Another stretch of The Dalles-California highway was begun last week by Mr. Doty, his son, and three other men, contractors. It runs for a mile, beginning at the top of the White river grade, or the Maupin Ferry road as it was called long ago. The present grade almost parallels the old one, which was established by some of the first settlers of the country, and so far as any one can now remember, was the first grade south of the White river canyon. But the road now building is at a lower level, with a far more uniform rise, and will be much longer than the old grade, which has long since been discarded.

Much of the new roadbed is finished, waiting for the surfacing, though there are several fills to be put in before one could drive over it. The stock pass that leads from the hillside pasture to the spring above the Tige Morgensen house (which is on the old Baskett ranch) is nearly finished. Stakes are being given through the right-of-way across the Flat, and our part of The Dalles-California highway seems a fact of the near future.

The new road-bed from White river bridge to Tygh is now being used its full length, and though rough, gives promise of better things before long.

Good looking fences are going to be the rule, at least along the highway. Orange Brittain and Raymond Doering are rebuilding the Mays fence, and Joe and Cecil Chastain and Mr. Shearer are resetting the lines on their respective ranches, the latter hauling posts from the mountains and rushed to keep ahead of the road work. Others will begin work in a few days.

Now if an epidemic of new houses should hit the county, HARD—well wouldn't this be a lovely country to live in?
