**Shad Easily Taken.**  
The habits of the shad lend themselves admirably to the extermination of the fish. They approach the shores in immense schools, actually crowding one another in their efforts to reach the head of the fresh-water streams, where the spawn is deposited. Fishermen learned quickly how to intercept the run by nets in the bays and in the broad mouths of rivers, and the marketable shad are now nearly all caught in this way.

**Attila's Hoard Never Found.**  
Alaric the Goth plundered Rome and got together a vast amount of treasure. When he died, the legends relate, this loot was buried with him at the bottom of the Susento river, and all the captive slaves who were forced to build his tomb were slain, so that the Romans might never find his resting place. The rich spoils of Attila, the story runs, were buried in a cave. Neither hoard has ever been discovered.

**Suspicious.**  
The professor regarded, with an eye of suspicion, the small, yellow cube the waiter had brought him. "I take thee," he murmured, "for butter—of worse."—Boston Transcript.

**It Works! Try It**  
Tells how to loosen a sore, tender corn so it lifts out without pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness. This drug is called freezezone and is a compound of ether discovered by a Cincinnati man.  
Ask at any drug store for a small bottle of freezezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.  
Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers.  
This drug freezezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.  
Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezezone have him order it for you.—Adv.

**PISO'S**  
Halt Sand Drifts With Grass Tufts.  
Sand is used for railroad embankments in many parts of Holland, but much repair to the roadbed was made necessary by the fact that the freshly piled sand drifted during the high winds. To prevent this, tufts of coarse grass have been planted along the slopes, and as the roots spread, a well-sodded bank is formed.—Popular Mechanics Magazine.

**New Detachable Handle.**  
In the belief that a thief will be less likely to steal hand baggage that has no handle upon it, an inventor has patented a detachable handle for suit cases.

Be not hasty to cast off every aspiration that is cast on you. Let them alone for a while and then, like mud on your clothes, they will rub off of themselves.—Murray.

**in Boston.**  
"Where can I get a New England bottled dinner?" "Never heard of it mister. You can get good goulash over yonder, and here's a chop-suey joint."—Philadelphia Bulletin.

**The Farmer Receives More Than Five Thousand Dollars a Minute From Swift & Company**

This amount is paid to the farmer for live stock, by Swift & Company alone, during the trading hours of every business day.

All this money is paid to the farmer through the open market in competition with large and small packers, shippers, speculators and dealers.

The armer, feeder, or shipper receives every cent of this money (\$300,000 an hour, nearly \$2,000, 00 a day, \$11,500,000 a week) in cash, on the spot, as soon as the stock he has just sold is weighed up.

Some of the money paid to the farmer during a single day comes back to the company in a month from sale of products; much does not come back for sixty or ninety days or more. But the next day Swift & Company, to meet the demands made by its customers, must pay out another \$2,000,000 or so, and at the present high price levels keeps over \$250,000,000 continuously tied up in goods on the way to market and in bills owed to the company.

This gives an idea of the volume of the Swift & Company business and the requirements of financing it. Only by doing a large business can this company turn live stock into meat and by-products at the lowest possible cost, prevent waste, operate refrigerator cars, distribute to retailers in all parts of the country—and be recompensed with a profit of only a fraction of a cent a pound—a profit too small to have any noticeable effect on the price of meat or live stock.
