"INSIDE" INFORMATION

New shoes which fit correctly are comfortable from the start. They do not need the process known as "being broken in."

Keep your sewing machine oiled, clean, and in good running order. Learn to know its attachments and how to use them. Keep your tensions and stitch adjusted to the kind of material you are using. Use good needle of the right size for the thread and material with which they are to be used.

Linoleum, to give good service should be laid over a smooth floor in such a way that it does not buckle, and should be cleaned with a damp cloth wrung out of suds made with mild soap. Alkali washing powders, strong soap, or too much water will ruin even the best linoleum.

When making jelly, the most satisfactory proportions, with a few exceptions the three-fourths of a cup of sugar to one cup of juice.

Iron rust stains on white materials often respond to lemon juice. Spread the stained place over a vessel of actively boiling water and then squeeze the lemon juice on the stain. After a few minutes, rinse the fabric and repeat.

To cook string beans deliciously, shred them finely and give them a short quick cooking in a comparatively small amount of lightly salted water. Remove the tips, ends, and strings, and cut the beans lengthwise into long thin threads, with a pair of scissors.

Shoes often mildew in warm and damp weather, especially in a dark closet. They are not so likely to do so if kept on shoe-trees or stuffed with paper, and stored in a well-ventilated, dry, light place. Mildew can be washed off with warm water and soap, but the leather must be wiped thoroughly dry afterward.

WHEAT CROP UNDER AVERAGE—70,000,000 BUSHELS LESS
Western Crops Fall Short of Last Year—Oregon's Rye Crop is Unusually Small

The winter wheat crop was officially forecasted as of May 1 at about 480,000,000 bushels. This is about 70,000,000 bushels less than the 5-year average and 72,000,000 below last year. The north central states are expected to be short 75,000,000 bushels, about one-third of this shortage being in Ohio. Soft red winter wheat will therefore be very short. In Ohio, Indiana, Illinois, and Kentucky about two-thirds of the crop has been abandoned. The wheat crop in the western states is estimated to exceed the average by 19,000,000 bushels but fall short of last year about 8,000,000 bushels.

The winter rye crop is short 15,000,000 bushels compared to average and 19,000,000 bushels less than last year according to the May 1 forecast. Most of this shortage is in the north central states, but the crop is also expected to be unusually small

in Oregon. The condition of winter oats in the south was also very poor.

Cabins Reserved—
Johnny Williams has received reservations for all his cabins for practically the whole season. His camp ground is acquiring a reputation for convenience and cleanliness and that is spreading from one end of the state to the other.

Criterion News Notes

Pete Conroy and Mr. Spangler were at Dave Wilson's on business one day last week.

Otto Herring and Verle Bonney were dinner guests at the Kirsch home Sunday.

J. H. Baxter was an overnight guest at the W. E. Hunt ranch one night last week.
