Tested the Bridge—
As a test of the new bridge A. J. Kuntz, the man who operates the huge team excavator took his equipment over the new bridge last Saturday. The structure did not so much as shiver, so stable it is. Mr. Kuntz is an expert with the steam shovel and is making good headway in building and repairing roads in this vicinity.

Pick Ups About Town

Our phone refused to function several days last week. Investigation by Manager Crofoot disclosed that the ground wire leading to a water pipe had been cut. The same thing has happened several times, both on radio and telephone lines, and we have been the sufferers each time. It is a darned small trick to play on anyone, even if those owning the lines do not meet with the approval of the wire cutters.

Making the trip from the "Blue Grass" state to Maupin in 14 days, going "by hand" and catching rides on the way, marks a near record for the two young men who made the journey. They are loud in praise of the kind treatment received at the hands of autoists, and we are betting neither of the boys will ever pass up a chance to give needy wayfarers a lift if they ever drive cars of their own.

A certain young man from this vicinity went to the county seat one day last week. Once there he parked his car next to several others and when he went to get it found he was hemmed in. Being in a hurry, he negotiated a turn by running on a sidewalk, which was against the ordinances made and provided. He was haled before the court and pungled up a ten spot for his infraction all of which will serve as a lesson in observance of rules laid down for guidance of autoists.

There are certain drivers in Maupin who seem to like to go as fast as possible. They will start their cars and before they have gone much farther than two car lengths are "tepping on it" for all they are worth, hitting the maximum of

speed. The limit set by Maupin's city council is 20 miles an hour, but evasion, rather than observance of that limit, is practiced by the ones in mind.

Mike VanLanen is in town and all his old friends have been busy trying to tear his hand from his arm. Mike has been working hard and shows it by thinness. His old-time smile is with him, however, and he is as welcome as the first warm wind in spring.

The fortitude and determination of that Boy Scout who, rather than miss the dedication of the new bridge with others of his clan started for

Maupin last Friday, intending to make the trip on foot, is worthy of emulation by most men. That Dalles youth was determined to be with other Scouts, even though he had to drill the 50 miles separating Maupin and The Dalles. At that he was the only Scout from the county seat who was present at the exercises.

Today is the nation's birthday and will be observed by Maupinians by trips to the mountains and fishing streams. Taking advantage of the occasion The Times force will lay off, getting the paper out a day late, so, readers, please don't kick, just take the latene's as a matter of course.
