QUALITY—FIRST, ALWAYS

How many miles have you driven your car?

HOW many miles—with-
out changing engine oil?

Dirt accumulates in the oil of every engine—carbon, road dust, fine particles of metal, and gasoline that has escaped past the pistons. This dirty, diluted oil circulating through your engine causes unnecessary wear on bearing surfaces.

Have it drained out—now—and fresh oil put in the crankcase.

We can do that for you conveniently, quickly, economically—with

Modern Crankcase Cleaning Service. We use Zerolene Flushing Oil, the new scientific flushing agent, which cleanses thoroughly without danger of contaminating the supply of fresh oil. And to assure correct lubrication we refill the cleaned crankcase with Zerolene of the correct grade.

Bring in your car today. Modern Crankcase Cleaning Service will give immediate better engine performance. Do it regularly it will lengthen your car's useful life.
