DAIRY CATTLE NEED SILAGE
Succulence It Supplies is Very Necessary for Large Milk Production
—Cheapest of Feeds.

Silage is the best and cheapest form in which to store succulent feed. Many forage crops can be made into silage, but corn, where it can be grown successfully, makes the best silage.

Good silage depends upon cutting the crop at the right stage, fine cutting, even distribution, thorough packing and plenty of moisture in the cut material. When rightly put up and carefully fed, there should be little if any loss through spoiling.

Silage is well suited for feeding to all live stock. Dairy cows need it perhaps more than other classes of animals, because the succulence it supplies is very necessary for large milk production. It is a cheap and economical feed for beef cattle, from breeding cow to fattening steer. Sheep like it, and it is well suited to their needs. Even horses and mules may be fed limited quantities of good silage with excellent results.

Obtain Profit in Dairying
Feed Prices Have Slumped While Price of Butter Still Remains at High Figure in Cities.

Feed prices down 50 per cent or more and butterfat prices still high should mean that men who are now milking cows or who get into the dairy business will make money. Corn and alfalfa have made decided drops in price, while butter is still retalling around 60 cents a pound in these cities. Hence the best way to market these two feeds would appear to be through stock, especially milk cows. A few good milk cows, with feed as cheap as it now is, assures an income and should mean a good profit.

"Boarder" Cows Detected.
A cow-testing association shows the farmer and dairyman which are his "boarder" cows and which ones are the best from which to raise calves.

Only Way to Water Milk.
The legitimate way to water milk is to provide plenty of clean water for the cow to drink.

Scours Rarely Developed.
The calf which is properly fed by a man who is thoroughly interested in calves rarely develops scours.

Index to Dairyman.
The kind of bull a man keeps is a pretty fair index to the kind of dairyman he is.

Difference in Feeding.
There's a difference between feeding cows so they can exist and feeding them so they can produce milk.

English Dancing Authority Predicts
Fox Trot Will Be Standardized.
London.—The "jazz" is dead in London, says P. J. S. Richardson, one of the foremost English authorities on dancing. He declares that no "new" dances will be popularized this year, but the fox trot, one-step and tango, which have held international interest for two or three seasons, will be standardized.

Previously persons taught the same dances by different teachers found themselves hopelessly at sea when they tried to dance together," he said. "Through standardization, on which

UNITED STATES PATENT OFFICE

Van Buren's Attar of Roses.
The Jar of attar of roses which was presented Martin Van Buren when he was President and which was for a time on exhibition in the patent office was stolen within a few years of being placed there. The exact date of the theft is not known, but it was probably between 1850 and 1860.

Remarkable Wild Flower.
Hungary grows a wild flower which is the exact floral image of a humming bird. The breast is green, the throat yellow, the head and beak almost black.

LOSS OF POWER and strength follow loss of flesh. These come from impoverished blood. Dr. Pierce's Golden Medical Discovery enriches the blood, stops the waste of strength and tissue, and builds up healthy flesh.

Thin, pale, puny and scrofulous children are made plump, rosy and robust by the "Discovery." They like it too.

In recovering from "Grip," or in convalescence from pneumonia, fevers, or other wasting diseases, it invigorates and builds up the whole system, and brings health.

The Fifth Reel.
Many autos carry a fifth wheel, so that there will be no delay should anything happen to one of the other wheels. Some movie plays that ought to be of four-reel length are provided with an extra, or fifth, reel of the story, so that the audience won't get home too early.—Film Fun.
