USED CARS
Some dealers are in the used car business to make money. Some dealers are in the used car business to sell new cars so as to make money—that's us. Proved Himself Hard to Kill.

There are many cases on record of professional fasters doing without food for 40 days. Some few years ago a French soldier, Corporal Desnais, fell into an old mine-shaft near Brest. He lay there, unable to get out, for 28 days, and that without a morsel of food or drink. Yet at the end of that time he was able to call for assistance, and when got out, could tell his story. With proper care he completely recovered.

Devilfish Overcame Whale.

—According to some naturalist, the squid, or cuttlefish, is the principal food of the sperm whale. But apparently the game is not always one-sided. There is told a thrilling incident of a huge sperm whale rolling on the moonlit surface of the sea enveloped in the mighty coils of an octopus. Bullen, who witnessed the fight, is of the opinion that the devilfish was far larger than any of which even fragments have yet been handled by man.

Gave Him Idea for Balloon.
The invention of the ordinary balloon is said to have had an exceedingly simple origin, though some authorities give more than one instance of this discovery. A linen shirt was hanging in front of a fire, and Stephen Montgolfier, who is said to have invented the balloon, noticed that as the warm air rose it took the shirt with it. Quite a simple incident, which led to a remarkable invention. — Seattle Times.

Lift off Corns!
Doesn't hurt a bit and Freezone costs only a few cents.
With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of foot.
A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Poker as Glass Cutter.
An ingenious method of cutting glass with a poker is described. Make a tiny notch on the edge of the glass where you want to cut it. Lay the glass over a newspaper, so that you have a printed line as a guide; heat a poker and apply it where the notch is. There is a faint click, and if the hot poker is drawn slowly across, a crack follows. When the opposite edge of the glass is reached it will be found that it is in two separate parts.
