

**EAST MAUPIN DOINGS**

Peter Kirsch of Criterion was doing business in East Maupin Wednesday.

Mrs. Hatte Davidson made a business trip to The Dalles Tuesday.

Andrew Cunningham's family are in The Dalles today on business.

Jack Morrow and family were visitors of Mr. and Mrs. Frank Brown Tuesday evening.

Quite a number of Indians are patronizing East Maupin merchants these days.

Jack Pullen's gang of bridge men is stopping at East Maupin. They will repair bridges, etc., while here.

The county nurse, Miss Sena Peterson, inspected babies and school children here Wednesday.

A. Jett, state boiler inspector, was in town Wednesday looking over the garage air tanks.

L. D. Kelly is making trips to the mountains daily, taking out barley and bringing in wood.

Superintendent of schools Brant of Forest Grove, with his wife, was

visiting the Fischers Monday. They were on their way to Bend.

For Sale—Baby carriage in good condition. Has reed body and is reversible. For particulars inquire at Fischer's garage.

Gus Derthick and his boss were busy Wednesday repairing the bridge across the Deschutes.

Lester Kelly harvested his peach crop Monday. Mrs. L. Fischer took them off his hands.

Lester Crofoot left for Case Creek Saturday, where he will be employed as track walker for the O. W. R. & N. Railway.

plains were callers at the J. C. Bradway home Saturday.

Rev. Opsund of Gateway, Oregon preached at the Smock church Sunday morning and evening. He was accompanied by his wife and daughter.

The young folks had a party at Miss Olga Cervin's on Saturday evening. Cake and ice cream were the refreshments served.

F. M. Felch made a business trip to Maupin on Thursday last.

B. F. Scott is cutting J. W. Ayres' wheat with his combine and will finish this week.

Mrs. S. G. Ledford, who has been on the sick list, has about recovered.

Loren Barber returned on Thursday from Ashwood, where he spent a few days on business.

Mr. and Mrs. Opsund were visitors at the Bradway home on Monday.

Mr. Kroll and Fred Strange are finishing work on the Boulder ditch and are expecting to be out in a few days.

Elwood Smith returned from White Bluffs, Washington where he had employment the last few months.

B. C. Scott and wife motored to Dufur on Saturday, returning in the evening.

Mrs. Marion Duncan was called to The Dalles on Tuesday by the severe illness of her daughter, Mrs. Alma Britton, who is in The Dalles hospital.

Ray Rodgers and wife of Monrovia, California, arrived here on Wednesday, having been called by the dangerous illness of Mrs. Alma Britton, who is Mrs. Rodgers' sister. They are now in The Dalles.

Mr. and Mrs. Ruffer were Maupin visitors on Wednesday. Mrs. Bradway accompanied them.

J. W. Bowen and family of Centralia, Washington, came on Monday for a short visit with Mrs. B's mother, Mrs. Cecil Mayfield. On Wednesday they returned to Centralia. Miss Crystal Wrenn accompanied her sister to her home, where she will remain indefinitely.

J. E. Woodcock came home Saturday night to spend Sunday with his family. He is running a threshing machine near Wamic.

has taken possession of every branch of composition for the printing trade. Dictionaries, encyclopedias, catalogues, edition de luxe, books, advertisements, tabular work and commercial job work are now set on the Linotype. The range in size and face is from five point to 48 point. A point, in printers' language, is one 72nd of an inch.

The Linotype is sometimes called a typesetting machine, but this is not correct; it does not set type. It is a different departure from old typesetting methods. It might be considered a substitute for type setting. It is, strictly speaking, a composing machine, as it does composition, but its product is not set type, but solid slugs in the form of lines of type with the printing face cast on one edge.

The original Linotype carried 90 characters in one magazine and the mold was stationary; that is, in order to change the length or thickness of the slug the entire mold was removed and another substituted. The development of the machine from

the original type has been steady and gradual. As printers learned to adapt their work to the machine and the machine to the work, they demanded more of the Linotype and improvements began to appear. The two-letter matrix, which gave the operator 189 characters in the magazine instead of 90; the universal adjustable mold, which made the change of the slug in length or thickness the work of a minute; the two-magazine, which gave the operator 360 characters; the quick change machines, which permit a complete change of magazines in one minute by one man; and the last grand triumph, the three-magazine Linotype and the four-magazine Linotype. The former giving the operator a selection of six or more faces and 540 characters; the latter eight or more faces and 720 characters. With the original machine only the text matter of newspapers could be set; with the modern four magazine machine the entire paper, heads, ads, and text can be set from the machine without change of magazines.

PLACES, STARTING AT 7:30 P.M.  
C. M. PLYLER, Manager.

Mrs. Clifford Allen visited the Fischer and Kelly families Wednesday.

Mrs. Lester Crofoot is visiting her mother, Mrs. Tunnison, on Dead Dog. She expects to remain there for an indefinite time.

**LIVELY NEWS ITEMS FROM BUSY SHANIKO**

Mr. and Mrs. R. I. Kinney, our efficient postmaster and telephone operator, motored to The Dalles on Sunday to say goodbye to his father and mother, who were returning to their home town of Carthage, Missouri, after visiting with Dick and his brother John, at John Day for about two years.

John Reid, the garage man, is wondering why the enormous volume of tourist travel he is reading about in the Oregonian almost every day has not arrived so far, at least, it does not leave any impressions at Shaniko.

Marcus Plaster is working now for John Reid at the Shaniko garage.

Mr. and Mrs. Casebolt motored to The Dalles Wednesday on business.

Wheat is coming in full blast to the Shaniko Farmer's Elevator Company.

The Stage schedule is changed from now on, so that the bus will leave The Dalles at 7:15 a. m. arrive at Bend 2:00 p. m. and leave Bend at 7:15 a. m. and arrive at The Dalles at 1:20 p. m.

Business is good and picking up right along at the Columbia Southern hotel under the able management of Mr. and Mrs. Keller. They run a restaurant in connection with it, where good meals are served at all hours.

Mrs. David Wilson's two brothers, Paul Austin, superintendent of the high school at Centerville, Washington, and J. R. Austin, superintendent of the high school at St. Helens, Oregon, are visiting at her home. The gentlemen come in pretty handy right now to her husband, D. D. Wilson, who is busy these days harvesting.

"Allies" motored to Portland on a business trip Sunday, leaving his father, a lively young man of 70 years, in charge of his business here, with Gertrude Olson as his assistant.

Mrs. S. E. Beck of Sacramento, California, is visiting with her daughter-in-law, Mrs. J. B. Nash.

It struck us very deeply to hear that Henry Wakerig, an old timer around Shaniko, but the last few years in the sheep business in Malheur county, died July 30th, at McCall's hospital in a town in Idaho, (we could not get the name in time.) Mrs. Spalinger and Mrs. Lang, sisters, and Ed. Wakerig, a brother of the deceased, went from here to attend the funeral.

Alex Ross, a progressive and modern garage man installed seven oil pumps, which will be fitted with visible glass containers to stop any argument about short measure and thus increase the efficiency of his garage. Alex believes in fixing things right. (You ought to see the flower beds in front of his garage.)

Louis Schueler, former agent here, was a visitor over Sunday.

W. E. Rhodes has arrived here to take charge of the railway station, bringing with him Mrs. Rhodes, the dog and another Nash. V. I. Lucas, in charge of the station for the last two weeks, will leave tonight, (Wednesday) for Messner, to relieve the agent there. C. A. Shaw, auditor for the railway company, is here today making the transfer.

Superintendent of schools Brant of Forest Grove, with his wife, was visiting the Fischers Monday. They were on their way to Bend.

For Sale—Baby carriage in good condition. Has reed body and is reversible. For particulars inquire at Fischer's garage.

Gus Derthick and his boss were busy Wednesday repairing the bridge across the Deschutes.

**ENGINEER MAKES REPORT**

(Carried from page one) printed water specified that the water might be used for domestic and stock purposes when that the quantity indicated did not appear to be more than was reasonably necessary to supply such use. Again referring to the same statute, the Court said that under this provision there would seem to be no distinction between rights to appropriate the water of running streams and those of springs. (Brosman vs. Harris, 39 Ore. 151.) The flow of Maupin springs is too great to be consumed on the property of the claimant. They flow in a well defined channel off her property, and their water is subject to appropriation the same as is the water from the Deschutes river which is almost entirely formed by larger springs of like character.

The rights of contestant shall therefore be limited to an appropriation of three cubic feet per second. There is no evidence to justify the allowance of a priority under this appropriation as early as that claimed, namely, 1886, as it appears that no use was made of the water for municipal purposes until after the Water Code was passed in 1909, contestant's right must therefore depend upon her final certificate secured under the permit issued by the state engineer, giving her a priority of May 31, 1911. Contestee may appropriate the water of the stream in excess of this amount under the terms of his permit No. 5032 issued by the State Engineer, having a priority of January 13, 1920.

**WORLD'S EIGHTH WONDER**

(Carried from page one) keyboard differs from the operation of a typewriter in that it requires no physical exertion. On the typewriter the operator strikes the keys with considerable force, while on the Linotype the slightest touch on the keyboard is sufficient to release the matrices from the magazine. One quick touch on a key will bring down a matrix; if the key is held down the matrices will continue to drop until the channel is empty.

When the Linotype was first designed it was thought, at best, it would be used only for newspaper composition, and, perhaps, no larger face than 8 point would be used. But such has been the excellence of the machine and its product that it
