YELLOWSTONE NATIONAL PARK

*Nature's Most Wonderful Laboratory
and Out-of-Door Paradise*

"The wildest geysers in the world, in bright, triumphant bands, are dancing and singing in it amid thousands of boiling springs, beautiful and awful, their basins arrayed in gorgeous like gigantic flowers; and hot paint-pots, mud springs, mud volcanoes, mush and broth caldrons whose whole contents are of every color and consistency, splash and heave and roar in bewildering abundance.

"Here, too, are hills of sparkling crystals, hills of sulphur, hills of glass, hills of dinders and ashes, mountains of every style of architecture, icy or forested, mountains boiled soft like potatoes and colored like a sunset sky.

"The air is electrical and full of ozone, healing, reviving and exhilarating, kept pure by frost and fire, while the scenery is wild enough to awaken the dead."—John Muir.
