She Loathed Extravagance

(@ by McClure Newspaper Syndicate.) Everybody knew Miss Jessie Kapper for a person of the highest principles; what was not so well known was that her thrift, which was alike hereditary and habitual, forbade use of the principles for every day. She spoke eloquently of the larger vision, world humanity, harmony with cosmic law, above all, the crying need of the uplift. She was, further, more than generous of her time and her breath for all manner of causes that

might serve as pedestals. Notwithstanding, there were chuckles from the unregenerate mass over the washerwoman's verdict: "Hit ain't only that she wants to be bell-wether or no sheep-somebody else must pay for the bell."

She looked exceedingly well to the ways of the household-her mother was an invalid, her father away half the time in congress. That gave her added prestige, if she didn't go to Washington with the general. Her mother was excuse quite sufficientand daughterly devotion was thus an

added asset. She paid cash for everything save her subscription to church and charity-for them she set apart She loathed extravagance-espe less family-a pretty, frightened, incapable mother, and a scientific father, who lost himself in his work.

So badly, indeed, she said outright to her gossip, Miss Susan Fife: "If ever anybody needed a guardian it is Carroll Beaton-unless she gets one of some sort, she'll die on the town."

"She can get a mighty fine one, any minute she'll say 'yes,'" Susan returned smiling slyly.

Possibly because having still his way to make, he had felt her beyond his reach. Miss Kapper, of whom he saw a good deal, both in business and socially, was perhaps to blame for the feeling. He liked her cordially-she was so sensible, likewise so kindly-always interested in his prospects, and overflowing with nan-sympathy for cases of need. wat She had shed the balm of her sym pathy even upon Carroll-such a pity the dear, brilliant girl was hampered as she was-no chance to train herself for a career-what would become of her when her mother died, and the annuity with her, Miss Kapper could not guess, unless Carroll were wise and lucky enough to make a good marriage.

All this was nebulously at the back of Huntly's mind, when he heard Aunt Jen, saying briskly: "You've got a new frock, child-never mind how 1 know-so you bring it here tomorrow I'll make it in time for the Allens party if I have to sew Sundays." "Get thee behind me, Britt-you

Show the Time Taken for Varlous Scents to Travel.

The rapid propagation of smells nofleed in the open air appears due entirely to currents, since in small tubes, where currents do not exist, the rate is found to be very small. Experiments along this line were first underaken in England, and additional data have been reported in this country.

With ammonia diffusing through a tube a meter and a half long, more in printed books in the middle of the than two hours elapsed before the smell could be detected at the other end of the tube. Using different lengths of tubing, it was found that the time required for the diffusion of the smell was roughly proportioned

to the square of the length.

Ammonia and hydrogen sulphide were used for these experiments. The presence of ammonia could be detected chemically at a point in a tube after about the same time as when the sense of smell was used for a detector. The rate of propagation of the smell of ammonia was not markedly different when this had to pass along the same tube either hori-

contally or vertically downward. With camphor, however, while the rates horizontally and downward were about the same, the speed upward was about twice as great. The smell given to iron and brass by rubbing these with the fingers was also tried,

but gave no definite results.

### Queer Sheep.

You are so used to seeing our domestic sheep with tails which are "nothing to speak of," that you will hardly he lieve that there are sheep in some parts of the world with tails which weigh as much as 40 to 80 pounds! These "fat-talled sheep" are found in northern India and Egypt. The tail is considered a great delicacy, and the Arabs cut it in slices and fry it, but otheone who tasted this delicacy said it was very much like fried tallow In Shanghal there is a breed of sheep which has no external ears, and neither sex has any horns.
