Spring Water Proves to Pure by Close Analysis

New Supply at Fair Grounds Contains Nothing to Injure.

In order to determine the purity of the water in the spring tapped for supply at fair grounds, the managers sent a sample to the university for analysis. The chemical report was to the effect that the water was absolutely pure, it containing nothing that could in any way be considered injurious to health. This is gratifying in the light of reports concerning the supply at the grounds heretofore, and should set the public mind at rest in that respect.

Many Visitors in Maupin

Taking advantage of Sunday and Labor Day coming together many people from Portland and other places visited the Deschutes for an outing. Some good catches of trout have been reported as having been made by the visitors.

Petty Thievery

Some people seem to have a mania for taking the property of others. Lately someone visited Dr. Dake's homestead shack up the river and took away several articles, including some blankets. Last Friday night a man registered at the Home Hotel and when he left the next morning he was accompanied by one of Mrs. Miller's homemade comforters. Such petty thievery merits the severest condemnation, and if caught the perpetrators may expect to be dealt with according to law.

PICKED UP ABOUT TOWN

"Matrimony," says Billy Heckman, "is like two people playing poker out of the same pile of chips."

"Take care of the little bit of common sense the Lord gave you," advises Robert Bruce Bell, "for the supply doesn't begin to equal the demand."

"I've always noticed," says Frank Turner, "that the fellow who is looking for the worst of it usually finds it."

Bob Wilson says "a wise man is merely one who can keep the others from realizing what a blamed fool he is."

Oscar Renick remarks that "saving for a rainy day is fine, but buy your coal and wood now and give winter a warm welcome."

Gus Derthick authorizes this: "We don't know why girls run around so much unless it is that they are out hunting their mothers."

Dad Fischer is an optimistic cuss. His latest is "If you keep smiling long enough before long you'll have enough to keep smiling about."

Leonard Farlow is a believer in a day of rest. He says: "Seven days placed on end reach too far to go without resting on one of them."

In commenting on human anatomy Dr. Elwood says "a nose is a nice organ until hay fever comes along and makes it a pipe organ."

"The worst of luck," contends Ben Fraley, "is to have too little sense to talk well and not enough sense to keep still."

Half of Fires Man Set

To date this fire season 1310 fires have been started and reported in national forests of Oregon and Washington. Of this total, more than half were set by man, namely, 663; of this total 213 are known to have originated from careless smokers. This is 32% of the man caused total.

The Mt. Hood forest had the largest number of fires—133—but only five of these reached areas of over 10 acres each, due to the fast action of our lookouts, patrolmen and protection forces. This also accounted for the number of convictions, in which 23 persons were found guilty and fined, after being caught red handed.

New On a Ranch

Mr. and Mrs. W. L. Morrison have decided that this part of the country is best, so have rented a ranch at Cape Horn, Washington, and Bill will hereafter devote his energies to raising fat hogs, laying chickens and milking a bunch of cows. They were in Maupin for a short time Tuesday.

Failed To Show Up

Mrs. Barringer of Ritzville, one of the teachers selected for this year, refused to carry out the terms of her contract and serve as teacher in our schools. We understand the lady was offered a more remunerative position and took same in preference to the Maupin job.

No Sunday Oregonian

For some inexplicable reason the Sunday Oregonian failed to reach Maupin, and many and deep were the curses at the failure. The papers came in from the south Tuesday morning, and as a consequence kiddies and older folks were regaled with somewhat stale Sunday news.
