SAFETY AND GOOD ROADS

There is a strong connection between good road and safety, according to Charles M. Hayes, president of the Chicago Motor Club.

Poor roads increase all the dangers of motoring, from broken springs to blow-outs. Good roads impose a minimum of strain on the car and when a new road is built, engineers with a scientific understanding of safety, see to it that it is properly marked, that curves are made gradual, hills avoided and few railroad tracks are crossed.

When almost every family owns a motor car and uses it consistently both for business and pleasure, good roads are a social, economic and safety necessity.

In addition to good roads we must now have wider roads. These are being secured at a minimum of expense by building two and three-foot shoulders on each side of narrow pavements and putting a top dressing of some stable material over the old road surface between the shoulders.

APPROPRIATION MADE FOR GRAVEL ON WAP. CUT-OFF

State Will Give \$75,000 and Federal Government \$135,000—13.5 Miles to be Finished

The State Highway commission, at a meeting held last week, decided to appropriate the sum of \$75,000 for graveling 13.5 miles of the Mt. Hood-Wapinitia cut-off highway. The federal government will allow the sum of \$135,000 as its share of the work, making a total of \$210,000 to be used in making that highway one of the best in the state. The state also allowed \$62,000 and the government \$20,000 for

completion of the Mt. Hood-Laurel Hill road. That portion of the highway will be widened to 30 feet. The work on the two portions of the highway will be completed the coming season.

With the completion of the Wapinitia cut-off this section will be on the road of considerable travel between eastern Oregon and the coast. Now that eastern Oregon highways are to receive attention there will be much more travel by way of the new highway, with Maupin, being on a direct line, getting more visitors than ever before with a consequent greater amount of coin from autoists. The Wapinitia cut-off lessens the distance from the Deschutes river to Portland by better than 30 miles, and much travel will route this way because of the shorter distance to be traveled.

It is expected that work of graveling will be begun as soon as the contracts for the work have been let and the contractors get their equipment on the ground ready to work.

Fowls that have a soft and rather large liver with distant yellowish patches when dressed may be perfectly wholesome for food as this condition of the liver frequently results when the fowls are excessively fat. When such livers are crushed beneath the fingers they show a distinctly greasy condition, reports the Oregon experiment station.

Stop that cough! Stovall's White Pine will do the work. Every bottle guaranteed. At the Maupin Drug Store.
