**TINY PLOT: \$3,500,000 RENT**  
 Manhattan Was Bought for \$24; Now Thirty-One Feet Bring Huge Rental.  
 New York.—Manhattan island, once sold by an Indian for \$24 and a few drinks of firewater, has become so valuable that a tiny plot stretching only 31 feet along Broadway recently was leased for an annual rental of about \$133 a square foot. Real estate men said this was the highest figure for which land was ever rented here.  
 The site is at Broadway and Thirty-fourth street and extends about fifty feet along the latter. Several years ago a department store wished to buy the corner plot, having procured the land on both sides as the site of a skyscraper. But the owner would not sell, even for \$1,000,000, and the big store had to erect its home around the small building.  
 A four-story structure, housing on the ground floor a busy cigar store, remains on the valuable corner lot. On all sides lofty buildings rear their bulks of steel and stone. The new lessee, who will pay \$3,500,000 for rent, taxes and other expenses over a 21-year period, plans to erect a narrow skyscraper on the triangular plot. A candy-making corporation will occupy the building.  
 Jacob Whitman Bailey, a graduate of the United States Military academy of the class of 1822, is regarded as the pioneer of microscopic investigation.

**Mummy Cloth's Durability.**  
 The extraordinary durability of the ancient mummy cloth is believed to be due to the fact that it was finished with vegetable blue derived from the African locust-bean tree.  
**The Supreme Excellence.**  
 In character, in manners, in style, in all things, the supreme excellence is simplicity.—Longfellow.

# POULTRY

**DIFFERENT BREEDS OF HENS**  
 Leghorns and Minorcas Are Best for Eggs, but Are Poor Sitters—Brahmas Best for Meat.  
 (Prepared by the United States Department of Agriculture.)  
 Chickens, for convenience, may be classified as egg breeds, meat breeds, general-purpose breeds, and fancy or ornamental breeds.  
 The egg breeds include the small or medium-sized fowls which are very active, quick to mature, producers of white-shelled eggs, usually nonsitters or at best poor sitters, and rather poor mothers, say poultry specialists of the United States Department of Agriculture. The varieties of Leghorns and Minorcas are good representatives of this class. Because they are poor sitters some other breed, or at least a few other fowls, should be kept if natural methods of incubation are to be employed. On account of their early maturity it is not uncommon for individuals of the egg breeds to begin laying at the age of four and one-half months. These breeds do not fatten as readily under ordinary conditions as the larger and less active breeds, and are rather sensitive to low temperature because of their large combs and wattles.  
 The largest fowls, represented in the meat class, are especially suitable for the production of large roasters. They are slow and somewhat sluggish in movement, have little desire for foraging, are easily confined by low fences, rather slow to mature, persistent sitters, and rather indifferent layers of brown-shelled eggs. Many poultrymen, however, are getting very fair egg yields from them. The Brahmas, Langshans and Cochins may be mentioned as belonging to this class.  
 The general purpose breeds include fowls which are of fair size and which will also produce a good quantity of brown-shelled eggs, making them especially adapted to the person wishing a supply of both eggs and meat. As one has to make frequent sales of flesh in the shape of surplus cockerels and hens, the carcass as well as egg production should be considered. The general-purpose breeds are usually good sitters and good mothers. They have medium-sized combs and wattles and endure cold weather well. They

Handy Feed Box.

two boards across the inside, as shown. This will prevent the tub from being smashed and will allow four animals to eat out of the box without bothering each other. A strong barrel must be selected, and the hoops must be nailed to each stave.

**MANURE IS BEST FERTILIZER**  
 Contains Plenty of Humus and All Other Necessary Plant Foods—Add Acid Phosphate.  
 The home gardener who can get a load of well-rotted stable manure need not worry about fertilizer, anyone who has ever done any gardening is well aware.  
 Manure contains humus in plenty and all the necessary plant materials, as well as bacteria which put these materials into the most usable shape for crops. To get the full benefit of stable manure, however, it should be balanced with acid phosphate, which is comparatively inexpensive, gardeners at the Iowa state college of agriculture say.  
 An application of one ton of stable manure, which is about an average two-horse load, is not too much for a garden 30 by 60 feet, and 50 pounds of acid phosphate may be used with it.  
 Fresh stable manure should not be applied in the spring. It contains too much readily available nitrogen and may cause in some plants a growth of stems and leaves at the expense of fruits. This is especially true of tomatoes.

 44-46 GRAND AVE.

**UTILIZATION OF FARM LAND**  
 Value of Place Depends Upon What Proportion of Total Area Can Be Made Productive.  
 Effective utilization of farm land means a high percentage of income-producing area, say specialists of the United States Department of Agriculture. The value of a farm depends upon what proportion of its total area is productive. Compare a farm of 100 acres at \$200 an acre, 95 acres being in shape to yield available products, with another farm of the same acreage at \$150 an acre, but with only 65 productive acres. If all the other features of the two farms are similar, the former should be the most profitable because its profit-producing land costs but \$120 an acre against \$230 an acre on the second farm.

Ideal Condition for Hen Flock is Free Range.

occupy a medium position between the egg and meat breeds as to size, egg production, and docility. The Plymouth Rocks, Wyandottes, Rhode Island Reds and Orpingtons are good representatives of this class.

**DESTROY STICK-TIGHT FLEAS**  
 It is Necessary to Clean and Spray Houses and Runs as Well as Treat the Fowls.  
 "Stick-tight" fleas breed in the cracks and crevices of brood and poultry houses; also in dry animal or vegetable refuse, but will not breed in damp or wet places; therefore, to get rid of them it is necessary to clean and spray the houses and runs thoroughly as well as treat the birds, say poultry specialists of the United States Department of Agriculture.  
 Grease the comb and wattles of the fowls and chicks with a preparation of kerosene and lard—one part kerosene to three parts of lard—being very careful not to use too much of the mixture or get any of it in the birds' eyes or on other places where it is not necessary, as it may cause injury if used too freely.  
 Clean and spray the coops and houses thoroughly the same as for poultry mites; also wet or spray the yards or runs, especially any dry soil about the poultry houses, such as dirt floors or the ground underneath a board floor, with a solution of salt and water, which helps to keep the ground moist and prevents the fleas from breeding.

**MEANINGS OF DREAM FACES.**  
 To see a grim, distorted face denotes suffering. To see a handsome face of the opposite sex, good news and happiness. To dream your face is handsome signifies long life, but if pinched and pale, sorrow, loss of a friend. If your face is dirty and you wash it, you will repent of some actions.  
**Wandering Greenland.**  
 Norwegian scientists claim that Greenland is moving slowly to the west at the rate of about ten yards a year. They say it was once connected with Norway and has moved 875 miles in the last 100,000 years and still is moving.  
**Foundation of All Good.**  
 All good government must begin at home. It is useless to make good laws for bad people; what is wanted is this, to subdue the tyranny of the human heart.—Hugh R. Hawes.  
**The Difference to Me.**  
 The people who always practice what they preach seem somehow not to preach such disagreeable things as other people do.—Cartoons Magazine.  
**Dream Lore.**  
 To witness an execution denotes success in love; such a dream shows your sweetheart to be fickle and little calculated to make you happy. To see one or more men executed denotes great success in trade.  
**Misunderstanding.**  
 We are accustomed to see men deride what they do not understand, and snarl at the good and beautiful because it lies beyond their sympathies.—Goethe.

**NEW SEED CATALOGUE HELPS**  
 Pamphlet is of Much Assistance in Planting Garden—Prevents Overlooking Anything.  
 Have you received a new seed catalogue? Get one—from a reliable firm—for it will help you in planting your garden and prevent you from overlooking something you may otherwise forget, say specialists of the United States Department of Agriculture. From \$2 to \$5 worth of seed will plant a vacant lot or a small home garden. Several of the seed houses offer special collections of seed that are suitable for various sized gardens.

**NICOTINE KILLS PLANT LICE**  
 When Insects Are Discovered on Apples, Plums or Plants Spraying is Recommended.  
 If plant lice are noticed on apples, plums or plants in early spring, spray with nicotine sulphate and soap (one-half pint of 40 per cent nicotine sulphate and two to three pounds of soap to 50 gallons of water), as soon as discovered. If the lice are numerous when applying regular sprays, the nicotine sulphate may be added to the regular mixture, but it is more effective when used alone.

**PROPER MATING OF TURKEYS**  
 Fifteen Hens to One Vigorous Tom is About Right—Males Will Fight Fiercely.  
 Fifteen turkey hens can safely be mated to a vigorous tom. If 25 or 30 hens are kept, two toms should not be allowed to run with them at the same time, but one should be confined one day and the other the next. When two toms are allowed to run together during the mating season they fight fiercely and the stronger does practically all the mating.

**PERSONAL**  
**MARRY IF LONELY.** For results, try me; best and most successful "Home Maker"; hundreds rich with marriage soon; strictly confidential; most reliable; years of experience; description free. "The Successful Club," Mrs. NASH, Box 566, OAKLAND, CALIFORNIA.

**PLATING NICKEL AND SILVER**  
 Headlights re-plated. \$2.00 pair. 1907 light. \$1.50 each. Parts nickelled. Hard-ware re-plated. California Plating Wks., Cor. 2nd and Salmon Sts.  
**SANITARY BEAUTY PARLOR**  
 We help the appearance of women. Twenty-two inch switch or transformation, value \$7.00, price \$2.45.  
 400 to 412 Dekum Bldg.

# Good Looks

Good looks in women does not depend upon age, but upon health. A woman's health depends more upon the feminine make-up than upon anything else. You never see a good-looking woman who is weak, run-down, irritable, out of sorts, fidgety and nervous. Headaches, backaches, dragging-down feelings, irregularities and troubles of that sort are all destroyers of beauty. Men do not admire sickness.  
 Dr. Pierce's Favorite Prescription not only acts upon the troubles and weaknesses peculiar to women, but is an all-round tonic that braces the entire body, relieving nervousness, sleeplessness, headaches, dizziness.

**Historic Dead Sea.**  
 The Dead sea, a lake in Asiatic Turkey and lying near the southern extremity of Palestine, probably got its name because its atmosphere was formerly supposed to be fatal to life—an erroneous idea, for the people who live on its banks are said to be in the enjoyment of good health. But fish cannot live in its waters, which are especially nauseating. The Jordan and six other rivers flow into the Dead sea, which has no outlet, but gets rid of its surplus by evaporation. In the Bible this baneful body of water is called the Salt Sea of the Plains and Sea of the Arabah.

**Freshen a Heavy Skin**  
 With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Adv.

**May Achieve Goodness.**  
 Curses Really Amount to Little.  
 In the southern portion of the Argentine peninsula the remark, "May an accident befall you!" is only a friendly way of passing the time of day. But expression of the hope, "May you be carried home in four pieces," is due cause for riot on the spot. There are many ways, the world over, for cursing your enemies, but when you come down to it they are rather trivial things to say.

**Country Life is Sweet.**  
 The best and most hopeful feature in any people is undoubtedly the instinct that leads them to the country to take root there, and not that which sends them flocking to the town and its distractions. The lighter the snow the more it drifts; and the more frivolous the people the more they are blown, by one wind or another, into towns and cities.—John Burroughs.

**Utilization of Farm Land**  
 Value of Place Depends Upon What Proportion of Total Area Can Be Made Productive.  
 Effective utilization of farm land means a high percentage of income-producing area, say specialists of the United States Department of Agriculture. The value of a farm depends upon what proportion of its total area is productive.
