U. S. EXPERTS LEAD WAR ON FOOT AND MOUTH DISEASE

This is Dr. U. G. Houck of the United States Bureau of Animal Industry, (left) who has been placed by Secretary Wallace in complete command of the fight being effectively waged on the foot and mouth disease outbreak in California, and G. H. Hecke, director Department of Agriculture, State of California, who is assisting Dr. Houck in quickly and permanently stamping out the epidemic.

SACRAMENTO, CALIF.—The full force of the United States government has been brought into play effectively against the foot and mouth disease in California. The disease has been confined to certain limited districts in the state and the work of stamping it out is proceeding rigorously under the direction of Dr. U. G. Houck, personal representative of Secretary Wallace, department of agriculture, who has complete control of the combined federal and state forces.

"Every method justified by our past experience and by scientific study is being used to prevent any possibility of spread of the disease and to wipe it out so thoroughly that there will be no chance of its recurrence," said Dr. Houck.

"There is no danger of spread of

the disease through shipment of fruits, vegetables or dairy products from the great non-infected areas of California. We know of no instance where the disease has been carried by such shipments," Dr. Houck said.

Complete confidence in the men in the field was expressed by Dr. J. H. Mohler, chief of the bureau of animal industry, United States department of agriculture, in a message he has just sent to Dr. Houck and the local federal inspectors.

"We have in California," he said, "the best equipped force of inspectors that was ever assembled on a foot and mouth detail."

"Our methods are not experimental, but have been weighed in the balance of practical experience and have always produced the desired results."
