I groan."—Louisville Courier-Journal.

Distrusted the Promise.

"Why so sad and downcast?"

"My wife has threatened to leave me."

"Cheer up. Women are always like that, but they hardly ever do it."

"That's what I was thinking."—Exchange.

Captured Seventeen Ships.

Captain Smith learned that while cruising in the Atlantic 13 ships, valued by the Germans at 80,000,000 marks, were captured and four in the Pacific.

MEAT Drippings Make Fine Soap

Making soap from the drippings of meat is the practical war work of Mrs. O. O. Van den Berg of Washington, who is shown at her desk in the uniform of the United States food administration. The drippings are saved until six pounds are accumulated. This, with one can of lye, will make 15 cakes of hard soap, delightful for the bath and excellent for washing fine fabrics or lace.

TELLS EXPLOITS OF THE SEEADLER

Navy Department Gets the Story
From Captain of an American Schooner.

WRECKED ON CORAL REEF

Seventeen Ships Captured by German
Raider in Spectacular Cruises In
Two Oceans—Hoodwinks British by Clever Ruse.

Washington.—The full story of the cruise of the German commerce raider Seeadler has been obtained by the navy department from Capt. Haldor Smith of the American schooner R. C. Slade and three other mariners, who landed at Tutuila in an open boat September 29 after being marooned on Mopeha Island by the master of the Seeadler when the raider grounded and was abandoned.

The Seeadler, formerly the American ship Pass of Balmoral, was captured by a German submarine and sent to Bremen and fitted out as a raider. A picked crew was placed aboard, some of whom spoke Norwegian, and sent out into the Atlantic under the guidance of a Norwegian ship.

The ruse worked so well that after leaving Bremen on December 21, 1916, the Seeadler was held up by the British auxiliary cruiser Highland Scout, and passed.

Captain Smith said the raider was a full-rigged ship of steel or iron, about 2,300 tons, propelled by oil

of his ship, the Slade, Captain Smith said:

"I left Sydney on April 24, 1917, and proceeded without any incident until the evening of June 17, when the second mate reported to me that a ship was firing on us. She was about eight miles off. There was a heavy squall starting eastward—wind favorable to this time, and I thought it possible to get away and kept holding on. But she kept firing on me at intervals of about five to ten minutes and was coming up on me fast.

"I concluded that there wasn't any use and I lowered down spanker, clewed down topsail, hoisted the American flag, and hoisted. Shortly after the prize officer came aboard and a doctor and about ten men. These officers were in uniform. They told me to leave the ship and to go on board the raider and they would give me time in the morning to pack my clothes.

"They took all our men aboard the raider except the cook. Next morning I went back on board with all my men and packed up. We left the ship with our belongings on June 18. We were put on board the raider again.

Shortly after I saw from the raider that they cut holes in the masts and placed dynamite bombs in each mast and put fire to both ends of the ship and left her."

Captain Smith said the raider was

a full-rigged ship of steel or iron,

about 2,300 tons, propelled by oil

profusely complimenting the proprietor for the splendid "Java."

One of the guests, claiming to be an expert connoisseur, had taken the third cup.

Professor Vincent Conquers the Most Dangerous Enemy of the Republic.

HELPS INCREASE MAN POWER

In Former Wars More Soldiers Perished From This Disease Than By Bullets—Fever Has Vanished From Belfort District.

Paris.—One of France's most dangerous enemies has now been vanquished—typhoid fever, and the victor is Professor Vincent, an officer of one of the French medical schools.

The war has shown that the most deadly of fevers is at the mercy of science. Typhoid fever was always a great enemy of armies in the field. It has been established that in wars previous to the present one more men died of typhoid than by bullets and shells.

Typhoid Epidemic Started.

At the start of the present struggle a typhoid epidemic started in October, 1914, and increased through the winter of 1914-1915.

Professor Vincent set out to stop the epidemic by using a vaccine which he had discovered four or five years previously.

Already, from 1911 to 1914, most of the French soldiers under arms had been vaccinated. But the mobilization men arrived in different depots in hundreds of thousands.

Doctor Landouzy, head of the medical service in the Belfort district, had 100,000 men vaccinated. Three months later typhoid fever had entirely disappeared from his district, and it was proved that only in districts where men had not been vaccinated was typhoid to be feared.

Number of Deaths Smaller.

At present vaccination is obligatory everywhere, and, thanks to this, the number of typhoid cases dropped from seven in January, 1915, to 0.25 in March, 1917.

burning engines. Her captain was Felix Graf von Luckner.

When the men from the Slade arrived aboard the raider they found many prisoners from the American schooner A. B. Johnson of San Francisco, captured three days before. On July 8, Smith stated, the schooner Manila was captured and dynamited after it was captured and dynamited.

For about three weeks the raider kept beating up and down looking for passing ships. Meeting none, they went south to Mopeha on July 31, anchored on the lee side of the island, and on August 2 the ship was driven hard and fast ashore. After working all afternoon they gave her up as lost and took ashore everything they could move, including the boats, gear and wireless. The wireless plant, a very powerful one, was set up between two coconut trees.

On August 23, Captain Smith related, the German officers fitted up and armed a small boat and started for the Cook Islands or the Fiji Islands, where they hoped to capture an American ship and come back for the crew. Count von Luckner, the master, was in charge. They were never heard of again at Mopeha Island.

On September 5 a French trading schooner from Papeete, the Lutece, put in at the island. First Lieutenant Kling took a motor boat and machine gun and captured the ship. She had a large cargo of flour, salmon and beef and a supply of water. Kling and his crew dismantled the wireless plant and left the island in the Lutece that night, leaving 48 souls, including the Americans.

A small boat had been left behind, and the marooned men fitted it up. The captain of the Manila, with a small crew, started out in the boat for Tahiti on September 8. They failed to reach Tahiti and returned exhausted on September 16. Captain Smith, with three men, took the small boat and managed to reach Pago Pago ten days later.

Recent dispatches indicate that the captain of the Seeadler and five of his crew were captured on September 21 of the Fiji Islands by Fijian constabulary. What became of the men who left Mopeha Island in the Lutece is not known.

British Get Honor Stripes.

London.—British soldiers who have served in the great war will henceforth bear a distinctive mark of their service on their uniform. The war office announces that a chevron stripe will be immediately issued to every soldier who serves overseas in a theater of war. Soldiers whose service dates back to 1914 will be given a red chevron, and those whose service began after that year will get a blue stripe. An additional blue stripe will be awarded for each aggregate of 12 months' service. The new stripes will be worn by officers as well as privates.

Coffee From Velvet Beans.

Quintin, Ga.—The velvet bean, so abundantly grown in the South, is being put to an entirely new use in this section and is no longer classified as a stock food exclusively. A hotel started the movement by the announcement to a large number of traveling salesmen that the coffee served was made from velvet beans. The coffee was profusely complimenting the proprietor for the splendid "Java." One of the guests, claiming to be an expert connoisseur, had taken the third cup.

As Br'er William Sees It.

You never know when you is happy till you is clair out er happy land, an den you ain't got time nuff left ter kick yo'se'f not knowin' it at de right time.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

Unusual.

See anything unusual on your trip?"

"Yes. At one of the places where I stopped I found a ticket agent who didn't seem annoyed when I asked for a ticket."—Detroit Free Press.

The Difference

"What's the difference between a drama and a melodrama?"

"Well, in a drama the heroine merely throws the villain over. In a melodrama she throws him over a cliff."

Judge.

Between Two Fires.

"I educated one of my boys to be a doctor and the other to be a lawyer," said Farmer Cornet.

"You should be very proud of them," announced the visitor. "That seems like an excellent arrangement."

"I don't know about that," replied the aged agriculturist. "It looks as though it was a-going to break up the family. I got run into by a locomotive and one of 'em wants me to go lame so he can sue for damages."—Leslie's Home Journal.

Revised.

"Eat, drink and be merry."

"That used to go, but nowadays we say it differently."

"What is it now?"

"Be merry, tho you cannot afford either to eat or drink."—Exchange.
