He demonstrated that knowledge last week and as a result John Mannion is now able to sit up and take nourishment, having been confined to his bed with a severe attack of lum-

It has reached our ears that a certain coterie has agreed to cease reading The Times and are going to stop their papers. That is all right with us; all we ask is that when you stop your paper be sure your subscription is paid up. For every subscriber we lose there is another to take his place, so why should we worry?

The recently organized sewing club starts out with a charter membership of 17 members and still there are more to follow. The object of the club is to extend aid wherever needed and to assist anybody who is in need of sewing. A commendable feature of the club work is that there will be no charge whatever for the work they do, it being done with a spirit of helpfulness and Christianity.

Bootleggers hereabouts are peddling a new decoction—caraway booze. It is said that three drinks of caraway will make a man speak up to his mother-in-law and that four drinks will imbue the drinker with the idea he is man enough to whip Dempsey.

Jack put John on his feet and now is thinking about hanging out a shingle and running opposition to D. Elwood.

There are some men in Maupin who seem to forget that the speed limit is but 20 miles per hour. They "step on 'er" on all occasions and zip through town without thought of possible consequences. If Maupin had a speed cop on the job some of those speed demons would be haled before the recorder and made to realize that local laws, as well as those of the state, were made to be recognized and obeyed.

The poet who wrote about "the melancholy days are here" never lived in Oregon, or he might have changed the expression of the lines. This section is blessed with much better than "California weather" and, another thing, the fish are beginning to bite in the Deschutes.

**MILLING WHEAT DEMAND ACTIVE ON MARKET**  
Canadian Wheat Movement Shows Loss Over Last Year—Soft Red Winter Has Advance

The wheat situation, according to a bulletin from O. A. C., tells of an active demand for good milling wheat, and recites conditions in other wheat raising sections. The bulletin says:  
An active demand for good milling wheat, and slightly firmer prices in European countries featured last week's market news. Southern hemisphere crops were favored by

good weather but further damage was reported to unthreshed northern hemisphere wheat. High protein wheat continued to bring substantial premiums and soft red winter at St. Louis was marked up about 5 cents. The Canadian wheat movement is slow, receipts being only changed from a fourth to a third of last year in September. Rye was firm on good export demand. The general market situation for other grains was practically unchanged although Pacific coast barley was stronger which offsets weakness in the east.
