Delay means decay
paint right away with
FULLER PAINT

THE life, the value, the beauty of your home, depend on the care you give it. Weather-beaten and warped siding, cracks and open joints are forerunners of decay. Many property owners neglect to look for such signs, judging their houses and buildings by general appearances only. It is good business to make regular inspection of your property, and to use paint of good quality, which is the surest preventive of decay. Through the varying conditions of weather in all their extremes, FULLER Paint has proved both its preserving and beautifying qualities—a Pacific Coast Product for Pacific Coast requirements. 71 years of paint manufacturing experience are back of every brushful of FULLER Paint.

Some of the FULLER Products

A Full Yield from the Whole Field

There is no idle soil when a Superior Grain Drill is used in the seeding. It doesn't skip, clog or leave empty furrows. Distributes all the grain evenly at the bottom of the drill furrow insuring uniform covering. A full, even stand results, and the full stand brings the full crop. That's why

Superior Grain Drills

have won their way into the favor of the farmers who prepare and plant their fields for the extra bushels—the all profit bushels. Made of the choicest materials. Special features: Double run positive force grain feeds—two feeds in one. Parallel disc bearings guaranteed for life of drill. Superior telescoping steel conductor tubes—non-breakable; no buckling, kinking, bending or collapsing. Superior patented oscillating drag-bars insure 50% more clearance.

Constructed for Use With Any Tractor

It will pay you to use this Drill because its effective and economical sowing will bring you greater profits in increased crops. Superior Drills are noted for lightness of draft, ease of operation and unusual strength.
