## You Can't Laugh This Off

It has been figured out that if the sum of \$1.00 had been deposited in a saving bank at 6 per cent on the day of Christ's birth, the interest on it up to the present day would pay off all of the national debts of all of the nations in the world.

And interest piles up just as fast today as it has at any time in the history of the civilized world.

#### Did You Know

that the only reason more people are not saving is because they have not learned how fast interest on money mounts up? Why not start on the one road that leads to Comfort and Happiness-the Thrift

Our time is yours if you will ask for it-Drop in and let's talkover the benefit of a saving account-A dollar will start one.
