Why Pay a Fancy Price For a Name?

When you buy a widely advertised radio the most of the money you pay for it goes toward paying for such advertising, a comparatively small amount being employed in materials and construction. Also a certain amount of your money goes into selling costs. We can eliminate the advertising and selling costs and supply you with a high class radio, complete with loud speaker and tubes, at actual cost, it being the

Orpheus⁵ Tube Radio

This radio comes in a beautiful black walnut case and is equipped with double drum dials, volume control and reostat. We will sell this radio, without batteries, for

Only \$25.00

Come in and let us demonstrate this radio. You hear it once and you'll be convinced it's the best bet.

THE MAUPIN TIMES

FACT LINE AND PARAGRAPH

It is well to stanchion heifers with the milking herd for two or three months before calving. If they are brushed gently and handled every day they will become accustomed to the attendant and will be easier to break to milk.

Calves to be fattened for beef should not be allowed to lose fat they have gained from milk feeding. Quality and finish are very desirable in the finishing. Half finished calves do not usually bring enough on the market to make their production profitable.

It is poor economy to crowd chicks in the brooder. Better chicks can be produced by placing one chick under a 500-chick brooder and filling it to capacity. Clean and comfort are essential to success.

All poisons in the home such as insecticides, anti-septics, polishes, and the like, should be kept securely locked up when not in use to prevent accidental poisoning of food, the Food, Drug and Insecticide Administration recommends. Many deaths are caused every year by accidental poisonings which could be avoided by simple precautions in handling and keeping poisons.

The development of the chicks into strong, healthy pullets which should begin their laying period at the right time and continue through the fall and winter months when egg prices are high.

The longer a broody hen is allowed to sit on the nest, the longer it takes to get her back into laying condition. As soon as a hen is seen to remain on the nest at night, she should be removed and put into a broody coop; that is, a coop with a flat bottom so that the air circulates underneath and tends to keep her from sitting. While confined in the coop she should be fed and watered regularly.

Try apple and rhubarb pie for a change—using 1 large apple, 3 cups sliced rhubarb, 2 tablespoons butter, one-half to three-fourths cup sugar, and one-fourth teaspoon salt as the filling for a pre-baked pastry shell. Prepare and cut the apples in thin slices and cover the crust with them, sprinkle with part of the sugar and

salt; spread the rhubarb over the apple, add the remaining sugar, and dot with butter. Lay strips of pastry criss-cross over the fruit and bake in a moderate oven until the fruit is tender.

The length of time required to roast a leg of lamb depends chiefly on the size of the leg and the temperature of the oven. Most people prefer lamb from medium to well done, and if a roast meat thermometer is inserted in the meat uniform results will be obtained at every cooking. The thermometer should register 175 degrees, F. for medium and 182 degrees, F. for well done meat. Place the leg of lamb skin side down and cut-flesh side up on a rack in an open roasting pan. Do not add water and do not cover. Sear for 30 minutes in a hot oven 480 degrees, F., to develop flavor, and then reduce the oven temperature rapidly to 300 degrees, F., and continue the cooking at this temperature to the required degree of doneness.

MAUPIN HI TIMES

(continued from first page)

toward that end. Some of the Seniors of the 1930 class have, therefore, signified their intentions of going on to school. Nina, Lelah, Elton, Gladys, Bob and Richard plan to go on to school. Richard plans to work with his father at the carpenter's trade for a while and then take an aviator's course. Orville Fraley intends to employ his mechanical ability and training in the building up of the Maupin garage. Albert St. Dennis has expressed his earnest desire to become a carpenter.

CLUB NOTES

During the last 18 years approximately 7,000,000 boys and girls have been laboring under the 4-H club banner to "Make the best better."

The poultry club members discussed in their last meeting, the making of a brooder and how they should take care of their chickens. Franklin Renick has a small flock of Plymouth Rocks, while Henry Wilson prefers Jersey Giants. The other members have not started yet.

The Highlander Potato club has had four meetings. These meetings are conducted on the Criterion-Lake

View school bus, as all five members ride on the bus. They have been deciding on where to get their Netted Gems and what price they are to pay for them. While the most important part was how to plant and take care of them, after getting the good seed potatoes.

Jim and John Slusher are the only members in the Sheep Club. They have twenty head of bumper lambs to feed. They must keep a record of their weights and what they feed them.

The Blue Ribbon Cookery club reported having an excellent time at the luncheon they prepared last Thursday noon. The meal consisted of potatoes and gravy, sandwiches, salad, cake, custard, and milk shake. All were cooked by club members, either at home or prepared at school before the luncheon.

The Camp Cookery club members and leader, Mr. Poling, cooked their noon meal at the Boy Scout camp grounds Tuesday. Each member cooked beef, steak and potatoes, while Mr. Poling made lemonade. Each one brought whatever other lunch he decided.

TOWN BASEBALL

The Dufur town team met the Maupin "Housecats" on the Maupin hillside Sunday afternoon and met defeat of 14-3. Maupin's battery was Poling and Renick.

It was a perfect baseball day and the largest crowd was out that has been present since Maupin had the "old team."

All visitors are handicapped by the uneven field which could be removed very cheaply by the cooperation of the citizens of the community.

The "Housecat" will play in their new uniforms at Dufur next Sunday.

GRADE NOTES

Primary

The First graders have completed their three basic readers.

Reading the supplementary First Reader by Free and Treadwell.

The First and Second graders are making transportation booklets. These include the methods of travel in different countries.

The Primary room looks as if the Eastern season was at hand. Attractive Easter pictures are on the bulletin boards.

The Second graders made a book-

let showing the various uses of the e. This work is in connection with the reading period.

Easter problems are being worked out in art periods.

The First and Second graders are loyal supporters in trying out for the annual track meet.

The Primary room was beautified by a bouquet of lovely red tulips, brought by Very Confer.

Lillie Seifert and Vurl Confer are the new inspectors for this week.

The policemen are Mae Greene and Beulah Richmond.

Jack Bothwell has charge of the wraps.

The pupils in the Primary room are very sorry that their friend and

speedy recovery.

Third and Fourth

Adeline Manning was absent from school Monday and Tuesday.

The Third grade is studying the 7 times table in arithmetic.

The Fourth grade has almost completed its Geography study.

Fifth and Sixth

Lena Turner was absent Monday.

Beulah Schilling stayed out of school Tuesday to go to her uncle's funeral.

Alice Greene brought a large bouquet of bird's nest to school.

John Slusher and Ernie Confer brought a lunch to school to use

in making some little booklets for hygienics.

The 1930 program is now being put into effect.

Several of the Seniors have been elected to the 1930 class.

First in high school. The first in high school. The first in high school.

Fourteen were elected to the 1930 class.

The 1930 class is now being put into effect.

The 1930 class is now being put into effect.
