

## ZADI'S HISTORY TYPICAL

Armenian Orphan Adopted by Dr. and Mrs. Gannaway of Seattle.

Zadi Pachalian Gannaway, once an Armenian orphan, but now adopted by her American rescuers, Dr. and Mrs. Chas. R. Gannaway, of Seattle, "gathered up in her wasted diseased body the sorrows of all Armenia" at the age of one year.

"Zadi's history is typical of thousands of Near East orphans," stated Mrs. Gannaway on a recent tour of the Northwest. Driven with her mother into exile, she was suffering with measles, pneumonia, dysentery and other Near East diseases when we found her. The marvelous vitality of the children of the Near East is shown in Zadi's gallant and successful fight for life. There were thousands as attractive as Zadi in a multitude numbering over eight thousand to whom Dr. Gannaway ministered in the Near East. A mental test of Zadi at the Cheney, Washington, Normal School, showed the mind of a child of eight at the age of four and a half.

ZADI PACHALIAN GANNAWAY

"On the foundation of 200,000 children, many of them above the average in mentality, America has been building for ten years for the future. Many years of study of the children of the Near East, in which I have come greatly to admire their independence and desire to help themselves, make me believe that America never did a greater piece of work than when she reached out and gathered up these thousands of orphan waifs. It is not unreasonable to believe that in American care today in the Near East are the men and women who twenty years from now will be shaping the future of that turbulent land. America must continue for only the few years necessary to complete the task."

Golden Rule Sunday, December 6, will be America's answer to thousands of children like Zadi. Full information about the day, including suggestive menus, may be had on application to the Near East Relief.

Near East Relief offices are at 613 Stock Exchange, Portland; 339 Burke Bldg., Seattle; and for the Golden Rule Campaign temporary offices have been opened at 301 Walker Bank Bldg., Salt Lake City; 677 Peyton Bldg., Spokane; Bristol Hotel, Boise, and Y. M. C. A., Tacoma.

### Save Leaves.

As alfalfa leaves contain about two-thirds of the feeding value of the plant, an effort should be made to get the hay into the stack or mow with as large a portion of leaves as possible.

### Inside Information

A garnish of whipped cream on milk soups improves their appearance and adds to their food value.

Housewives are often disappointed when cream fails to whip or when the whip does not "stand up" stiffly. Sometimes this fault is due to the dairyman's furnishing cream with too little fat. Cream should contain at least 30 per cent fat in order to give a satisfactory whip. In some cases the housekeeper probably has not kept or whipped the cream at a low enough temperature. Cream for whipping should be thoroughly chilled. In hot weather the bowl of cream may be set in a pan of ice water during whipping.
