Telephone Directory

The Times office has been very busy this week working on the telephone directory for Maupin. This is our knowledge at least, the first directory for this end of the county. It contains the names of all patrons of the local switchboard arranged alphabetically, and opposite each name is line number with which the phone is connected and the call signatures in figures. This system is used practically everywhere and the local operators have needed it to render proper service for some time. The booklet consists of twelve pages and is a very necessary personal, and contains a number of advertisements contributed by live local business people.
