Solid Facts

ribly murdering millions of souls in destitute Europe this hour.

Think hard on this line for all other walks of life must fail if you fail to feed them as they labor outside the fields where food is grown.

Wasco county, the land of balanced advantages wherein you live and farm, holds much that farmer's elsewhere must get along without. Wasco county, where the four seasons are represented without great changes—not too hot or too cold, where days are sun-kissed and nights restfully cool, where the eastern Cascades furnish fuel and water for power and irrigation, where fruit and

grain, grasses and root crops alike grow as the "Master Builder" intended, we must improve our opportunity so that the state may know we are a grand 100,000 acres of silt and ash loam, 100 per cent alive.

In order that I may do my bit to start some inquiring farmer on the right road and idea I shall endeavor to fill this space next week with the "whys and wherefores" of some much discussed subject very much abused by some well meaning farmers on Wapinitia Plains. Look for this section and gain the knowledge that has cost the state and nation as well as some individuals many experiments, tests and dollars to learn.
