### U. S. CLOTHING STORE?

(H. C. Hotelling, Secretary National  
Editorial Assn.)

Government envelopes will be  
cheaper after April 1. There will  
be a reduction of 20 per cent, which  
will increase the feeling that the  
publisher is robbing his customer  
when he charges what he should  
for envelopes. If the same rule  
were followed in supplying other  
goods, as is the case in government  
envelopes, there would not be a cloth-  
ing store in America. All would go  
to Uncle Sam for their supplies.  
Some day there will be a real  
awakening on this proposition be-  
cause what is good for the goose is  
good for the gander. If we are to  
have socialism, let it apply to all  
lines of trade.

### PRICES DECLINE

The farm price of corn, during the  
period from March 15 to April 15,  
declined slightly over 1 per cent,  
thereby losing most of the gain reg-  
istered during the previous month.  
The farm price decline was accom-  
panied by a decline in exports due  
to the marketing of new crop sup-  
plies in Argentina, and reports in-  
dicating a slightly smaller number  
of cattle on feed this year.

The farm price of wheat declined  
about 5 per cent from March 15 to  
April 15. The decline was general  
over the country as a whole. The  
large visible supply of wheat in this  
country, the better than average re-  
ported condition of winter wheat,  
and indications pointing to less than  
average abandonment have appar-  
ently been the principal factors.

### WANTS 13-MONTH YEAR

Action by the United States to  
bring about an international confer-  
ence to simplify the calendar by mak-  
ing 13 months of 4 weeks, each, in-  
stead of 12 months, is proposed in a  
resolution introduced by Representa-  
tive Porter, chairman of the House  
Committee on Foreign Affairs. A  
similar resolution was sponsored by  
Representative Porter in the 70th  
Congress, and hearings were held by  
the Foreign Affairs Committee.

pleted divesting the Fitzpatrick

day last and have returned to Mau-  
pin. They employed an Indian to

You might call this "putting the car over the hump." Learning to drive is a tough job, but a car driven over a road is usually made had at the Proving Ground.

**Here's where a car leads a tough life**

NO General Motors car is turned out of the factory until a fleet of exact duplicates of that model has been found good by the engineers at General Motors' Proving Ground.

Such an advance model must prove itself from stem to stern. The tests involve speed, power, endurance, braking, riding comfort, handling ease; fuel, oil, and tire economy; body strength—every phase of car construction and performance. It's a *tough life*.

Such testing would be beyond the means or resources of an individual. 1263 acres of land at Milford, Michigan, are devoted to this outdoor laboratory where hills are steep and roads are vicious. Men who are among the world's best automotive engineers conduct the tests.

This tested performance is as much a part of a General Motors car as the chassis. You can't see it. You don't pay extra for it. But you *know* it as you give the car long use on the road.
