

An Invitation

To Everybody Living In Oregon:

A big event touching the history of Oregon is scheduled to occur on Saturday, June 29, when the new bridge crossing the Deschutes is to be dedicated to public use. At that time Governor Patterson and other state official, Highway Commissioners, Wasco County Court, State Engineering force and other notables of Oregon will attend.

The exercises will be under auspices of the Boy Scouts of the district assisted by local committees. All are requested to bring baskets and help make the occasion a memorable one for Maupin. All come!

"INSIDE" INFORMATION

Serve small portions of food to children so that they can clear their plates without the feeling of being stuffed, or nagged into eating.

Don't put hot foods in the refrigerator. Cool them first to room temperature. Don't use ice to cool such things as the tops of carrots, the outside leaves of lettuce or thick paper on parcels from the market. Don't waste ice storing vegetables for a short time if you are going to use them immediately. Opening and shutting the door frequently raises the temperature of the air in the refrigerator, so that more ice is required to cool it.

PAGE, LINE AND PARAGRAPH

A Once-A-Week Service to Weeklies And Semi-Weeklies

To prevent horses from eating oats too rapidly, place a little chopped clover hay or some whole corn-cobs in the feed box with the oats.

One of the best kinds of sweet-clover hay comes from the seedling crop harvested with wheat or rye. This mixture of sweet clover and straw cures well in the shock without much damage to the grain and makes fine feed after thrashing.

Discolored lace may be restored by letting it simmer a few minutes in sour milk. Then follow the usual procedure of washing in luke warm water.

Lettuce may be easily and quickly shredded by using a pair of scissors instead of a knife.

One of the most important factors in successful mushroom culture is good ventilation. This not only supplies oxygen but allows the carbonic-acid gases exhaled by the growing plants to escape. Drafts should be avoided, however, as sudden changes of temperature check growth and cause darkening and cracking of the mushrooms.

Fresh tomatoes can be filled with almost any left-over meat or vegetable for a stuffed tomato salad. A filling made of chopped meat, such as chicken, veal, or tongue, cooked peas, chopped pickles or cucumber,

and salad dressing, is very good. After the tomatoes have been peeled and scooped out they should be seasoned inside with salt, turned upside down to drain, and placed in the icebox until time to fill and serve them.

Cottage cheese for sandwiches may be moistened with a little cream, with salad dressing, or with tomato catsup.

Alfalfa hay should not be put in the barn too green, as it is likely to heat and in extreme cases to burn.

Eggs to be shipped to market should always be packed in the fillers small end down, as they carry better in transit and storage in that position.

Bermuda grass pasture should be kept closely grazed, as the stem becomes dry and wiry if allowed to get too old. Where there are not enough stock in the pasture to keep the grass well grazed, it often pays to harvest for hay and get a fresh growth for pasturing that will be more nutritious and palatable than the older stems.

If it is decided to renovate the strawberry bed and keep it for another year, first mow the tops, particularly if the matted row system is used, then clean out the bed, removing surplus plants, and cultivate the soil between the rows. In regions where the growing season is long, the foliage need not be cut until sometime in August, but the North crops, the tops should be mowed and a bed renovated as soon as possible after fruiting. Some strawberry growers apply a small amount of fertilizer after renovating the bed.

Many poultrymen are building up a good trade by selling pullets of from 8 to 12 weeks of age. This offers a profitable outlet for surplus chicks and gets the pullets off the range before they crowd the birds that are being raised for laying stock. By the time pullets are 8 weeks old they are past the stage of greatest danger and can be kept in colony houses or in summer shelters on range at low cost and with a minimum amount of attention. They usually find a good market among farmers, backyard poultry keepers,

and others who do not have brooder equipment.

Pine Grove News

The core wall of the dam has been tested and the three-foot storage backs the lake up to the bridge level and holds it to the high mark when the conduit pipe is closed. Thus the actual storage demonstrate what the Wapinitia Irrigation company has claimed as an asset and security—namely, that a lake bottom to start with is much better than an artificial basis. When Frog creek and Clear creek flow is low there appears no rea on why this three-foot core wall storage cannot be released to aid in after season irrigation just that much.

Sheep will be admitted to the forest range about July 1.

Gertrude Laughlin has returned from her switchboard work at Maupin.

Frank Richardson has ceased labor at the Joe A. Graham camp and will now work for the McFarlane mill company.

Walter Sharp has traded his Star car in on a Chevrolet truck. He will haul wood.

Lewis Walters and son, Virgil Mayfield and Ben Richardson attended the Dodge sale at Smock last week.

The 4-H members, chaperoned by Mrs. Blanche Hedin at Corvallis, and Newport, will return to Maupin on Saturday night.

Joe A. Graham's road crew is dragging the Clackamas to Clear lake road and is also taking the S bend out of the highway eight miles west of Bear creek.

H. E. Wray is another man who is hauling wood from the Dane tract. J. S. Brown, Engineer Carrigher, inspector of engineering of the highway, "Dock" Wilkins, E. E. Miller, W. B. Keen, Robert Ellenwood, Engineer. Moss and others met at the canal and road intersection in the mountains to view the canal and highway engineering.

J. S. Brown is to furnish the S. Simenson camp hay for 20 head of stock.

Wallace Fargher has rented 200-acre and 300-acre tracts at Pine Grove for sheep pasture, to be used when going to and coming from the

mountains this season.

Ben and Frank Richardson have "buzzed" up a pile of limb and slab wood, which they will hold for sale.

Dewey Linn is cutting wood on the Olson claim, recently purchased, where the new sawmill is to be located.

Ralph Woodside and Marion O'Brien are again working at McFarlane's mill. The mill cut is about 12,000 feet per eight hours. They operate the planer after hours.

Lester West is hauling wood from the Walter Sharp wood camp.

WAPINITIA I. O. O. F.

Lodge No. 209, Maupin, Oregon meets every Saturday night in I. O. O. F. hall. Visiting members always welcome.

Geo. Claymer, N. G. Bernard Welch, Secretary.
