

"INSIDE" INFORMATION

Fruit enough to make vinegar for a year's supply is wasted on many farms. Surplus or inferior fruit will make good vinegar. Apples, grapes, peaches, oranges, persimmons, and some berries are satisfactory. Any fruit containing enough sugar will serve the purpose.

To broil tomatoes, wash them, remove the stem ends, cut in half, put in a greased shallow baking dish, add salt, pepper and melted butter or other fat to season, and place under the flame of a broiling oven, far enough from the flame to allow the tomatoes to cook before browning. Broil for 20 to 30 minutes or until tender and lightly browned. Serve hot garnished with parsley on some crisp buttered toast.

Vitamin C in the diet is supplied by the citrus plants (oranges, grapefruit and lemons) raw cabbage, turnips and tomatoes, raw, cooked, or canned. Apples, potatoes, raspberries, spinach, sprouted legumes, and string beans are other good sources of this vitamin. The body has only a limited capacity to store vitamin C. Also, this vitamin is very easily destroyed by heat and oxidation. Hence in planning the menu it is well to include at all times one or more of the foods known to supply vitamin C.

The Federal food and drugs act requires every package of food except those containing one half

ounce or less to carry a plain and conspicuous statement of the quantity of the food in the package. Do not be influenced by the apparent size of the package; read the labels. It frequently happens that what appears to be a large container will actually contain less material than one that seems smaller. The first injunction to the housewife, say Federal food officials, is to read the quantity-of-contents statements on labels—that is, the net-weight or net-volume statement, determine whether the quantity received is the same as expected, compare this quantity with the quantity offered by other brands of the same quality and buy the product which gives the best value for the money.

PAGE, LINE AND PARAGRAPH

A boar used as a sire should not be discarded until the growing and feeding qualities of his progeny are determined by a test in the feed lot. Sires of superior quality are none too numerous and many a valuable sire that should have been retained in the herd has been sent to the block.

A mixture of one part of ammonium sulphate and three parts of cottonseed meal makes an excellent fertilizer for lawns, says the U. S. Department of Agriculture. Apply it three times in the growing season, at the rate of 12 to 15 pounds per 1,000 square feet. Cottonseed meal alone is satisfactory, though it does not act as quickly as the mix-

ture of ammonium sulphate and cottonseed meal.

Sheep seldom make profitable use of grain when good grazing is available. One hundred pounds of grain in a year for one ewe and her lambs is usually the maximum that can be fed profitably. Under some conditions, flocks keep in good condition and lambs may be marketed without any grain.

A clean cow is the first step in the production of clean milk. Even though cows appear to be clean, they may be very dusty and may need to be brushed before each milking. If kept in the stable, they should have a thorough grooming at least once a day. Clip the long hairs from the udder, flanks, and tail, so dirt will not cling to them. Just before milking, wipe the udder, flanks, and belly with a clean, damp cloth. Sufficient bedding, and frequent removal of manure, also help to keep the cows clean.

Set She Didn't Talk When bandits held up Miss Lulu Harrison of Kansas City she saved her diamond rings by concealing them in her mouth while they robbed her two male companions.

Asks Heart Balm Upon testimony of physicians that the heart of Mrs. Anna Sellek of Newark, N. J., had been permanently moved out of position in an automobile accident, she was awarded \$4,000 damages from Howard Burch.

After the First Twenty-five Thousand Miles

THE VALUE of sound design, good materials and careful craftsmanship is especially apparent in the new Ford after the first twenty-five thousand miles. Long, continuous service emphasizes its mechanical reliability and economy of operation and up-keep.

As you drive the Ford through many months and years you will develop an increasing pride in its appearance and a growing respect for the substantial worth that has been built into it. From every standpoint—in everything that goes to make a good automobile—you will know that you have made a far-seeing, satisfactory purchase.

Wherever you go, you hear enthusiastic praise of the car and this significant, oft-repeated phrase—"I'm glad I bought a Ford."

A FORD owner in New York tells of a 13,000-mile trip across the United States and back in sixty days and says "the car was extremely economical to operate, comfortable and speedy." A grateful father tells how the Triplex shatter-proof glass windshield saved his wife and children from serious injury.

To test tires, a large company drove a new Ford day and night, for an average of 500 miles every twenty-four hours. It was still giving satisfactory service after 105,000 miles.

A Ford car that had fallen into Fernan Lake was submerged for twelve days before being raised. After a new battery and carburetor bowl were installed, it was driven back to Spokane under its own power.

Many police departments have written of the special advantages of the Ford in crowded traffic because of its alert speed, acceleration, and ease of control. An increasing number of fleet owners are also purchasing the Ford because their cost figures have given conclusive proof of its economy of operation and up-keep.

In addition to important triumphs in Germany, France and Italy, the Ford won six out of seven leading places in a contest in Finland, first and second in the Rafaela races in Argentina, first and second in the

run from Copenhagen-to-Paris-to-Copenhagen, three gold medals in England, first ranking in the durability test over the tortuous Amancaes road in Peru, and first place in the 1930 reliability run conducted by the Royal Automobile Club of Sweden.

This contest was an exceptionally severe test of endurance and sturdy construction because it was held in the dead of winter and covered 600 miles of steady running over snow-covered country roads and mountainous hills.

NEW LOW FORD PRICES

- Roadster \$435
Phaeton 440
Coupe 495

Pine Grove Items

Lewis Walters underwent an operation for appendicitis at the Mid-Columbia hospital, The Dalles, on Tuesday of last week. The latest report from the hospital is that the patient is getting along in fine shape.

Leonard Weberg, wife and daughter, Jean, were Sunday guests at the Earl Cunningham home.

Naomi Lewis of Wamic is visiting with her sister, Verla, this week.

Mrs. O. Bronner left for Bend last Friday and will visit with her daughter, Mrs. John Charles, for an extended time. She will also seek medical aid when in the south city.

O. S. Walters and family were dinner guests at the Richardson home on Sunday last.

J. S. Brown transacted business at The Dalles this week Monday.

Ernest Hartman and wife, with their daughter, Crystal, passed thru Pine Grove last Sunday while on their way to the mountains.

Orlando Walters took a carload of fat cattle to the Portland market last Saturday.

We learn that the Harnes company has completed spreading the first coat of rock on the cut-off highway. The last stretch was covered Tuesday afternoon.

The Shell Oil company truck is a familiar sight in Pine Grove these days, as it is making daily trips to the rock crusher with gas and oil.

Many California cars are noticed coming through Pine Grove these days.

Color in hay may be lost in several ways, growers have found, even though it is cut at the proper time. It may be allowed to bleach too long in the sun, making it woody and less palatable; rain may cause loss of feed value as well as color by leaching the palatable plant juices from the hay, and heavy sweating in stack, bale or mow causes loss of color. The latter, when allowed to go too far, may also cause chemical change in the hay which lessens its value, says the Oregon Experiment station.

Cangon City—New equipment installed in central phone office.

WYOMING FLEECES RANK HIGH

Wool Marketing Corporation Forces Recognition of That Wool

"It is interesting to note," says the Wyoming Wool Grower of May 28th, "that the Wyoming range of prices this year is equal and possibly a little higher than any other state. In the past Wyoming wool growers have been discriminated against by wool buyers as much as five cents per pound, but now that the National Wool Marketing Corporation has demonstrated that Wyoming wool is just as good as any wool anywhere in the country, the dealers have been forced to pay Wyoming sheepmen full market value for their wools."

George W. Roe Calls—

George W. Roe, one of the best sheep herders in this section, was a welcome caller at this office on Monday. George has been working several months without a vacation, and for the next few days will enjoy himself visiting with friends at various places. He will take a band of 2200 sheep to the reserve when that section opens for stock admission.

Free to Public

Write for Business Advertising Matter you are interested in; same will be promptly forwarded. AMERICAN INDUSTRIAL LIBRARY Engineering Building, Chicago, Illinois

Recipes for the Bachelor Girl

THE bachelor girl who likes to cook her own meals and occasionally have a guest has difficulties confronting her which may be summed up in the phrase: How to buy little enough food to avoid waste.

But several agencies have combined to help her. Canners put out fruits and vegetables in eight-ounce cans which hold a cup and cost ten cents. Evaporated milk solves her milk problem, for it obviates the nuisance of attending to milk bottles and milk tickets and the problem of storing milk. Evaporated milk will keep well after being opened, if it is not all used at once, and the unopened cans can stand on the kitchen shelf ready at all times for use.

Recipes for Two

Some recipes which serve two and include this time-saving milk are:

Stuffed Tomatoes: Cut off stem and remove pulp of two large toma-

atoes. Mix two tablespoons chopped, canned okra with one tablespoon bread crumbs and season with salt and pepper. Fill tomatoes with mixture. Bake in a hot oven (450°) for fifteen minutes, then reduce heat to medium, 350°, for fifteen minutes. Make a cheese sauce by melting one tablespoon butter in a pan; add three tablespoons grated cheese and heat slowly until melted. Add one-fourth cup evaporated milk and heat until well blended. Pour over tomatoes and serve.

Salmon Patties: Remove bones and skin from a half-pound can of salmon. Add one and one-half teaspoons lemon juice, cayenne pepper, one-half teaspoon salt, one egg, one-half cup bread crumbs, one-fourth teaspoon baking powder and one-fourth cup evaporated milk diluted with one-fourth cup water. Mold into four patties. Place on an oiled tin and bake in a hot oven (425° F.) for five minutes, then reduce heat to 375° until browned.
