### MANY HUNTERS IN FORESTS

One Hundred Twenty-Five Reported In One Small Locality

Hunters are teeming in the deer country and many have already killed their quota and have left for their homes. On Monday of this week 11 bucks were observed on cars passing through Maupin. In talking with one hunter The Times man was told that there were at least 125 deer hunters in one small section of the Blue Mountains, and that nearly all of them had been successful in bagging at least one buck. At that rate the large reported surplus of deer will be greatly cut down, as there must be at least 5,000 deer hunters out after venison this season.

### MONEY FOR T. B. CATTLE

Those Condemned Bring the Sum of \$87.12 Indemnity

Appraised values of the cattle condemned because of tuberculosis in the national campaign against the disease in the cattle herds of the country, averaged for the year ending June 30, 1928, the sum of \$111.53, according to Dr. John R. Mohler of the United States Department of Agriculture. The combined value of the federal and state indemnities, plus the salvage value of condemned animals, was \$87.12. "This figure says Doctor Mohler, 'represents the amount that the owner received for the average diseased animal. The money is commonly used for the purchase of healthy stock, usually of better quality and potentially more profitable than the animals condemned.'"
