

The Maupin Times

AN INDEPENDENT NEWSPAPER
C. W. SEMMES, Editor
C. W. Semmes and E. R. Semmes
Publishers

Published every Thursday at
Maupin, Oregon

Subscription: One year, \$1.50; six
months, \$1.00; three months, 50c.
Entered as second class mail mat-
ter September 8, 1914, at the post-
office at Maupin, Oregon, under the
act of March 3, 1879.

Another Bazaar—

The Ladies Aid of the Maupin
church have arranged for a bazaar
possibly at the Legion hall, on Fri-
day, December 6. A large number
of useful articles have been prepar-
ed for the bazaar. During the even-
ing a small program will be render-
ed and a light lunch served. All
can assist in the work of the Aid by
patronizing the bazaar as the money
derived from the sale of the things
made will go toward the upkeep of
the church. Remember the date and
plan to attend.

"INSIDE" INFORMATION

Do not be surprised to see some
reindeer meat in the market one of
these days. It can be cooked in
most of the ways that beef is cooked,
depending on the tenderness of the cut.
Alaska is sending a good supply of
reindeer meat to the U. S.

A safe reducing diet is one in
which all the essential food materi-
als are supplied, but in which the
fat-building foods, starches, sugars
and fats, are eaten sparingly. Fads
about reducing diets are likely to
cause serious troubles.

Linoleum, to give the best ser-
vice, should be laid over a smooth
floor in such a way that it does not
buckle, and it should be cleaned with
a damp cloth wrung out of suds made
with mild soap. Alkali washing
powders, strong soap, or too much
water, will even ruin the best linoleum.

Complicated fastenings around
his waist are an aggravation to the
small boy who is learning to put
on and take off his own clothes. In
selecting patterns or in choosing
ready-made garments, look for the
ones that are easy to button up, if
possible, without having the front
of the trousers overlap the back or

vice-versa, (a good way is for them
just to meet at the side.) with short,
loose, straight legs, and on the
blouse, flat simulated collars rather
than flapping ones that get in
the way. Many other new points
about boys' suits are described in
a new leaflet, No. 62, which may
be obtained free from the U. S. De-
partment of Agriculture.

Tomatoes, fresh, raw, or canned,
are a good source of vitamins A, B,
and C. This is the reason tomato
juice is often recommended for young
children and even babies. Include
tomatoes frequently in the menu in
one form or another. Try them raw,
stewed, baked, fried, broiled, or
scalloped, or in sauces, soups and
salads.

Hot scalloped apples are easily
made for dessert and will be ready
to eat at the end of the meal if
tarted a little over an hour before
dinner. Choose tart apples. Pare,
core, and slice them. Place a layer
in a baking dish, sprinkle them with
sugar, and pour on a little melted
butter. Add more layers until the
dish is heaping full.

Press the apples down, cover the
dish, and cook slowly, from an hour
to an hour and a half. As the ap-
ples cook down during the first half
hour, a few more may be added.
Fifteen minutes before the apples
are to be served, remove the cover
and spread buttered crumbs over
the top. Return the apples to the
oven, and let the crumbs become
golden brown and crisp. The apples
themselves will be in whole pieces
and transparent.

FARM REMINDERS

Spraying with Bordeaux mixture,
winter strength, during December or
January has been found the best
method of controlling the peach
leaf curl disease, says the Oregon
Experiment station. One spraying
is sufficient if it is applied so as
to cover thoroughly the buds, pro-
tecting them against the fungus in-
fection which usually attacks the
young shoots just as the leaf tips
emerge from the buds in the spring.

The number of cattle carcasses
condemned for tuberculosis in the
United States decreased from 430
per million in 1928 to 380 in 1929.
The number condemned declined
from 660 to 530.

If bee supplies, such as empty
comb or foundation, are stored in
a warm place during the winter it

is necessary to fumigate with car-
bon disulphide while the tempera-
ture is above 60 degrees F. to pre-
vent damage by wax moth, says the
Oregon Experiment station. If the
storage place is exposed to winter
temperature fumigation is unneces-
sary. Carbon disulphide is explosive
and dangerous near an open fire.

A 40 per cent solution of nicotinic
sulphate, painted on the roosts short-
ly before roosting time, is quite ef-
fective against chicken lice.

Stovall's Bu-Qu pills, a guaranteed
treatment for all kidney disorders,
50 cents, at the Maupin Drug Store.

HOME POINTERS

(From School of Home Economics)
When flour is browned more of
it is required to thicken a liquid.

Honey is best kept in a warm
place, as cold, makes it cloud or gran-
ulate

Inspectors of labor conditions in
factories and stores require that
stools be provided for help to use.
While no one inspects the housewives
working condition, by keeping a
high stool in the kitchen she can
save her strength while doing rou-
tine duties such as ironing, or sink
work.

Milk and butter, if stored near
such strong flavored foods as onions
and cabbage, readily absorb these
flavors.

When an acid liquid is to be thick-
ened, more of the thickening agent is
needed, and the time for cooking is
shortened.

White of egg is often used to
steep boiled coffee, because it
coagulates; it draws the grounds to-
gether in a ball. A few drops of
cold water added after removing
the coffee from the fire also clears
the coffee by driving the grounds
to the bottom.

OREGON NEWS NOTES

Klamath Falls—New Sacred Heart
church and Parish House at Eighth
and High streets dedicated.

Klamath Falls—Pioneer East side
pharmacy opened for business in
Mills addition.

Gold Beach—War department ap-
proved plans for construction of
bridge over Rogue river at this
place.

NEW RADIO TRENDS
STRESSED IN SHOWS

Simplified Tuning and Screen
Grid Tubes Are the
Big Features.

Simplification in tuning, popularity
of screen grid tubes and exceptionally
artistic cabinets for radio receivers
are among the outstanding features
of the radio shows which now are in
progress throughout the United States.
Quantity production has brought the
greatest values ever offered.

An innovation in the offering by one
of the largest manufacturers of the
first battery operated Radiolas whose
performance is comparable to those of
socket power. This development,
made possible by loudspeaker refine-
ments and the increased efficiency of
the screen grid at a low current con-
sumption, is being welcomed by own-
ers of homes unwired for electricity.

Although the screen grid leads in
the new models as a radio frequency
amplifier, another new Radiolon, the
UX 245, is used widely as an outstand-
ing part of the audio systems. The
UY 227 and other standard tubes also
retain their popularity for the specific
uses for which they are best suited.

The famous super heterodyne cir-
cuit is employed in one of the new-
est Radiolas, attracting attention at
the shows, but quantity production has
put this model for the first time in a
price class within the reach of the
vast majority of listeners.

The entire control mechanism of one
modern radio receiver. Illuminated
dial numbers show on the escutcheon
window when the set is turned on.

Simplified tuning in some models ex-
hibited takes the form of tuning and
volume control from one combination
knob. In others it is aided by a magni-
fied tuning scale which throws illumi-
nated numbers of a size which can be
read easily upon a translucent con-
tact window in the escutcheon. This
Rafloia tuning scale is the re-
search laboratory's answer to the prob-
lem of tuning receivers placed in po-
sitions where the light is not good.

In the Sixth Annual Radio World's
Fair in New York a radio Pageant of
Progress, prepared at a cost of more
than \$100,000 by the Exhibition Divi-
sion of the Radio-Victor Corporation,
traced by means of historic apparatus,
replicas and true to scale models the
story of radio from Marconi to the
present. Similar historical exhibits of
radio are being placed by Radio-Victor
in other shows. George Clark, man-
ager of the Exhibition Division, is sec-
retary of a committee cooperating
with the Smithsonian Institution and
government officials in creating a na-
tional museum of radio, which eventu-
ally will house many of the exhibits
being shown by his company.

Television demonstrations under the
auspices of the Radio Corporation at
the New York show indicated real
progress, but the engineers whose bril-
liant work was responsible for the im-
provements were careful to point out
that other problems still remained to
be solved before television would be
practical for home sets.

OWNERS OF RADIO
IN EVERY STATE

An interesting insight into the wide-
ly distributed ownership of the radio
industry in the United States is given
by the summary and classification of
the stock of the Radio Corporation of
America, the largest radio organiza-
tion in the world. The latest state-
ment shows stockholders in every
State in the Union. Ninety nine per
cent of the class A common stock is
owned in the United States, much of
it being in the hands of small invest-
ors.

Although there is a good showing
in the industrial East, as in the case
of all stocks, New York State having
1,291 class A common stockholders,
Illinois has 357 stockholders in the
same classification. California lists
134 class A common stockholders, al-
most as many as New Jersey, which
has 140.

Among the thirty-four foreign coun-
tries in which there are holders of
class A common stock are such widely
separated points as Argentina, Aus-
tria, British Guiana, Honduras, Egypt,
India, Venezuela, Norway, Japan and
Ireland.

Do You Feel Absolutely Safe?

When you go to bed at night do you feel absolute-
ly safe?

When you leave your home for a day do you feel
absolutely safe?

Is your property safeguarded by a policy in a
good, reliable insurance company?

Have you taken precautions against fire? If you
have not now is the time to insure against that poss-
ible loss by fire.

Insure Today

We handle only the most reliable insurance and
represent some of the most substantial insurance
companies.

See us today and let us write that policy that will
give you the needed protection.
