

22 Rounds of BOXING!

Maupin Legion Hall SATURDAY, DEC. 14

This smoker will bring together some of the fastest and hardest hitting fighters of this section. Three of the Holloman boys have been signed for the card, the main event being a six-round go between

FLOYD HOLLOMAN, Maupin
and

KNOCK-OUT BROWN, Prineville

In addition to the above there will be four four-round bouts, contested by boys who know all about leather slinging and who will show action from the tap of the gong to the finish.

Ringside, \$1.25 General, 75c

BENEFITS OF BASKETBALL

(Marion O'Brien)

The benefits derived from basketball are numerous. The game being played on a small rectangular floor of about 75 feet by 48 feet, by ten men with five on a team, or twelve women with six on a team, develops one's quick thinking ability. It teaches one to employ team work in working the ball towards the goal. The team work learned in basketball or other athletics is never entirely forgotten and is involuntarily used in dealing with others in later life. When one plays basketball, as in any other athletic game he must have a steady, calm nerve. He must not disregard his team mates and try to be all-star player of the team. Even more so in basketball than in football, good wind is needed by the players if they expect to stand the "gaff."

Although different in nearly all

respects, basketball greatly resembles football in the aspect of plays which may be employed. If every one does not perform his duty, as in football, the play fails. So basketball teaches one to do what is expected of him. It takes up the training where football left off. Also, as in all athletics games, the athletic learns to take things as they come without grumbling—plainly speaking, he learns to be a sport.

SCHOOL NEWS

Basketball goals were erected a few days ago and the ground leveled off by picking out a few large rocks. Monday morning found the boys rolling the old ball around, and the running and twisting around gave one the impression that a cyclone had broken loose.

Everyone enjoyed the Thanksgiving vacation. All report eating their share of turkey.

All the teachers left Wednesday evening for their respective homes. The basketball goals have been

put up and the boys are busy practicing. The girls are worrying over when they will get the field to action.

Mr. Shorthill, Miss Shorthill's mother, was a visitor in the Primary room Monday morning.

Marion Howard was absent from school Monday morning.

Wapinitia Jottings

Mr. and Mrs. Jesse Crabtree were Thanksgiving guests at the E. H. Snodgrass home.

Clifford Odell was a caller at the Roy Ward home Saturday.

Mr. and Mrs. Lester McCorkle are the parents of a baby boy, John Lester, born Thanksgiving Day.

Mr. and Mrs. Ernie Endersby were callers at the Roy Crabtree home Thanksgiving.

A large crowd from Wapinitia attended the Thanksgiving dance given by the Maupin Legion.

Mr. and Mrs. Roy Crabtree and son, Carson, and Mr. and Mrs. Earnie Endersby were in Maupin Saturday.

Mrs. Lester Crabtree and baby daughter, Helen, came home Thursday.

day. She is staying with her mother Mrs. R. I. Davidson for a few days. Mr. and Mrs. Shorthill came up from Portland Sunday, bringing Myrtle Shorthill, primary teacher, back.

Mrs. Roy Ward and Miss Helen Endersby were callers at the J. Shepflin home in Maupin Saturday evening.

Mr. and Mrs. T. W. Linn made a business trip to The Dalles Monday.

William Sturgis and family experienced a wreck with their Chevrolet six about six miles east of The Dalles on the Columbia River Highway last Thursday. The car, which skidded and turned around several times, rolled over, tearing away the fenders and a trunk which was attached to the rear. Occupants of the car were unhurt.

tooth ache.

The Primary room is beautified by a pretty blooming geranium.

ELTON'S LETTER

Maupin, Oregon

Dec. 3, 1929.

Dear Aunt Abbey:

I always think of you along about Christmas time. I want to thank you for your presents last year, especially for the new Ford. Don't forget my address.

Now, Aunt Abbey, I want to try and tell you how hard I study. I'm carrying four subjects, just imagine, and my average for last six weeks amounts to 101 per cent. You know I got 25 per cent in each subject and one in department. Isn't that grand for your little Elton. I know you will be tickled.

Would you believe it we never whisper, why it was just the other day that one of my teachers asked me to talk a little louder.

Well good bye, Aunt dear. Did you see that picture in the "Twilight Dreams," of an airplane? Gee I wish I had an aeroplane.

With love,

ELTON PERRY SNODGRASS

PAGE, LINE AND PARAGRAPH

Don't feed the dairy cow ear corn. Grind it either with or without the cob.

As the pullets in the poultry flock begin to lay eggs they need fairly large amounts of calcium for the formation of eggshells. This is probably best supplied in the form of oyster shell, or limestone.

The horse that eats his oats too ravenously and is in danger of choking should be given a little chopped clover hay or some whole corn cobs, mixed in with the oats. The use of wheat bran with oats also lessens the tendency toward choking.

In the range areas the practice of holding steers over until they are 2 or 3 years old is gradually giving way to the sale of the animals as feeder calves. Demand for lighter and smaller cuts of meat is responsible for the change.

When cured pork on the farm is to be canned, it is better to split the carcass through the center of the backbone, rather than on each side as is usually done. This "center split" eliminates the appetizing backbone cut, but it leaves the two loin muscles so they can be boned out readily for canning.

The dairy heifer's ration during late fall, winter and early spring should include hay, silage, and grain. Well-cured legume hays such as alfalfa, clover, vetch, cowpeas, field peas, and soybeans are best as they are rich in both protein and lime. Corn silage is rich in carbohydrates and is succulent and laxative, making it a valuable feed when pastures are not available.

Milking machines should be taken apart and thoroughly washed at least once a week, even though they are thoroughly rinsed immediately after each milking. If the machines are not rinsed immediately after the milking they should be taken apart and thoroughly washed. This is essential to prevent curd from forming at the connections and in the crevices.

TEACHERS' EXAMINATIONS

Notice is hereby given that the County Superintendent of Wasco county, Oregon, will hold the regular examination of applicants for state certificates at his office in the court house of The Dalles as follows: Commencing Wednesday, December 18, 1929, at 9 o'clock a. m., and continuing until Saturday, December 21, 1929, at 4 o'clock p. m. Programs may be had upon request.

Vale—Rex Theatre installed talkie equipment.

To determine which is the right and left sleeve after cutting out the material, fold the sleeve through the center lengthwise with the sleeve seam edges together. If one side of the sleeve is only slightly higher than the other and the top curve of the front and back lie in the same

general direction, the high side is the back. At the lower end, too, the back will extend beyond the front.

Economical Cans

Every woman knows that in many ways husbands are similar to little boys, so when you have concocted a dessert which is not to be eaten until later in the day, forestall his raiding tendencies and offer him a taste.

And if, as you are asking his opinion of the taste, you can delightfully tell him that the food is economical, too, doesn't that add to the pleasure of his praise?

For Summer Thrift

One of the best ways to economize on summer food is to combine canned fruits and vegetables with fresh ones. Because canned foods are put up at the height of the season and all waste is discarded on the spot, they frequently are cheaper than fresh foods in season and usually are less expensive than fruits which have passed their prime.

For instance, if you use many fruit juice beverages during the summer, it probably will be less expensive to purchase large cans of loganberries, cherries (sour pie cherries) and other berries than it is to extract the juice of fresh ones. The fruit from which the syrup is drained can be used in puddings of the Brown Betty type.

Combining canned and fresh foods will save time, too. Say you want to serve peas and carrots. You can buy either the peas or carrots fresh and get the other canned, thus saving much time of preparation.

Small Cans Economical

For small families, the eight-ounce cans which hold a cup and sell for ten cents are a wonderful help in eking out small amounts of fresh foods, and may even be used entirely to make a vegetable stew or a fruit dessert.

"Something for the Home"

... the happy thought that will make this the best Christmas ever

Ordinary gifts mean an ordinary Christmas. It's the unexpected gifts that make a Holiday season exciting. Give Home Furnishings—the one gift that never fails to please. A single present of Home Furnishings will win far more appreciation than many costly trifles. Our showrooms are overflowing with suitable suggestions.
