ter September 8, 1914, at the post-  
office at Maupin, Oregon, under the  
act of March 3, 1879.

#### WANTS NAME CHANGED

The Klamath County Courier, in  
a lengthy editorial suggests a change  
in name for The Dalles-California  
highway and suggests that road be  
called "Cascade Highway."

And why not? In the beginning  
of work on that highway it was  
termed Dalles-California highway to  
distinguish it from the Columbia,  
John Day, Ocoee and other routes.  
It was a mere matter of makeshift  
which has carried over to the present  
time.

The name Cascade highway is  
more euphonious besides carrying  
the idea of the great range of moun-  
tains which parallels the highway al-  
most its entire length. Tourists, es-  
pecially those from the east, have no  
clear idea of the magnitude of our  
highway before they travel it  
west. When on it their thoughts  
naturally turn to either The Dalles  
or California, seeming to forget  
the beautiful range of mountains al-  
ways within sight along the full  
route.

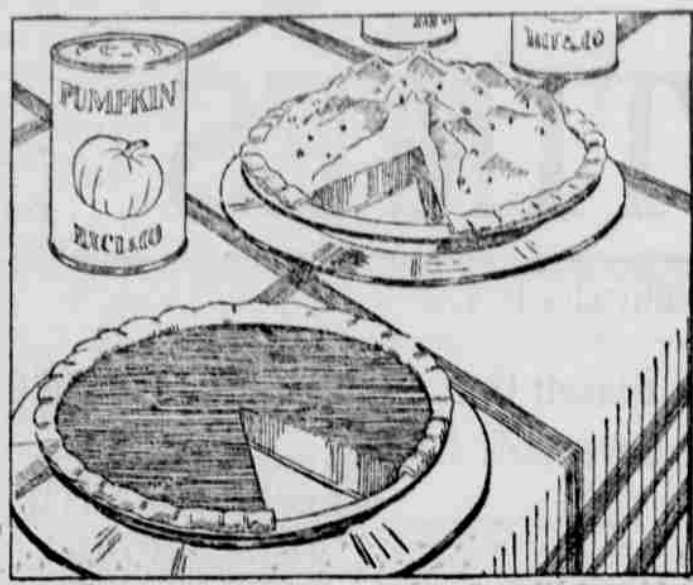

In naming Oregon's main arteries  
of auto travel those in charge seem  
to have lost sight of appropriateness.  
For instance: The Pacific highway  
does not follow along that ocean at  
all. It runs through a valley cut off  
from the big water by a chain of  
mountains. The Roosevelt highway  
might appropriately be called the  
Pacific highway thus allowing the  
now-named route to be called some-  
thing else germane to the route  
traversed.

But after all what's in a name?  
A rose by any other name would  
smell as sweet, so Shakespeare said.

#### WHEAT GROWING POINTERS

Spring disking of stubble is al-  
ways advisable if the ground is to  
be plowed late. For early plowing  
disking does not pay. The use of  
a rolling coultter attached to a joint-  
er aids in turning under stubble  
more completely, making better  
summer fallow.

Late plowing without previous

### Pumpkin for Pies

HERE was a time when mak-  
ing a pumpkin pie was no  
simple matter. First the pump-  
kin had to be opened and the seeds  
removed; then it had to be cut in  
sections and pared; next came the  
steaming and then the mashing.  
And only by that time was the  
housewife ready to start on the  
making of her pumpkin pie proper.  
Today all that is changed, for  
commercial firms have taken over  
the arduous work of preparing  
pumpkin and have put up the fluffy  
pulp in gold enamel lined cans  
which preserve the vegetable's rich  
orange color.

#### A Basic Pumpkin Pie Recipe

Because this advance has made  
it so simple to make pumpkin pies,  
several new varieties have been  
developed by dietitians. For in-  
stance, here is a basic pumpkin pie  
recipe which can be varied in many  
ways:

**Pumpkin Pie:** Mix together two  
cups of canned pumpkin, one and  
one-eighth cups of brown sugar,  
one teaspoon salt, one and one-half  
teaspoons ginger, one teaspoon cin-  
namon, three slightly beaten egg  
yolks and one and one-half cups  
evaporated milk mixed with one-  
half cup water. Fold in three  
stiffly-beaten egg whites. Pour into  
tart tin or pie tin lined with pastry.  
Bake, having oven hot at first, then  
moderate.

**For Marmalade-Pumpkin Tarts,**  
put a spoonful of orange marmalade  
in the bottom of pastry-lined  
tart tins, fill with the pumpkin fill-  
ing and bake as usual. Or stoned  
and chopped dates may be scattered  
over the bottom of a pie before  
filling with pumpkin to make Date-  
Pumpkin Pie. Unsweetened, whipped  
cream may be piled over the top  
of a pumpkin pie and drops of  
honey may be dripped over the top.  
This makes a particularly good pie.\*

disking reduces wheat yields.

Plowing from five to eight inches  
deep with variations in depth each  
time of plowing is recommended.  
Plowing deeper than eight inches will  
rarely if ever prove profitable.

Packing after plowing does not  
materially affect the yield of wheat  
after fallow. For spring plowing and  
sowing, thorough packing after  
plowing is advisable.

Harrowing is best done within a  
week or ten days after plowing.  
Harrowing after plowing and before  
the moisture has left the ground  
helps firm the seed bed.

Tillage tools best adapted for  
summer fallow are spike tooth and  
spring tooth harrows, and blade or  
rod weeder.

Weedy fallow means lower yields  
and poorer quality of wheat.

Cost of plowing is recognized as  
important in cost of production.  
New tillage implements are being in-  
troduced intended to eliminate plow-  
ing in seedbed preparation. These  
implements should be tested by the

Oregon Experiment station so that  
definite recommendations can be  
made regarding their use. Plowing  
is necessary as most soils and should  
not be replaced until the value of  
the new implement has been demon-  
strated.

The wise women of advancing  
years gives quite as much attention  
to her appearance as her daughter  
does.

Ease of housekeeping is always  
more likely to follow in the wake  
of the system of management which  
provides a place for every pot and  
pan, for every garment, or any other  
utensil or piece of equipment.

A good place for a pretty garden  
or lawn is where mother can enjoy  
it from the kitchen window.

One of the greatest conveniences  
in any clothes closet is a shoe shelf  
placed above the base board so  
that shoes may be reached with less  
stooping and also may be kept off  
the floor of the closet.

A long string with a radium bulb  
attached to the pull of the old-  
fashioned light in the bath room  
makes the turning off of the light  
more interesting to children and  
less likely, therefore, to be for-  
gotten.

Soaking any kind of fresh meat  
in water before cooking is a mis-  
take. It draws out the juices which  
give the characteristic flavor and  
add to its food value. Before cook-  
ing simply wipe meat off with a  
damp cloth of trim it.

Remember that the table is a  
place for good comradeship with

one's children and not for discipline  
or nagging. Take it for granted  
that the child will eat happily every-  
thing served him, and be sure that  
he becomes acquainted with a variety  
of foods.

Spraying to control the San Jose  
scale one of the worst orchard pests  
in the country, should be done during  
the dormant period of the trees, says  
the U. S. Bureau of Entomology. In  
the absence of foliage the sprays can  
be applied much stronger than in  
the growing season.

Flock owners have found that  
when a ewe refuses to own her  
lamb, it is sometimes sufficient to  
draw some of the milk and rub it  
upon her nose and also upon the  
rump of the lamb, and after losing  
her own, a ewe can sometimes be  
persuaded to adopt an orphan lamb  
by fattening the skin of the dead  
lamb over the lamb to be adopted  
for a few days, says the Oregon Ex-  
periment station.

#### CLASSIFIED COLUMN

**KEYS LOST**—Bunch of keys some-  
where about town. Strung on  
ring. Finder please return to  
Chas. Crofoot.

**KNIFE LOST**—Small pocketknife  
lost somewhere on streets of Mau-  
pin. Has figures "1909" on one  
side of transparent handle; "Chas  
Hammer, Wapinitia," on other  
side. Valuable as a keepsake.  
Return to Job Crabtree and re-  
ceive \$1.00 reward.

**APPLES**—Newtowns, Jonathans,  
Ortleys, Baldwins. Good cookers,  
good keepers. Now in storage at  
Dufur, Oregon.

Vanderpool & Stoughton.

#### NOTICE OF FINAL SETTLEMENT

Notice is hereby given that John  
A. Hardin, Administrator of estate  
of I. P. Hardin, deceased, has filed  
in the county court of Wasco coun-  
ty, state of Oregon, his final account  
as such administrator; and that  
Monday, the 10th day of March,  
1930, at the hour of ten o'clock a.  
m. has been fixed by said court as  
the time for hearing of objections to  
said report and the settlement  
thereof.

JOHN A. HARDIN,

John Gavin, Attorney. Administrator  
F 13-M 6.

#### NOTICE FOR PUBLICATION

Department of the Interior, U. S.  
land office at The Dalles, Oregon,  
February 11, 1930.

Notice is hereby given that  
**Orrión Farlow**  
of Maupin, Oregon, who, on March  
7, 1925, made Homestead Entry  
under act December 29, 1916, No.  
022789, for E 1/4 SE 1/4, SW 1/4 SE 1/4,  
Section 26; NE 1/4, SE 1/4 NW 1/4, N 1/4  
S 1/4, SE 1/4 SE 1/4, Section 35, T. 5S.,  
R. 13 E., SW 1/4 NW 1/4, Section 1,  
E 1/4 NE 1/4, Section 2, Township 6-  
South, Range 13-East, Willamette  
Meridian, has filed notice of inten-  
tion to make final three year proof,  
to establish claim to the land above  
described, before F. D. Stuart,  
United States Commissioner, at  
Maupin, Oregon, on the 25th day of  
March 1930.

Claimant names as witnesses:  
J. H. Fitzpatrick, Edward Fitzpatrick,  
J. L. Confer, Willis Roberts all of  
Maupin, Oregon.

J. W. DONNELLY, Reg.  
F 13-M 20.
