BIG JAP STUDENT TOO MUCH
 Washington Freshman Tried to Haze Him, but He Was Too Strong.

Seattle, Wash.—All Japanese are not easy marks, as fifteen boys of the freshman class at the State university here can testify.
 Last fall a real sport matted with the person of Taito Ogawa, a hurly

Japanese boy, who stands nearly 6 feet high. He is a giant in strength too, and had been employed all summer in a railroad section gang in Montana. He is thirty years old and has been in America ten years.
 This year he decided to enter the university to study engineering, and as soon as the freshmen learned of this they planned to haze him. The plan

failed to the chagrin of the students. More than thirty-five of the young bloods of the university captured the Japanese and attempted to shackle him. He broke one boy's nose, blacked more eyes than he has fingers and toes, tore a part of the scalp off Andrew Barker and severely injured eleven other boys. At least 15 of the class were unable to resume school work, while the smiling face of Ogawa appeared as usual in the classroom.

TREES AND SHRUBS

ADVANTAGE OF VELVET BEAN
 When Properly Dried It is Distinct Addition to Protein Concentrate for Cattle.

When properly dried before shipment, velvet bean feed is a distinct addition to the protein concentrates at the disposal of northern feeders, in the opinion of Dr. J. B. Lindsey of Massachusetts station. It has proved slightly better than wheat bran for making milk. It may constitute as high as 40 per cent of the grain ration for cows; but 20 per cent for pigs and horses is considered enough. Doctor Lindsey recommends for cows a ration of 40 per cent velvet bean feed, 40 per cent corn or hominy meal or ground oats and 20 per cent cottonseed meal or some other high-grade protein concentrate.

GOOD PASTURE FOR FILLIES
 It is Not Possible to Secure Best Growth of Animals Unless Grain is Also Fed.

Experiments conducted by the University of Illinois show that purebred draft fillies can best be produced when good pastures and legume roughages form the basis of their rations. Too much emphasis cannot be placed upon the importance of good pastures.

Although abundant pastures and legume hays reduce the grain requirement, it is not possible to secure the best growth unless grain is also fed.

DEHORNS CALVES EARLY.
 The removal of horns from dairy cattle is a practice which is to be commended under most conditions.

PROVIDE COMFORTABLE QUARTERS.
 Warm, comfortable quarters are just as necessary in successful calf rearing as correct feeding.

THE HARVEST MOON.
 The harvest moon is the one on or nearest to the 21st of September, harvest time. When nearly full it rises for several consecutive nights at about the same hour. A poetical playwright points out that it is a kindly arrangement of the Creator for the benefit of lovers. There is at that time a small angle between the moon's orbit and the horizon which causes this compliance on the part of the queen of the night.

What This Buffalo Physician Has Done For Humanity

The picture which appears here of Dr. Pierce of Buffalo, N. Y., was taken in 1910. As a young man Dr. Pierce practiced medicine in Pennsylvania and was known far and wide for his great success in alleviating disease. He early moved to Buffalo and put up in ready-to-use form, his Golden Medical Discovery, the well-known tonic for the blood. This strength-builder is made from a formula which Dr. Pierce found most effective in diseases of the blood. It contains no alcohol and is an extract of native roots with the ingredients plainly stated on the wrapper. Good red blood, vim, vigor and vitality are sure to follow if you take this Alternative Extract. Dr. Pierce's Golden Medical Discovery clears away pimples and annoying eruptions, tends to keep the complexion fresh and clear. This Discovery corrects the disordered conditions in a sick stomach, aids digestion, acts as a tonic and purifies the blood. Write Dr. Pierce's Invalids Hotel in Buffalo, N. Y., and receive confidential medical advice free. Send 10c for trial pkg. tablets. All druggists sell Discovery, tablets or liquid.

CUTTINGS FOR GOOSEBERRIES

Plants Should Be Placed Six Feet Apart and Cared for in Same Way as Currants.

Gooseberries are grown from cuttings like currants and also propagated by mound layering. In following this method the tops are cut off in the early spring leaving stubs four or five inches long. Many new shoots will grow from these stubs, and when they are hardening a little in early summer the lower four or five inches of these shoots is covered with a mound of earth. Each shoot will then send out roots, forming a number of independent plants. The earth is taken away in the fall and the young-rooted plants cut off and either planted or kept slightly moist in earth or moss till spring. Gooseberries should be planted six feet apart and cared for in the same way as currants, says the United States Department of Agriculture.

SPRING PRUNING PREFERRED

Work on All Cane Fruits Should Be Done Just Before Sap Commences to Flow.

Pruning of berries and all cane fruits should preferably be done in the spring just before the sap commences to flow and after all danger of killing frosts are past. Danger of winterkilling where fall or winter pruning is practiced is great, because the open end of the cane permits the frost to travel down the soft center of the canes to the roots: That is why spring pruning is to be preferred. In this pruning, remove all dead canes from the previous season's fruiting canes and also thin down the present canes to not more than three or four sturdy ones to each old, established root stock. Quality berries are worth more than a quantity of inferior berries and these quality berries are produced only where the roots are not overtaxed.

Trees Planted Too Close.

Most orchard trees are planted too close for best results. While this can be remedied in the planting of new orchards we have to take conditions as they are found in the case of the older orchards and make the best of them.

Keep Berries Productive.

Berries kept in a strong, sturdy condition by careful and systematic pruning and by constant cultivation just as one would cultivate the corn field will remain productive for years.

Good Sale for Plants.

Good varieties of strawberry plants should sell well next spring, as many fields have not grown new runners in the usual quantities.

Dehorn Calves Early.

The removal of horns from dairy cattle is a practice which is to be commended under most conditions.

Provide Comfortable Quarters.

Warm, comfortable quarters are just as necessary in successful calf rearing as correct feeding.

The Harvest Moon.

The harvest moon is the one on or nearest to the 21st of September, harvest time. When nearly full it rises for several consecutive nights at about the same hour. A poetical playwright points out that it is a kindly arrangement of the Creator for the benefit of lovers. There is at that time a small angle between the moon's orbit and the horizon which causes this compliance on the part of the queen of the night.

Peculiarity Hard to Explain.

It is a peculiar thing that the names given live animals are of Saxon origin, but those given to meat when dressed and prepared for food are Norman. For example, the words "ox," "steer," "cow" are Saxon, but "veal" is Norman; "sheep" is Saxon, but "mutton" is Norman; so it is severally with "swine" and "pork," "deer" and "venison," "fowl" and "pullet."

Cuticura Soothes Baby Rashes.

That itch and burn with hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each everywhere.—Adv.

Art is No Recreation.

Art, properly so-called, is no recreation; it cannot be learned at spare moments, nor pursued when we have nothing better to do. It is no handiwork for drawing-room tables, no relief of the ennui of boudoirs; it must be understood and undertaken seriously, or not at all.—"Modern Painters," John Ruskin.

Little Susy at Church.

Little Susy was taken to church by her mother for the first time. During the long sermon the child grew more and more fidgety, and kept wriggling about. Finally she became very greatly interested in a small tear in her dress and, after looking at this absorbedly for a little while, she jumped to her feet on the seat, and to the great mortification of her mother, cried out: "Has anybody in this crowd got a pin?"—Minneapolis Tribune.

A Personal Application.

We have never sunk to our neck in quicksand and struggled to get out, but we know the feeling. We have tried to get out of debt.—Arkansas Gazette.

Too Much for Music Lovers.

Jud Tunkins says what broke up the singing society was the threat of the richest man in town to foreclose mortgages unless his daughter was the leading soprano.

Utility and Appeal.

Of all the liberal arts literature is the oldest, as it is the most immediate in its utility and the broadest in its appeal.—Brander Matthews.

GIRL HAD PAINFUL TIMES

Mothers—Read This Letter and Statement Which Follows

Portland, Indiana.—"I was troubled with irregularity and constipation and would often have to lie down because of pains. One Sunday my aunt was visiting us and she said her girls took Lydia E. Pinkham's Vegetable Compound and got well, so mother said she guessed she would let me try it. It is doing me good and I praise it highly. You are welcome to use this letter as a testimonial." —

MOTHERS—You should carefully guard your daughter's health. Advise her of the danger which comes from standing around with cold or wet feet, from lifting heavy articles, or overworking. Do not let her overstudy.

If she complains of headache, pains in back or lower limbs, or if you notice a slowness of thought, nervousness or irritability on the part of your daughter, give her careful attention. Lydia E. Finkham's Vegetable Compound is an excellent medicine for your daughter to take, as it is especially adapted to relieve just such symptoms. Remember it contains nothing that can injure and can be taken in safety.

Needed Explaining.
 A pompous old gentleman was addressing a gathering of English workmen and during his remarks he urged them to "Be industrious! Shun idleness and remember that sloth is the parent of necessity." As he paused to let this sink in a man in the rear sung out: "Look 'ere, mister, I've 'eard it said as 'ow necessity is the mother of invention—if so be as it is, then sloth is invention's grandmother, and summat's wrong somewhere."

Personal Application.
 We have never sunk to our neck in quicksand and struggled to get out, but we know the feeling. We have tried to get out of debt.—Arkansas Gazette.

Too Much for Music Lovers.
 Jud Tunkins says what broke up the singing society was the threat of the richest man in town to foreclose mortgages unless his daughter was the leading soprano.

Utility and Appeal.
 Of all the liberal arts literature is the oldest, as it is the most immediate in its utility and the broadest in its appeal.—Brander Matthews.
