## At Grade Crossings

He Who Hesitates is Safe

Self preservation would seem to be nature's last law. For in the last five years, 9,101 persons (almost twice the number killed at the battle of Gettysburg) have sacrificed their lives at highway grade crossings in the United States through failure to Stop, Look and Listen.

Train operation is safe because railway employees are carefully trained. Except in a few states automobile drivers are turned loose without even an examination.

Trains and street cars stop before crossing another railroad where there is no interlocking device. If it be necessary for them, how much more necessary for the auto driver! For most automobiles carry loved ones and friends of the driver.

Yet eight out of ten automobile drivers race across railroad tracks without stopping and looking in either direction. Many motorists disregard the watchman's stop signal. Running through and breaking crossing gates is a common occurrence. One-fifth of all train accidents involving automobiles are caused by the automobile running into the side of the train.

The railroads maintain warning signs and require enginemen to whistle and ring the bell for every crossing. Highways are being relocated to eliminate crossings. But railroads are powerless to prevent injury to occupants of automobiles who fail to exercise care for their own safety.

It has been suggested that all grade crossings be removed. There are 250,000 in the United States and at \$50,000 each it would cost \$12,500,000,000—and take at least 30 years—to remove them. This expense is about two-thirds the value of all the railroads of the country as tentatively found by the Interstate Commerce Commission, and neither the railroads nor the municipalities have the money. The "Stop, Look and Listen" rule can be followed NOW without cost. It takes a train but a few minutes to pass over a crossing. Surely no one would sacrifice his life and his loved ones to save a few seconds!

Lives of rail passengers are imperiled by grade crossing accidents. Recently several trains on eastern roads have been derailed by striking motor vehicles, and enginemen and passengers have been killed.

Grade crossing accidents would absolutely cease if every automobile driver would stop, look and listen at every grade crossing.

Won't you do it.
